Education

University of Florida

Master of Science - Computer and Information Science, GPA: 3.8/4.0

Aug 2023 - May 2025

Gainesville, FL, USA

Experience

Software Engineer – Intersect Healthcare Systems, Remote, USA

Aug 2025 - Current

- Developed responsive **React** and **TypeScript** applications using reusable component-based architecture, delivering scalable user interfaces with secure backend integrations supporting healthcare operational workflows
- Built scalable cloud-hosted backend services using **Java**, **Spring Boot**, **REST** and **GraphQL APIs**, and **AWS** supporting healthcare platforms processing **50K+** daily clinical and operational transactions
- Developed high-throughput healthcare data-ingestion services to validate, transform, and exchange **HL7** and **FHIR** clinical data through REST APIs and **Apache Kafka**, reducing data retrieval latency from **10 minutes to under 1 minute**
- Implemented secure event-driven backend services using **Apache Kafka**, REST and GraphQL APIs, OAuth 2.0 authentication, TLS-secured communications, **Claude** and **GitHub Copilot** supporting real-time healthcare workflows
- Deployed backend services using **Docker** and **Amazon EKS**, implementing **GitHub Actions CI/CD** pipelines and **Amazon CloudWatch** monitoring to improve release reliability and reduce deployment turnaround time by **60%**

Software Engineer - State Street Corporation, Hyderabad, Telangana, India

Jun 2022 - Jul 2023

- Built reusable **React.js** and **TypeScript** components with REST API integrations, improving frontend performance, maintainability, and responsiveness across enterprise applications
- Developed backend enterprise applications using **Java**, **Spring Boot**, **SQL**, and distributed backend services supporting operational systems used by **1,500+** users
- Designed REST APIs supporting frontend applications, participated in API design discussions, and optimized backend services to improve scalability and user experience
- Optimized **PostgreSQL** stored procedures, joins and backend processing workflows reducing average operational request processing time from **2.3 seconds to 0.1 seconds**
- Deployed containerized backend services on **AWS (EC2, S3, IAM)** and automated CI/CD workflows with **Docker** and **GitHub Actions**, reducing release turnaround time by **30%** and improving operational reliability.

Software Engineer - Nichebit Softech, Hyderabad, Telangana, India

Jan 2021 - May 2022

- Developed enterprise web applications using **React**, **Kotlin**, **Spring Boot**, **PostgreSQL**, and **REST APIs**, enabling business users to manage operational workflows and reducing manual processing effort across internal systems
- Designed and implemented reusable backend services and microservice components using **Kotlin** and **Spring Boot**, improving system interoperability and reducing duplicate workflow execution by **30%**
- Built responsive **React** applications using reusable UI components, **HTML5**, **CSS3**, and **TypeScript**, while improving accessibility, usability, and frontend performance
- Containerized applications using **Docker** and automated build, test, and deployment workflows through **Jenkins**, **Git**, and **CI/CD** pipelines, reducing manual deployment effort by **50%**
- Collaborated with product managers, designers, and backend engineers to design frontend features, review code, troubleshoot production issues, and deliver scalable user experiences in **Agile** sprints

Skills

Languages : Java, Kotlin, Python, SQL, Go, JavaScript, TypeScript

Frontend: React, HTML5, CSS3, JavaScript, TypeScript

Backend & Security : Java, Kotlin, Spring Boot, REST APIs, GraphQL, Apache Kafka, OAuth 2.0, SSL/TLS, IAM

Cloud & DevOps : AWS (EC2, EKS, IAM, CloudWatch, S3), Azure, Kubernetes, Docker, Jenkins, GitHub Actions, CI/CD

Databases : PostgreSQL, MySQL, MongoDB, Oracle SQL

Tools & Platforms : Git, RSpec, JUnit, Swagger, Postman, Jira, Agile/Scrum, IntelliJ IDEA, Claude, GitHub Copilot

Projects

Sportify | *React, Go, PostgreSQL*

- Developed a full-stack event management platform using React, Go, PostgreSQL, Claude, OAuth 2.0, and JWT, implementing secure authentication, RBAC, and REST APIs to support dynamic event workflows and user interactions

AI Personal Trainer | *Python, Flask, OpenCV*

- Developed a real-time AI-powered posture analysis platform using Python, OpenCV, Flask and MediaPipe supporting live motion tracking, automated feedback generation, and interactive fitness monitoring workflows
