## SUMMARY

Data Analyst specialized in transforming data into actionable insights with proficiency in data modeling, warehousing, and use of business intelligence solutions such as Tableau, Power BI, and Smartsheet. Demonstrated ability to develop interactive dashboards and machine learning models aimed at improving decision-making processes and optimizing operational workflows. Leveraged expertise in SQL, Python, and AWS to construct robust data pipelines for data analysis and automate complex processes, driving improved data management and reporting accuracy. Committed to applying comprehensive analytical skills and vast experience to support strategic goals and contribute significantly to data-driven understandings and organizational success.

## Technical Skill

- **Programming & Scripting:** SQL, PL/SQL, Python, R, Shell Scripting
- **Data Visualization & BI Tools:** Tableau, Power BI, Smartsheet, MS Excel
- **ETL & Data Pipelines:** SSIS, Azure Data Factory (ADF), Python (Pandas, NumPy, SciPy), Boto3 (AWS)
- **Databases & Data Warehousing:** SQL Server, Amazon Redshift, PostgreSQL, MySQL, Oracle, MS Azure SQL DB (PaaS), Microsoft Access
- **Cloud & Big Data:** AWS (Redshift, Boto3), Azure Databricks
- **Machine Learning & Analytics:** Python ML libraries (scikit-learn, Pandas), Trend Prediction, Operational Modeling
- **Reporting & Dashboarding:** Tableau Desktop/Server/Online, Power BI (DAX, Power Query), Smartsheet Reports
- **Tools & Platforms:** ServiceNow, Excel, Azure Cloud Services

## WORK EXPERIENCE

### Client - EPC Group

Jun 2024 - Present

#### Data Analyst

- Developed interactive Tableau dashboards using data from AWS Redshift, Oracle, Smartsheet, and Excel to track operational KPIs, labor planning, and safety compliance.
- Developed mappings using Source Qualifier, Expression, Filter, Lookup, Update Strategy, Sorter, Joiner, Normalizer, and Router transformations, improving data processing efficiency
- Built machine learning models with Python to predict trends and support performance tracking.
- Collaborated with offshore teams to handle report updates, production support, and change requests using ServiceNow.
- Created a data dictionary, data mapping for ETL and application support, DFD, ERD, mapping documents, metadata, DDL, and DML as required, facilitating better data management and understanding
- Developed Python scripts to connect SQL Server & SSAS cubes for processing large data sets, data analysis, and extracting data for data visualization.
- Developed various dashboards by creating different chart types, including pie charts, bar charts, tree maps, circle views, line charts, area charts, and scatter plots in Power BI.
- Designed visualizations using Tableau software and published and presented dashboards on web and desktop platforms, facilitating better data insights and communication
- Involved in analysis, design, and documenting business requirements and data specifications. Supported data warehousing extraction programs, end-user reports, and queries.

### Client - Kearney

Aug 2021 - Dec 2023

#### Jr. Data Analyst

- Understood business requirements to create problem statements, gathered and validated data using Excel, and developed reports and dashboards in Excel and Tableau, enhancing data-driven decision-making
- Created and migrated Power BI reports for HVAC equipment data, connecting multiple sources like Azure Databricks, Oracle, and SQL Server.
- Supported report migration from legacy systems to Azure cloud, improving reporting efficiency and accuracy.
- Used Power Query and DAX to clean, shape, and visualize data in a way that helped teams better understand their operations.
- Utilized Power BI reports and dashboards by connecting different data sources like Azure Databricks, Oracle General Ledger, SQL Server, Excel, and text format files.
- Wrote Python scripts to handle large datasets and automate data extractions for reporting, improving data processing efficiency and accuracy

## Education Details

### University of Maryland, Baltimore County

2024

Master's, Information Systems

### SR University, Telangana India

2022

Bachelor's, Computer Science
