

Sumanth Alla

DevOps Engineer

sumanth@vinsumsoft.us | +1 (434) 213-0052 | Work Authorization: H1B

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 3 years of hands-on experience optimizing and automating software development pipelines. Proven track record in implementing CI/CD processes, managing cloud infrastructure, and improving system reliability and performance. Adept at fostering cross-functional collaboration to streamline workflows and drive operational excellence.

TECHNICAL SKILLS

Programming Skills:	Python, TypeScript, Java.
Cloud Computing:	AWS (CodePipeline, CodeBuild, CodeDeploy, CodeCommit, CloudFormation, CDK, Elastic BeanStalk, ECS, EKS, Frigate, loudWatch, IAM, CloudTrail, KMS, EC2, S3, SQS), Apache Airflow, Kafka, Microsoft Azure (Azure Kubernetes Services, Azure Active Directory, Azure Application Gateway, Azure FrontDoor, Azure DocAI, Azure Logic apps, Azure Container Instances).
Configuration Management & Infrastructure as Code:	Ansible, ARM Templates, Terraform
Databases:	SQL (SQL Server, MySQL), Amazon Redshift, NoSQL/Graph databases (DynamoDB, MongoDB), Oracle, DB2.
Operational Skills:	Agile Project management Skills, Scrum, Jira, Sprint Planning, code reviews, MS Office Suite.
Tools & Technologies:	Docker, Jenkins, Git, Nginx, Service Fabric Cluster, Virtual Machine Scale Sets (VMSS), Application Gateway, App Service Plan, Log Analytics, App Insights
Full Stack Technologies:	Spring, Hibernate, Microservices, Maven, Junit, Angular, RESTful and SOAP APIs.

WORK EXPERIENCE

**Amazon Web Services,
Software Engineer (DevOps Engineer)
Bellevue, USA**

Oct 2022 - Present

- Implemented TypeScript-based CI/CD pipelines for DevOps, saving 70% development and monitoring effort.
- Leveraged Terraform and AWS CloudFormation to design and manage scalable and secure infrastructure, ensuring consistent environment provisioning and reducing manual setup errors.
- Deployed and orchestrated microservices using Docker and Amazon ECS/EKS, enhancing application scalability and operational efficiency.
- Managed and optimized AWS services including EC2, S3, RDS, and Lambda, implementing cost-effective solutions and achieving a 60% reduction in cloud infrastructure costs.
- Applied AWS security best practices, including IAM policies, security groups, and encryption, to protect data and comply with regulatory requirements.
- Implemented robust monitoring and alerting solutions with AWS CloudWatch and Prometheus.
- Designed and tested disaster recovery plans using AWS Backup and multi-region deployments, ensuring high availability and minimal data loss.
- Designed and deployed DevOps containerized applications on Kubernetes for DevOps using Amazon EKS, ensuring efficient orchestration and scalability in a dynamic environment.
- Authored 20+ documents including System Designs, threat models, root-cause analysis, project development tracking, etc.
- Drove initiatives to improve system reliability and performance, demonstrating a commitment to Amazon's Leadership Principles such as "Customer Obsession" and "Invent and Simplify".

**Accenture,
App/Cloud Support Analyst
Hyderabad, India**

Oct 2020 – Aug 2021

- Developed and deployed PowerShell scripts for automated
- Extensive experience with Azure cloud platform administration, including deployment and management of resources using ARM templates.
- Enhanced features in Azure repos, deploying them using automated Azure Infrastructure Build processes. Utilized PowerShell ISE and Visual Studio Code for script development and debugging.
- Operated within agile delivery environments, employing Scrum and Kanban methodologies to manage and execute projects.
- Focused on optimizing Azure infrastructure utilization to reduce costs, ensuring efficient use of resources.
- Hands-on experience with Linux administration, including Nginx reverse proxy setup.
- Developed web applications using Python, with frontend using Flask framework, HTML, and CSS, and backend in Python and Ansible.

- Actively participated in resolving critical Azure issues, ensuring minimal downtime and disruption.

**Metrix Lab,
Survey Programmer Intern -
Hyderabad, India**

Aug 2020 – Oct 2020

- Played a crucial role in constructing customized forms which were useful before introducing products into market through survey and Generating reports based on information acquired from surveys which give depth analysis in the market.

EDUCATION

University at Buffalo, Master of Science, Data Science (STEM) August 2022

- Coursework: Statistical Learning, Linear Algebra, Python, Probability and Statistics, Analytics of algorithms, Data Driven Analysis, Machine Learning, Analysis of Algorithms, Data Mining Query language, and Deep Learning.
- Led innovative ARIMA cryptocurrency forecasting, showcasing advanced time-series modeling on Jupyter Notebook.
- Predicted CO2 emissions accurately using pandas, and scikit-learn in Python, applying algorithms like, random forest and KNN.
