

SUSHEEL THIMLAPUR

Houston, TX 77084 ☎ 812-803-9798 ✉ thimlapursusheel@gmail.com 🌐 [Portfolio](#)

SUMMARY

Full-stack software engineer with 3+ years of experience building scalable web applications using JavaScript/TypeScript, Java, React.js, and Node.js. Proven ability to design RESTful and GraphQL APIs, refactor monolithic systems into microservices, and deploy cloud-native solutions on AWS. Seeking to apply expertise in Next.js, Spring Boot, Docker/Kubernetes, and CI/CD pipelines to deliver high-impact enterprise features.

TECHNICAL SKILLS

Programming Languages : C, C++, Python, JavaScript, TypeScript, Java

Databases : MySQL, PostgreSQL, DynamoDB, Neo4J, MongoDB, MariaDB

Frontend Frameworks & Technologies : HTML, CSS, Tailwind CSS, Bootstrap, React.js, Redux, Vue.js

Backend Frameworks & Technologies : Node.js, Express.js, Flask, REST APIs, GraphQL

DevOps & Cloud : Docker, Kubernetes, CI/CD, GitHub Actions, Git, Jira, Jenkins, AWS (Lambda, EC2, S3)

Testing & Automation : Unit Testing, Selenium, Apache JMeter, TestNG framework, Postman, JUnit

Machine Learning: scikit-learn, applied ML (regression, classification, feature engineering)

AI-Assisted Development & Tools: Codex, Claude Code, Github Copilot, Agile Methodologies (Scrum/Kanban)

EXPERIENCE

Indiana University

June 2025 – Present

Software Developer / *React, Node, AWS, Typescript, GraphQL*

Bloomington, Indiana

- Collaborated with cross-functional team to develop phishing training tool simulating real-world cybersecurity scenarios.
- Engineered a dynamic React.js frontend with personalized quizzes, and multimedia to enhance user engagement.
- Built a scalable backend using Node.js, TypeScript, and AWS microservices leveraging Amplify for deployment, S3 for media storage, Lambda for serverless functions, and DynamoDB with GraphQL for data management.
- Optimized real-time data pipelines to aggregate quiz results and deliver instant feedback with sub-second latency.
- Leveraged GitHub Copilot and Claude Code to accelerate feature development, reducing boilerplate authoring time and improving code review turnaround.

Heartland Community Network

Aug 2024 – June 2025

Software Engineer / *React.js, Flask, Node.js, Express.js, MongoDB, AWS*

Bloomington, Indiana

- Built and maintained a full-stack web application using React, Node, and MongoDB, later refactoring the monolithic backend into microservices with Flask and Node to boost API response time and fault isolation.
- Implemented CI/CD pipelines with GitHub Actions, automating deployments and reducing manual effort by **30%**.
- Integrated AWS services (EC2, S3, RDS, Lambda) to enhance system reliability, scalability, and uptime.

Indiana University

Jan 2023 – May 2024

Web Development Instructor / *Python, Flask, Git, HTML, CSS, Bootstrap, MariaDB*

Bloomington, Indiana

- Developed and debugged full-stack web applications using Flask and MariaDB, improving code quality & performance.
- Conducted code reviews using Git, enforcing clean architecture and best coding practices. Troubleshot complex issues across frontend and backend, simulating real-world debugging and production support scenarios.

Cognizant Technology Solutions

Jan 2021 – Aug 2022

Programmer Analyst / *Java, Selenium, Apache Jmeter, TestNG, Jenkins, Jira*

Bangalore, India

- Developed automated test scripts using Java, Selenium, and TestNG, reducing manual testing time by **70%**.
- Maintained and updated scripts for new website features, ensuring seamless integration.
- Conducted performance analysis of image recognition algorithm, achieving a **20%** processing speed improvement.
- Performed regression and functional testing, enhancing scalability and robustness while reducing manual efforts.

PROJECTS

Rental Management System | *Python, Flask, Vue, MySQL*

Aug 2022 – Dec 2022

- * Developed TechRent, a full-stack rental system using Flask, Vue, and MySQL, creating RESTful APIs and deploying on Netlify for seamless data handling and responsive UX.

Container Orchestration Platform Performance Evaluation | *Docker, Kubernetes*

Jan 2023 – May 2023

- * Developed a voting application using React and Node.js, deployed on AWS, and conducted load testing with Docker Swarm and Kubernetes, analyzing and comparing their performance, monitoring, and scalability.

EDUCATION

Indiana University Bloomington

Aug 2022 – May 2024

Master of Science in Computer Science | GPA: 3.64/4.00

Bloomington, IN

Dayananda Sagar College of Engineering

Aug 2017 – Jun 2021

Bachelor of Engineering in Computer Engineering | GPA: 3.30/4.00

Bangalore, India
