---

### **Professional Summary:**

- Data Engineer with 5 years of experience designing and delivering scalable data solutions across cloud and enterprise platforms, with a strong focus on AWS-native architectures, Snowflake, dbt, ELT pipelines, data modeling, and cloud data warehousing.
- Extensive experience designing mapping-driven ETL/ELT workflows, data transformation logic, and workflow orchestration across multiple platforms Talend, Apache NiFi, AWS Glue, dbt core competencies directly transferable to enterprise ETL tools including Informatica PowerCenter/IICS.
- Proven ability to rapidly ramp up on new ETL/integration platforms, having worked across five+ distinct data integration tools (Talend, NiFi, Glue, dbt, Kafka) in production environments spanning healthcare, financial services, and consumer tech.
- Designed and scaled ETL/ELT pipelines and Lakehouse/Medallion architectures (Bronze-Silver-Gold), leveraging PySpark and SQL to optimize large-scale data processing and reduce latency.
- Deep expertise in streaming and batch ingestion technologies including Apache Flink, Kafka, and Apache NiFi-based tools.
- Hands-on experience in healthcare and financial domains with strong data governance practices including PII/PHI masking and compliance with HIPAA, CCPA, and SOX.
- Proficient in Python, PySpark, and advanced SQL for complex query development, performance tuning, data transformation, and debugging across large-scale datasets, with strong experience using Git-based version control.
- Exposure to multiple data platforms including MySQL, Hive, MongoDB, ClickHouse, Hadoop, Redis, Apache HBase, and Elasticsearch for data processing and validation.
- Strong experience in data quality validation, reconciliation, and ensuring accuracy of analytical datasets using frameworks and custom checks.
- Skilled in CI/CD automation and cloud deployment practices using GitHub Actions, Terraform, and AWS DevOps tooling.
- Effective collaborator in Agile environments, contributing to sprint planning, production support, code reviews, and cross-functional coordination.
- Strong analytical and problem-solving abilities with a focus on delivering reliable, production-ready data solutions that support business decision-making.

### **Professional Experience:**

**Truist Financial - Remote**

**Mar 2025 – Present**

**Data Engineer**

**Project: Real-Time Financial Transaction Analytics Platform**

**Richmond, VA.**

- Built a real-time streaming pipeline using AWS Kinesis Data Streams and Apache Flink to process financial transactions from multiple source systems, supporting fraud detection and regulatory reporting at scale.
- Designed and built dbt models from scratch in Snowflake to transform Gold-layer transaction data, supporting fraud analytics and regulatory reporting consumed by downstream BI teams.
- Developed scalable ELT workflows and dimensional data models in Snowflake using dbt, improving data consistency and enabling self-service analytics for business users.
- Contributed to a Bronze/Silver/Gold Medallion Lakehouse on AWS S3 using Apache Iceberg, supporting scalable ingestion and schema evolution for high-volume transaction data.
- Improved PySpark batch reconciliation jobs on AWS Glue by tuning partitioning strategy and join logic, reducing average job runtime and infrastructure cost.
- Implemented Delta Lake tables for analytics workloads, enabling time-travel for compliance checks and data recovery scenarios.
- Set up CI/CD pipelines using GitHub Actions and Terraform to automate deployments across dev and production environments on AWS, reducing manual deployment steps.
- Implemented PII masking and tokenization in Python integrated with AWS Glue Data Catalog and Lake Formation for data governance, supporting CCPA and SOX compliance requirements.
- Published curated Gold-layer datasets into Snowflake for Power BI reporting consumed by business and compliance stakeholders.
- Partnered with Marketing Analytics team to deliver Gold-layer datasets supporting campaign attribution and customer segmentation reporting
- Configured AWS CloudWatch alerts and Log Insights dashboards to detect pipeline failures and support 24x7 operational monitoring.
- Worked with compliance and risk teams to translate reporting requirements into Snowflake data models and Gold-layer schemas.

**Tools:** Python, PySpark, SQL, dbt, Snowflake, Apache Flink, AWS Kinesis, AWS Glue, Delta Lake, AWS S3, AWS Lambda, AWS CloudWatch, Lake Formation, Terraform, GitHub Actions, Agile/Jira

**Elevance Health (formerly Anthem) – Hybrid**

**Mar 2024 – Feb 2025**

**Data Engineer**

**Project: Member Claims Data Warehouse Modernization**

- Built AWS Glue and Apache NiFi pipelines to ingest daily insurance claims (EDI X12) and EHR data (HL7 FHIR) into S3-based data lake, processing over 100K records per day with consistent pipeline reliability.
- Designed healthcare-focused analytical data models supporting claims, member, provider, and clinical reporting requirements using Snowflake and dbt.
- Developed PySpark transformation jobs on AWS EMR to clean and standardize claims and patient data across Bronze and Silver Medallion layers using Delta Lake, reducing downstream data errors.
- Implemented PHI masking logic in Python to de-identify sensitive fields (SSN, DOB, MRN) across Silver-layer outputs, ensuring HIPAA compliance reviewed and approved by the compliance team.
- Created Snowflake SQL stored procedures and reporting views powering Power BI dashboards used by business analysts for claims and patient reporting.

- Deployed Great Expectations data quality checks at Bronze-to-Silver pipeline boundaries to catch schema drift and null violations, improving data reliability before reaching reporting layers.
- Supported UAT testing by validating pipeline outputs against business rules and documenting data quality results for stakeholder sign-off.
- Collaborated with analysts to translate claims reporting requirements into reusable dbt models in Snowflake.

**Tools:** Python, PySpark, SQL, dbt, Snowflake, Talend, AWS Glue, AWS EMR, Apache NiFi, Delta Lake, AWS S3, AWS CodeCommit, Great Expectations, Power BI, HL7 FHIR, EDI X12, Git, Agile/Jira.

**Ernst & Young (EY)**

**Nov 2021 – Nov 2023**

**Associate Consultant / Assurance Associate**

**Project: Bytedance**

**Hyderabad, India**

- Built and maintained ETL pipelines to extract, transform, and load structured and semi-structured data across MySQL, Hive, ClickHouse, MongoDB, and Elasticsearch for a high-traffic consumer platform.
- Implemented PII identification and masking across multiple data sources to support GDPR and regional data privacy compliance, with findings reviewed in an external audit.
- Wrote Python and Linux shell scripts to automate data extraction, validation, and reporting tasks, reducing the team's manual processing effort.
- Optimized SQL queries and Hive batch jobs on Hadoop-distributed infrastructure, improving average job completion time.
- Performed data validation and reconciliation checks to ensure consistency across source and target systems, reducing ad hoc data fix requests from downstream teams.
- Worked closely with senior engineers and cross-functional stakeholders to translate data requirements into pipeline specifications and technical tasks.

**Tools:** Python, SQL, Linux, Git, MySQL, MongoDB, Hive, Hadoop, ClickHouse, Redis, Elasticsearch, Talend, AWS (foundational), Excel, Jira.

**Ernst & Young (EY)**

**May 2021 – Nov 2021**

**Data Engineering Intern**

**Hyderabad, India**

- Assisted in building and testing ETL pipelines for enterprise data projects using SQL and Python, gaining hands-on exposure to data extraction, transformation, and reconciliation workflows.
- Performed data validation and quality checks on structured datasets in MySQL and Hive, contributing to cleaner data for downstream consumers.
- Participated in Agile ceremonies and supported senior engineers in debugging pipeline issues and documenting data processes.

**Tools:** SQL, Python, Excel, MySQL, Hive, Linux, Jira

## Technical Skills:

|                                       |                                                                                                               |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Languages</b>                      | Python, SQL, Linux scripting                                                                                  |
| <b>Big Data &amp; Processing</b>      | PySpark, Apache Spark, Apache Flink, Hadoop, Hive                                                             |
| <b>Cloud &amp; Big Data</b>           | AWS Glue, AWS EMR, AWS S3, AWS Kinesis, AWS Lambda, AWS CloudWatch, Lake Formation                            |
| <b>Data Engineering</b>               | ETL/ELT pipelines, dbt, Snowflake, Delta Lake, workflow orchestration, Informatica                            |
| <b>Databases</b>                      | MySQL, MongoDB, ClickHouse, Redis, Apache HBase, Elasticsearch                                                |
| <b>Data Governance &amp; Security</b> | PII/PHI masking, data privacy (HIPAA, CCPA, SOX), AWS Lake Formation, data governance, data security controls |
| <b>CI/CD &amp; DevOps</b>             | Git, GitHub Actions, Terraform                                                                                |
| <b>Data Quality</b>                   | Great Expectations, data validation frameworks                                                                |
| <b>BI &amp; Reporting</b>             | Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, Power Query)                                                |
| <b>Methodologies</b>                  | Agile (Scrum), Waterfall, Jira                                                                                |

## Education Qualifications:

**Degree:** Bachelor of Technology (B.Tech)

**Field of Study:** Information Technology

**College:** Malla Reddy Engineering College and Management Sciences

**Location:** Hyderabad, Telangana

**Year of Graduation:** 2021
