SUMMARY

Results-driven Full Stack Engineer with 4+ years of experience designing and delivering enterprise applications using Java, Spring Boot, and microservices. Proficient in front-end development with React and modern CI/CD practices with Jenkins and Docker. Demonstrated expertise in containerized deployments using Kubernetes and Openshift with secure, scalable cloud-native solutions. Committed to resolving complex challenges through innovative, agile technology implementations.

EDUCATION

University of Central Missouri

Jan 2023 - Dec 2024

Master of Science, Computer Science

- **GPA:** 3.8/4

- **Coursework:** Data Structures and Algorithms, Operating Systems, Database Systems, Software Engineering, System Design

PROFESSIONAL EXPERIENCE

TCS

Feb 2025 - Present

Software Developer

Dallas, Texas

- Developed and maintained microservices using Java, Spring Boot, and AWS Lambda, reducing backend response time by 35%.
- Designed and implemented RESTful APIs integrated with React.js and TypeScript frontends, enhancing user experience and improving task completion efficiency by 25%.
- Optimized frontend performance through lazy loading, code splitting, and state management improvements using Redux Toolkit.
- Managed containerized deployments on AWS ECS and monitored application health via CloudWatch, maintaining 99.95% uptime.
- Implemented secure, scalable authentication using JWT and Spring Security to strengthen application access control.
- Collaborated with cross-functional teams using Agile methodologies to deliver features and resolve production issues, enhancing system reliability and user satisfaction.

Capgemini

Jun 2021 - Dec 2022

Senior Software Engineer

- Developed scalable REST APIs and microservices using Java, Spring Boot, and Spring Security, improving transaction handling efficiency and modularity.
- Built modern web applications using React.js and Node.js, reducing frontend latency by 30% and increasing user engagement by 20%.
- Led containerized deployments with Docker on AWS ECS, achieving 99.9% uptime and streamlining release cycles to cut deployment time by 40%.
- Designed and maintained CI/CD pipelines using GitLab and Jenkins to automate deployments across Dev, QA, and Production environments, ensuring faster, more reliable releases.
- Implemented Kafka-based distributed messaging to enhance event processing capacity and improve system scalability.
- Mentored junior developers on best practices in clean coding, API design, and test-driven development, bolstering team code quality.
- Monitored system performance using AWS CloudWatch and SQS, reducing incident response time by 60% and enhancing overall system resilience.

Capgemini

Jan 2020 - May 2021

Software Engineer

- Developed and tested RESTful APIs using Spring Boot, Postman, and JUnit, ensuring high test coverage and reducing bugs significantly.
- Implemented Spring Cloud Gateway for centralized authentication and routing, reducing security risks and improving response times.
- Migrated legacy monolithic backend to microservices architecture, increasing system throughput by 20% and maintainability.
- Built frontend interfaces using Angular and JavaScript integrated with backend APIs, improving usability and client satisfaction.
- Integrated encryption and role-based access using Spring Security and AWS to build a secure cloud-based data-sharing platform compliant with data protection standards.
- Actively participated in Agile Scrum ceremonies, contributing to planning, demos, and retrospectives that increased sprint velocity by 15%.

ACADEMIC PROJECTS

Secure Web-Based Medical Portal - Java, Spring Boot, PostgreSQL, HTML/CSS

Academic

- Built a secure platform enabling encrypted data sharing between doctors and patients with role-based access.
- Implemented backend APIs with Spring Boot and PostgreSQL, and integrated frontend forms using HTML/CSS.

Real-Time Stock Market Dashboard – React.js, Spring Boot, WebSocket, MongoDB

Academic

- Developed a responsive dashboard to visualize real-time stock prices using WebSockets and RESTful APIs..
- Backend powered by Spring Boot and MongoDB to store and retrieve historical trends.
- Implemented dynamic UI in React.js with live chart updates and search functionality.

SKILLS

- **Languages & Frameworks:** Java, JavaScript, Python, TypeScript, HTML, CSS, React.js, Angular, Node.js, Express
- **Backend & Cloud:** Spring Boot, Spring Security, REST APIs, Microservices, AWS (EC2, ECS, S3, Lambda, CDK), Azure, Cloud Providers
- **DevOps & Tools:** Docker, Kubernetes, Git, GitHub, GitLab, Jenkins, Postman, Maven, JIRA, CloudWatch
- **Databases:** PostgreSQL, Oracle, MySQL, MongoDB, SQL Server, NoSQL
- **Testing & QA:** JUnit, TDD/BDD, CI/CD pipelines, Agile (Scrum, SAFe)
- **Tools & Technologies:** Git, GitHub, GitLab, Jenkins, Docker, Kubernetes, JIRA, Postman, Maven, CloudWatch, Visual Studio Code, IntelliJ

CERTIFICATION

- **AWS Certified Solutions Architect:**ASSOCIATE
- **AWS Certified Cloud Practitioner:**FOUNDATIONAL
