PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience designing ETL/ELT workflows, building enterprise-scale analytical platforms, and delivering data governance and compliance solutions across Healthcare and Financial Services. Proven ability to translate complex, high-volume datasets into actionable insights using SQL, Python, and visualization tools (Power BI, Tableau). Proficient in cloud data platforms (AWS, Azure, Snowflake), real-time streaming (Apache Kafka, Spark), workflow orchestration (Airflow, dbt), and AI/ML integrations (LangChain, TensorFlow, PyTorch) with a consistent record of improving data reliability, pipeline performance, and analytical accessibility at enterprise scale.

TECHNICAL SKILLS

Core Data Analytics: SQL (CTEs, Window Functions, Aggregations, Query Optimization), Python (pandas, NumPy, PySpark), R, Bash
ETL/ELT & Orchestration: Apache Airflow, dbt, Apache Kafka, Apache Spark, Apache NiFi, Apache Flink, CDC, Event-Driven Architecture, Schema Evolution
Cloud & Data Platforms: AWS (S3, Glue, Redshift, Athena, Lambda, Kinesis), Azure (ADF, ADLS, Databricks), Snowflake, Databricks, Delta Lake, Hadoop, Hive
Data Governance & Quality: Data Lineage Tracking, Data Observability, Data Quality Monitoring, RBAC, HIPAA Compliance, Data Masking, IAM, Audit Trails
Databases & Modeling: PostgreSQL, MySQL, MongoDB, Cassandra, DynamoDB, Redis — Star & Snowflake Schema, Enterprise Data Warehousing, Distributed Data Systems
Visualization & DevOps: Power BI, Tableau, Amazon QuickSight, Excel (Advanced) , Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD
AI / ML Engineering: LangChain, RAG, TensorFlow, PyTorch, MLflow, BERT, T5, Llama, AI/ML Workflow Integration

PROFESSIONAL EXPERIENCE

CVS Health | Data Engineer

May 2024 – Present · United States

- Architected ELT/ETL pipelines to ingest and transform 50M+ healthcare records (patient data, lab reports, billing) into AWS S3 and Redshift data lake improving data availability for clinical analytics by 25% and reducing processing latency across enterprise reporting workflows.
- Implemented real-time data streaming pipelines using Apache Kafka and Spark to process 100K+ healthcare events/hour, enabling event-driven analytics for patient notifications, billing triggers, and care coordination workflows.
- Established data governance and compliance controls via OAuth2, JWT, and RBAC for HIPAA-compliant PHI access management reducing unauthorized data access incidents by 40% and achieving clean results across two consecutive compliance audits.
- Delivered data quality monitoring and lineage tracking across multi-source ingestion pipelines, ensuring schema evolution compatibility and full audit trails for enterprise data reliability and governance standards.
- Optimized distributed AWS data infrastructure (S3, EC2, RDS, Lambda, CloudWatch) cutting infrastructure costs by 20% through right-sizing and lifecycle policies while sustaining 99.9% uptime on all production pipelines.
- Automated pipeline deployments via CI/CD workflows (Jenkins, GitHub Actions) and containerized data services with Docker and Kubernetes reducing release cycles by 50% and eliminating manual deployment errors.
- Collaborated with cross-functional engineering and business teams to translate data requirements into analytical datasets and reporting solutions, directly supporting AI/ML application workloads and executive dashboards.

Hexaware Technologies | Data Analyst

May 2021 – Jul 2023 · India

- Analyzed 3M+ financial transaction records annually using SQL and Python to identify trends, anomalies, and operational inefficiencies delivering actionable insights to risk management and compliance stakeholders across 4 business units.
- Developed SQL data models (CTEs, window functions, joins) and automated ETL workflows integrating 8+ source systems, improving data availability and reducing report preparation time by 40% for analytics and reporting teams.
- Optimized 15TB+ PostgreSQL datasets using indexing, partitioning, and query tuning reducing financial report generation time from 15 minutes to under 4 minutes and enabling self-serve analytical access for business stakeholders.
- Built Python-based data validation and quality monitoring framework with automated reconciliation checks reducing data inconsistencies by 35% and strengthening data accuracy for downstream compliance reporting.
- Designed interactive Power BI and Tableau dashboards visualizing transaction volumes, trade alerts, and KPIs translating complex datasets into clear, decision-ready insights for senior leadership and compliance teams.
- Performed data governance activities including data lineage documentation, access controls, and quality validation to ensure accuracy, security, and regulatory compliance of financial analytical datasets.

PERSONAL PROJECTS

Cloud Data Lake Analytics Platform · AWS S3 · Glue · Athena · Lambda · Python · QuickSight

- Built an enterprise-grade cloud data lake on AWS S3 with Glue ETL pipelines for automated schema discovery, data cleansing, and transformation processing 100M+ records and enabling scalable SQL analysis via Athena with QuickSight dashboards for stakeholder reporting.

Retail Customer Behavior & Business Intelligence Platform · Python · SQL · Power BI · pandas · NumPy

- Engineered an end-to-end analytical workflow from raw retail data to executive BI dashboards; applied SQL segmentation, CTEs, and window functions to surface that 15% of customers drove majority of repeat revenue and subscribers spend 12.5% more per transaction.
- Translated analytical findings into a structured executive report and Power BI dashboard demonstrating the full data analyst lifecycle from raw data ingestion to business decision-support output.

EDUCATION

Master of Science, Computer Science

Illinois Institute of Technology, Chicago, IL
