SUMMARY

Senior Full-Stack Java Engineer with 10+ years building cloud-native, scalable, high-availability platforms across healthcare, fintech, and enterprise SaaS. Expert in **Java, Spring Boot, React/TypeScript, AWS, microservices**, event-driven systems, and modern DevOps. Known for delivering ahead of schedule, improving system performance, driving architecture decisions, and mentoring teams. Hands-on contributor with strong computer-science fundamentals, API design expertise, and the ability to quickly understand complex business domains such as healthcare, pricing, and financial systems.

EDUCATION

Emory University | Atlanta, GA | 2009 - 2013

Bachelor's Degree in **Computer Science**

TECHNICAL SKILLS

- **Backend:** **Java, Spring Boot, Spring Cloud, Hibernate/JPA, REST APIs, Microservices**, Kafka, RabbitMQ, Redis
- **Frontend:** **React.js**, TypeScript, Redux Toolkit, JavaScript, Next.js, HTML5/CSS3, Tailwind, MUI
- **Cloud & DevOps:** **AWS** (ECS, EKS, Lambda, S3, SQS/SNS), Docker, Kubernetes, **GitHub Actions**, Jenkins, Terraform
- **Databases:** PostgreSQL, MySQL, **MongoDB**, Oracle, Redis
- **Testing:** JUnit, Mockito, Cypress, Selenium, Postman
- **Architecture:** Event-Driven Architecture, Distributed Systems, Domain-Driven Design, **OAuth2/JWT**, API Gateways
- **Other:** Agile/Scrum, HL7, FHIR, HIPAA Compliance, **CI/CD Pipelines**

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Marquee Staffing | Griffin, GA

Oct 2021 – Present

- Led development of an AI-driven mental-health platform using **Java (Spring Boot), React/TypeScript**, and **AWS**, supporting thousands of daily users.
- Designed and implemented **REST APIs** powering clinical dashboards, patient data workflows, scheduling, and authorization modules.
- Built cloud-native **microservices** for identity, patient records, asynchronous workflows, notifications, and EHR/FHIR integrations.
- Integrated **Kafka** for event-driven processing, reducing latency in real-time updates by 35%.

- Migrated monolith to **microservices** with **PostgreSQL + Redis**, improving scalability and cutting deployment time by 40%.
- Delivered **HIPAA**-compliant security with **Spring Security**, OAuth2.0, JWT, API encryption.
- Containerized all services using **Docker + Kubernetes** (EKS) and automated deployments via **Terraform + GitHub** Actions.
- Partnered with product, design, and clinical teams to deliver features consistently ahead of sprint commitments.

Software Engineer

Trigma | Las Vegas, NV

Oct 2016 – Sep 2021

- Developed backend **Java/Spring** systems powering large-scale learner assessment platforms (Skill IQ / Role IQ).
- Created scalable REST APIs consumed by **React/TypeScript** front-end applications.
- Built backend services supporting AI-driven recommendations and personalization workflows.
- Improved DB performance via SQL/**Hibernate** tuning, cutting query times by up to 60%.
- Implemented **CI/CD pipelines** with **AWS** CodePipeline + GitHub Actions, reducing deployment friction by 40%.
- Enhanced observability using Prometheus, Grafana, ELK, reducing MTTR significantly.
- Improved concurrency performance using **CompletableFuture**, boosting throughput during peak load.
- Mentored junior developers and guided debugging across distributed systems.

Backend Developer

CVS Health Corp | Woonsocket, RI

Jun 2013 – Sep 2016

- Participated in full SDLC for enterprise claims and healthcare applications.
- Built **Java Beans**, business layers, SOAP services, and implemented validation frameworks.
- Modernized **JSP/Struts** applications, migrating custom tags to more maintainable solutions.
- Created persistence layers using **Hibernate/JDBC** for Oracle systems.
- Configured **JMS** queues and WebLogic deployments, improving system reliability.
- Collaborated with **cross-functional** teams to gather requirements and design technical workflows.
