Professional Summary

Workday Techno-Functional Consultant with 4+ years of experience leading enterprise implementations across **HCM, Payroll, Financials, Integrations, Extend, and PRISM Analytics**. Expertise in designing scalable, audit-compliant solutions across healthcare, financial service domains. Strong in **Workday integrations** (Studio, EIB, APIs), **Extend application development, payroll-to-GL architecture**, and enterprise analytics.

Technical Skills

Workday Modules: HCM, Payroll, Benefits, Compensation, Absence, Time Tracking, Financials, Procurement
Integrations: Workday Studio, EIB, PECL, PICO, REST/SOAP APIs, Cloud Connect
Extend & Automation: Object Modeling, Orchestration Framework, PMD Scripting
Reporting & Analytics: PRISM, Advanced Reports, BIRT, Dashboards
Finance Expertise: FDM, GL, Expense, Payroll-to-GL, Reconciliation
Tools & Tech: XML, JSON, XSLT, SQL, Jira
Security & Governance: RBAC, Domain Security, SOX/HIPAA Compliance

PROFESSIONAL EXPERIENCE

Senior Workday Techno-Functional Consultant

Meta – Denver, CO | June 2024 – Present

- Led enterprise-wide **HCM and Payroll** transformation initiatives, redesigning workforce lifecycle processes and governance models to support over 40K employees across multiple business units.
- **Delivered scalable solutions** aligned with business policies, ensuring compliance, operational efficiency, and improved workforce visibility.
- Designed scalable **integration architectures** and selected appropriate patterns (Studio, EIB, APIs) based on business requirements
- Designed and implemented end-to-end Workday integrations using **Studio, EIB, PECL, and REST/SOAP APIs** across **HCM, Payroll, and Finance systems**.
- Ensured seamless data flow, high performance, and secure communication between **Workday and external enterprise applications**.
- **Developed Workday Extend applications** leveraging object modeling, **orchestration framework**, and event-driven architecture for approvals and automation.
- **Integrated Extend apps** with **Workday web services** and APIs to enable real-time processing, audit tracking, and workflow optimization.
- Architected **payroll-to-GL** and intercompany accounting frameworks to ensure accurate financial postings and multi-entity reconciliation. Supported **compliance with GAAP** standards while enabling automated financial reporting and audit readiness.
- Configured **Workday Financials modules** including General Ledger, Expense, and Banking & Settlement to support enterprise accounting operations. **Designed financial processes** ensuring proper cost allocation, reconciliation, and compliance with internal and regulatory standards.
- **Built PRISM dashboards and analytics solutions** for workforce planning, headcount forecasting, and financial variance analysis. Enabled leadership with real-time insights, improving decision-making and operational transparency across departments.
- **Led payroll implementation** including pay groups, earnings, deductions, tax setup, and retro calculations across multi-state environments. Ensured compliance with federal and state regulations while supporting complex workforce structures and payroll scenarios.
- **Managed integration lifecycle** including monitoring, troubleshooting, and performance optimization to reduce failures by 30%. Implemented proactive alerting and root-cause analysis processes to improve system reliability and SLA adherence.
- **Directed UAT, regression testing, and release validation** across HR, Payroll, and Finance modules for bi-annual Workday updates. Collaborated with stakeholders to ensure smooth deployments, minimal disruptions, and

successful system enhancements.

Workday Integration & Financials Consultant

Capital One – McLean, VA | Dec 2023 – May 2024

- **Designed payroll-to-GL** reconciliation frameworks including costing allocations, suspense account handling, and intercompany transactions. Ensured **accurate financial reporting** and alignment between payroll processing and accounting systems in a regulated environment.
- Configured **Financial Data Model (FDM)** including worktags, cost centers, and hierarchies to support enterprise financial reporting. Enabled **scalable accounting** structures aligned with business processes and compliance requirements.
- **Built PRISM dashboards for expense tracking**, variance analysis, and compliance monitoring across finance operations. Delivered actionable insights to leadership, improving visibility into financial performance and operational metrics.
- **Developed Extend-based** workflows for expense approvals, exception handling, and capital expenditure processes. **Automated compliance-driven** processes with real-time notifications and approval routing aligned with SOX requirements.
- **Led integration architecture using Workday Studio, PECL, and APIs** to connect payroll, benefits, and finance systems. Ensured secure, scalable, and high-performance integrations supporting enterprise data flows.
- **Supported financial close cycles** including journal validation, reconciliation, and reporting for accounting teams. Improved accuracy and efficiency of month-end processes through automation and structured workflows.
- Conducted performance tuning of **integrations handling high-volume data** for 40K+ employees across systems. Reduced recurring errors and improved processing efficiency through optimization and monitoring strategies.
- **Led UAT and integration testing across Finance and Payroll modules**, ensuring seamless system changes and deployments. Coordinated with cross-functional teams to resolve defects and validate system behavior.

Workday Functional & Integration Consultant

Summit Pacific Oct 2021 – July 2023

- Developed secure and compliant integrations using **Workday Studio and Cloud Connect for payroll, benefits**, and third-party vendors. Ensured data encryption, validation, and error handling aligned with **HIPAA, SOX, and regulatory requirements**.
- **Configured Benefits, Absence, Time Tracking, and Compensation modules** with complex eligibility, accrual, and compliance rules. Supported diverse workforce scenarios including healthcare staff, retail employees.
- **Designed and implemented Workday Extend applications** for compliance tracking, credential management, and approval workflows. Automated business processes with dynamic routing, validations, and audit-ready documentation.
- **Integrated Workday with external systems** including **Cigna, Prudential, Greenhouse, and DocuSign** for recruiting and benefits workflows. Improved process efficiency and reduced manual effort through seamless system connectivity.
- **Built recruiting workflows** and onboarding automation solutions including background checks and offer processing integrations. Enhanced candidate experience and reduced processing time through automation and system integration.
- **Configured payroll integrations (PECL/PICOF)** and labor compliance processes for accurate payroll data transmission. Ensured compliance with labor laws and minimized errors in payroll processing.
- **Implemented grants management, payroll costing allocations**, and funding-based financial tracking for academic environments. Supported compliance with funding regulations and accurate financial reporting for research operations.
- **Developed advanced and composite reports** for workforce analytics, absenteeism tracking, and compliance monitoring. Enabled **HR and Finance teams** to make data-driven decisions using real-time insights.
- **Supported tenant migrations, UAT cycles, and release management** activities across Workday modules. Ensured system stability and successful deployment of enhancements across multiple environments.

EDUCATION

Master's in Information Technology – University of Cincinnati
Bachelor's in Computer Science – IIIT RGUKT
