

Sravan Reddy Odiseri

Senior System Engineer

✉ sravanreddyosr@gmail.com ☎ 6027722828 🌐 <https://www.linkedin.com/in/sravan2020/>

Profile

Senior System Administrator with **5+ years of hands on experience** supporting enterprise-level infrastructure across **financial, healthcare, and technology clients**, including TD Bank, UnitedHealth Group, and Dell Technologies. Skilled in **AWS cloud operations, system administration, network engineering, automation (Terraform/Jenkins/GitHub), system security**, and high-availability infrastructure. Known for improving uptime, enhancing infrastructure stability, strengthening security posture, and collaborating with cross-functional engineering, security, and product teams. Strong ability to work independently in remote environments and deliver reliable, scalable IT solutions.

Technical Experience

Cloud & Infrastructure

AWS (EC2, VPC, S3, IAM, CloudWatch), Terraform, Jenkins, VMware, Linux (RHEL/Ubuntu), Windows Server

Systems & Security

Active Directory, Group Policy, IAM, Patch Management, Vulnerability Remediation, Encryption Standards, PCI/HIPAA Compliance

Networking

Cisco Routers/Switches, VPN (IPsec/SSL), VLANs, Routing, Firewalls, Load Balancers, Hybrid On-Prem/Cloud Networking

Monitoring & Tools

Datadog, SolarWinds, Nagios, Grafana, Splunk, GitHub, Jira, ServiceNow, Veeam Backup

Scripting

PowerShell, Bash, Shell Automation

PROFESSIONAL EXPERIENCE

Senior System Administrator

05/2024 – Present

TD Bank

- Manage and support **AWS cloud infrastructure** (EC2, VPC, IAM, RDS, S3) powering financial/payment systems with **99.9% availability**.
- Automated environment provisioning using **Terraform** and AWS Systems Manager, reducing manual work and deployment effort by **60%**.
- Strengthen security posture through **regular patching, hardening**, MFA enforcement, and vulnerability remediation across Linux and Windows systems.
- Built monitoring dashboards in **Datadog + CloudWatch**, decreasing incident detection time and improving response efficiency.
- Collaborate with engineering, product, and security teams to plan infrastructure upgrades aligned with compliance standards (PCI-DSS).
- Led DR validation and backup recovery workflows using AWS native tooling and Veeam.

Network Engineer

07/2022 – 04/2024

United Healthcare (Optum)

- Supported enterprise network operations across 10+ regions, ensuring stable routing, VPN access, and secure connectivity for 1,000+ users.
- Configured and troubleshooted **Cisco routers/switches, VLANs, routing protocols, firewall ACLs** for clinical/operational environments.
- Performed packet analysis, latency investigations, and root-cause troubleshooting with **SolarWinds, Wireshark, Splunk**.
- Assisted cloud teams with hybrid networking between **on-prem infrastructure and AWS/Azure**, improving cross-system connectivity.
- Implemented segmentation strategies and updated access rules to ensure HIPAA-compliance and reduce attack surface.
- Developed standardized documentation and diagrams, improving team onboarding and cross-team collaboration efficiency.

System Administrator

01/2020 – 10/2021

Dell Technologies

- Supported Windows/Linux systems, performing patching, monitoring, backups, and user identity management for 300+ users.
- Managed **Active Directory** (provisioning, GPOs, secure access), improving onboarding/offboarding time and reducing permission issues.
- Administered and optimized VMware environments, lowering hardware usage and improving system resource efficiency.
- Created **PowerShell/Bash automation scripts** to streamline repetitive tasks such as user setup, log cleanup, and system checks.
- Investigated and resolved escalated systems and storage issues, reducing ticket volume and improving SLA compliance.
- Authored SOPs, runbooks, and troubleshooting guides used across support teams.

ACADEMIC PROJECTS

Enterprise Multi-Vendor Network Design

- Designed advanced topologies integrating Cisco, Juniper, SonicWall, and CheckPoint devices. Configured routing (EIGRP, OSPF, BGP), ACLs, NAT, STP, and VPN tunnels to support secure, high-performance connectivity.

Voice Infrastructure Deployment

- Implemented CUCM clusters, Unity voicemail routing, UCCX call flows, dial plans, SIP trunking, and voice gateway survivability for distributed call-center environments.

EDUCATION

Masters in Computer Science

01/2022 – 07/2023 | Angola, IN, USA

Trine University

Bachelors in Computer Science

07/2017 – 05/2021 | Chennai, TN, India

Bharath University
