

Steve Dang

HRIS & People Analytics Analyst
408.768.0375 | dangstevework@gmail.com

PROFESSIONAL SUMMARY

HRIS and People Analytics Analyst with experience across Workday HCM, Total Rewards, reporting, data automation, and cross-functional People Operations support. Skilled in optimizing HR processes, designing scalable system workflows, building dashboards, and improving data quality. Strong hands-on technical ability with SQL, Python, Google Apps Script, Tableau, and advanced Excel. Experience supporting full-cycle HRIS improvements, integrations, Open Enrollment, and analytics initiatives that enhance employee experience and operational efficiency.

SKILLS

HRIS Systems: Workday HCM, Benefits, Compensation, Talent, Reporting, EIB, Calculated Fields, Business Processes, Security

Tools: SQL, Python, Google Apps Script, Excel (advanced), Tableau, Power BI, Google Sheets Dashboards

Integrations: Vendor feeds, benefits eligibility files, attendance/HR data sync, API-based workflows

People Ops: Open Enrollment, onboarding, offboarding, audit & compliance, process documentation

Other: Data modeling, automation, dashboard design, quality assurance, project coordination

PROFESSIONAL EXPERIENCE

People Technology Analyst (Workday)

Okta - San Francisco | June 2025 – September 2025

- Supported Workday HCM, Total Rewards, and Reporting functions by maintaining BPs, running EIB loads, building advanced calculated fields, and resolving cross-functional system defects.
- Built custom reports and datasets for headcount, turnover, eligibility, and comp analysis; improved reporting reliability and removed manual touchpoints.
- Partnered with HR Ops, Payroll, IT, and Total Rewards to translate business requirements into Workday enhancements and workflows.
- Conducted regression testing and validation during Workday releases; documented defects and ensured proper deployment of fixes.
- Automated recurring HR audits using SQL and Apps Script, reducing manual reconciliation time by 60 percent.

HRIS Analyst

Businessolver - West Des Moines, Idaho | September 2021 – May 2025

- Led Open Enrollment configuration and testing cycles, partnering with carriers, Total Rewards, and internal SMEs to validate plans, eligibility rules, and payroll file accuracy.
- Built automated data workflows using Google Apps Script and Python, transforming eligibility, enrollment, and payroll files into clean datasets for vendor integrations.
- Designed dashboards in Google Sheets and Tableau to visualize key HR metrics: enrollment trends, utilization, SLA performance, and data accuracy.
- Created SQL queries to validate data integrity across HR, Payroll, and vendor systems, reducing data mapping errors during OE by 40 percent.
- Managed recurring vendor feeds (eligibility, payroll, deductions), troubleshooting errors and coordinating with carriers to resolve discrepancies.
- Authored SOPs, process flows, and integration documentation that standardized HRIS support functions across the team.
- Collaborated closely with People Ops to support onboarding, offboarding, life events, compliance requests, and employee experience initiatives.

EDUCATIONS

San Jose State University – San Jose, CA

Bachelor of Arts, 2019

PROJECTS

Workday Attendance Automation & Dashboard Project

- Scheduled recurring Workday attendance reports to automatically export and feed into Google Sheets as the single source of truth for employee attendance data.
- Wrote a Google Apps Script to clean, normalize, and update new report data on a set schedule, eliminating manual file downloads and copy-paste work.
- Built an interactive attendance dashboard in Sheets (filters, pivots, charts) so HR and managers could quickly see trends, late/absence patterns, and team-level metrics.
- Reduced manual reporting time from hours to minutes and improved data freshness and visibility for stakeholders.

Dynamic Workforce Dashboard Project

- Designed and implemented a Workday reporting dashboard (Advanced/Matrix reports + calculated fields) for managers to monitor headcount, turnover, and workforce trends in real time.
- Enhanced visibility for leadership by consolidating HR and Payroll data into a single source of truth, reducing manual tracking by 40%.
- Delivered training and documentation for business users, driving adoption across multiple departments.
