PROFESSIONAL SUMMARY

Engineering Management graduate with hands-on experience in data analytics, supply chain forecasting, and project management. Proficient in Python, SQL, Tableau, Power BI, and modern web technologies to transform complex data into actionable insights and interactive dashboards. Skilled at optimizing inventory planning, enhancing supply chain performance, and ensuring timely project delivery through data-driven strategies and process improvements. Certified in supply chain, cybersecurity, and data science, with a strong ability to assess risks, streamline workflows, and support sustainable operations. A collaborative and results-focused professional dedicated to driving efficiency and informed decision-making across cross-functional teams.

SKILLS

- **Programming & Data Tools:** Python (Pandas, NumPy), SQL
- **Web Development:** HTML, CSS, Bootstrap
- **Data Visualization:** Tableau, Power BI
- **Data Management:** Data Cleaning, Data Wrangling, ETL Process
- **Software & Tools:** Microsoft Office Suite (Excel, Word, PowerPoint), Jupyter Notebooks, Google Sheets
- **Cybersecurity:** Network Security, Social Engineering Awareness
- **Operating Systems:** Windows, Linux, macOS
- **Project & Operations Management:** Project Management, Supply Chain Optimization, Risk Assessment & Mitigation, Logistics and Systems Optimization
- **Supply Chain Tools:** SAP
- **Quality & Process Improvement:** Quality Assurance (QA), Quality Control (QC)
- **Inventory Management:** Stock Control, Order Processing, and Replenishment
- **Soft Skills:** Team Collaboration, Critical Thinking, Problem Solving

CERTIFICATIONS

- Certified Supply Chain Professional (CSCP) – Udemy
- Google Cybersecurity Professional Certificate
- HTML & CSS & Bootstrap Certification (Build a Static and Responsive own website)
- CS50's Python from Harvard University – edX
- Generic Online Training in Cyber Security
- Supply Chain Logistics & Supply Chain Operations – Coursera
- IBM Data Science Professional Certificate– Coursera

EXPERIENCE

Junior Agri-Tech Analyst

JKS AGRIMALL | JANGAON, INDIA

June 2022 – May 2023

- Collected and validated crop performance, soil test, weather, and pest data from 50+ farmers and 10+ field centers, supporting precision farming for over 100+ acres.
- Cleaned and managed agricultural datasets of 500+ records using Excel, SQL, and Python, improving data accuracy by 20% for analysis.
- Analyzed trends in crop yield, soil fertility, and fertilizer efficiency, providing insights that increased fertilizer use efficiency by 15%.
- Created clear reports and interactive dashboards in Power BI and Tableau, reducing reporting time by 20% and improving decision-making for 2 agronomists and managers.
- Assisted in developing and refining digital agriculture tools and mobile apps; gathered feedback from 20+ users to enhance usability and adoption.
- Collaborated with 2 agronomists and 2 field officers to optimize data collection, conduct 3 training sessions, and support 2 sustainable farming pilot projects reaching 50+ farmers.

Environmental Tools: Excel, SQL, Python, Power BI, Tableau, Remote Sensing (Drone Imagery), Weather Monitoring Stations, Soil Moisture & pH Sensors, Climate Field View, Microsoft Office Suite, Google Workspace,

PROJECT

1. Analysis of project delays in agricultural irrigation system installations | Arkansas State University
Jan 2025 – May 2025

- Investigated causes of irrigation system delays by collecting and analyzing field data from multiple sites, improving project timeline accuracy by identifying key bottlenecks.
- Identified critical delay factors such as supply chain gaps, labor shortages, and weather impacts, enabling project managers to develop targeted mitigation plans.
- Applied project management tools (CPM, PERT, risk matrices) to assess delay risks, reducing unexpected downtime, and optimizing resource allocation.
- Engaged with managers and engineers to validate findings, ensuring recommendations were realistic and actionable, leading to smoother project execution.
- Conducted environmental and logistical analyses using GIS and remote sensing, helping stakeholders plan installations more efficiently and sustainably.

Environmental Tools: EIA (Environmental Impact Assessment), GIS (Geographic Information Systems), Remote Sensing, Soil Testing, Weather Forecasting, Climate Data Sources, CPM (Critical Path Method), PERT (Program Evaluation and Review Technique)

LEADERSHIP EXPERIENCE

- **Secretary & Event Organizer** Oct 2023 – May 2025
Indian Student Organization (ISO), Arkansas State University, Jonesboro, AR
 - As Secretary & Event Organizer for the Indian Student Organization (ISO), coordinated and executed cultural and social events, ensuring smooth planning.
 - Supervised a team of 5+ volunteers, ensuring efficient task completion.
 - Facilitated communication between team members, documenting meeting discussions and tracking action items.
 - Collaborated with faculty and external partners to ensure successful event outcomes.

EDUCATION

Arkansas State University (ASU): Jonesboro, AR | MASTER OF SCIENCE IN ENGINEERING
MANAGEMENT Aug 2023 – May 2025
Cumulative GPA: 3.80/4.0

- **Course Work:**
 - Quality Control and Improvement
 - Advanced project Management and practices
 - Network and Data Security
 - Finance and budgeting for engineering
 - Data Analysis
 - Supply Chain Logistics
 - Supply Chain Operations
