

SREE RAGA LAHARI

lahariguttikonda26@gmail.com | www.linkedin.com/in/sree-raga-lahari/ | +1 (716) 533-1061 | New York

EDUCATION

University at Buffalo, The State University of New York

Buffalo, New York

Engineering science DataScience Master's **CGPA- 3.5/4.0**

Aug 2022 – Dec 2023

Relevant Coursework: Machine Learning, probability , algorithm analysis,statistical data mining, Database Management Systems, Programming Fundamentals, Intro to Machine Learning, data structures and algorithms

Manipal University

Sikkim, India

Bachelor of Technology in Electronics and Communication Engineering **CGPA - 8.4/10**

Jul 2018 – May 2022

TECHNICAL SKILLS

Languages and Web Technologies: Python, R , C, SQL, HTML, CSS.

Data Base and Frameworks: SQL, SQLite,NoSQL.

Deep Learning: Convolutional Neural Networks, OpenCV, PyTorch, Tensorflow.

Machine Learning Libraries: Pandas, NumPy, Sci-Kit learn, Matplotlib, Seaborn.

Developer and BI tools:Power BI, Tableau, Hadoop, Excel,Kafka.

Cloud Services :AWS, Azure(Databricks,Data Flows,Delta Lake.

EXPERIENCE

Data Science Intern, Li-Mat Soft Solutions Pvt Ltd, Bengaluru , India

Oct 2021 - Mar 2022

- Spearheaded the utilization of Python, Pandas, and Scikit-Learn to implement advanced data preprocessing and feature engineering techniques, and feature scaling, resulting in a 50% improvement in quality and model accuracy.
- Developed and fine-tuned Python, Scikit-Learn, and TensorFlow models to optimize performance and accuracy. Successfully deployed a predictive churn model,resulting in heightened revenue and strengthened customer loyalty.
- Enhanced business intelligence through advanced statistical analysis using Python, SciPy, and Statsmodels, resulting in optimized parameter estimates and insights that led to increase in conversion rates.
- Leveraged SQL expertise to optimize database performance by identifying and resolving bottlenecks, resulting in a 30% reduction in query execution time and improved overall system efficiency.

PROJECTS

Formula 1 Data Analysis with Azure Databricks | PySpark, Spark SQL, Delta Lake, Azure Data Factory, Power BI

- Designed and implemented end-to-end data pipeline: Utilized Azure Databricks and PySpark process raw F1 data, enabling actionable insights.
- Managed data refresh and incremental loads: Employed Delta Lake for full refresh/incremental load patterns, ensuring efficient data processing and storage optimization.

BrainTumor Detection using CNN | Python,TensorFlow

- Initiated and led a cutting-edge project focused on Brain Tumor Detection, utilizing advanced Convolutional Neural Networks (CNN); built and fine-tuned highly accurate CNN models, enabling precise classification of brain tumor images with an impressive accuracy rate of 97%.
- Evaluated model outcomes using precision, recall, and F1-score metrics, contributing to a 15% increase in early and accurate brain tumor identification, leading to higher success rates in treatment plans and improved patient outcomes.

Crime data analysis in Buffalo city | Python

- Performed comprehensive analysis of Buffalo's crime data, unveiling 10+ insights such as crime types, neighborhood trends, and weapon usage.
- Visualized findings in Tableau for intuitive comprehension. Built a high-accuracy 90% Random Forest model to classify crime risk .Employed advanced analytics to structure data, created interactive dashboards, and utilized predictive analytics for future crime trends. Adeptly combined data expertise and storytelling for impactful results.

Article Summarization and Sentiment Analysis | Python,Tinkter

- Emulated precise Article Summarization and Sentiment Analysis project using Python, and NLP techniques.
- Employed Tkinter to design an intuitive and responsive Graphical User Interface (GUI), streamlining user interactions and enhancing overall user experience; contributed to a 20% decrease in customer support tickets and a 15% improvement in customer retention.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Azure Databricks Spark For Data Engineers (PySpark / SQL)
