PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience transforming raw data into actionable business insights using SQL, Python, Power BI, and Excel. Skilled in data modeling, dashboard development, and statistical analysis to drive data-backed decisions. Proven ability to analyze complex datasets, identify key trends, and deliver impactful reports to cross-functional teams. Adept at working in fast-paced environments to support data-driven strategy, process improvement, and performance optimization.

TECHNICAL SKILLS

- **Languages & Querying:** SQL, Python (Pandas, NumPy, PySpark), R, DAX
- **Big Data & Cloud Platforms:** Snowflake, Databricks, Hive, Amazon Redshift, Google BigQuery, Azure Synapse Analytics
- **Data Visualization & BI Tools:** Power BI, Tableau, Looker, Excel (Power Query, Pivot Tables)
- **Data Engineering & ETL Tools:** Apache Airflow, Azure Data Factory, dbt, SSIS
- **Tools & Environment:** Git, Jupyter, VS Code, Postman, Docker, Linux (bash scripting)

PROFESSIONAL EXPERIENCE

Senior Data Analyst

Wipro Ltd., India

2021 – 2023

- Partnered with stakeholders to build data models and write optimized SQL queries using Databricks, Snowflake, and Hive, driving insights across HR and finance.
- Automated ETL workflows in Azure Data Factory and developed validation frameworks with Python (Pandas, PySpark), reducing manual effort by 40% and improving data reliability by 30%.
- Delivered interactive Power BI dashboards to monitor KPIs, enabling data-driven decisions and improving reporting efficiency across business units.

Data Analyst Intern

Wipro Ltd., India

2019 – 2021

- Built structured datasets for HR analytics (headcount, attrition, payroll) using SQL on Snowflake and Hive, supporting monthly reporting needs.
- Automated ETL processes with Python and Excel VBA, reducing reporting time by 25%, and developed Power BI dashboards for leadership insights.
- Contributed to data dictionary creation, performance tuning, and modeling discussions to improve data governance and ensure scalable solutions.

PROJECTS

Customer Churn Analysis & Prediction

SQL | Power BI | Python (Random Forest) | SSMS

- Analyzed churn behavior across 7+ customer segments using SQL to uncover patterns in tenure, contract type, and demographics.
- Trained and validated a Random Forest model in Python with 85% accuracy, identifying 378 high-risk customers.

- Integrated model output into Power BI and developed 4 executive dashboards to guide retention strategies and interventions.

E-commerce Platform Performance Analysis

SQL | Tableau | Excel

- Conducted cross-platform sales analysis on JioMart, Blinkit, and Swiggy Instamart, revealing a 22% conversion boost and 15% revenue growth from discount optimization.
- Visualized SKU-level performance and regional sales trends; identified Swiggy Instamart as the top revenue driver with \$19.8M.
- Monitored delivery metrics and service ratings to optimize logistics, reducing average delivery time by 12%.

Hospital Claims Data Analysis

SQL | Power BI

- Analyzed 48K hospital procedure records from 974 patients to identify cost patterns and optimize payer distribution.
- Found 854 readmissions and 7.25-hour average patient stay; implemented insights that reduced readmission rates by 12%.
- Designed Power BI dashboards to visualize claims, patient flow, and insurance coverage, improving report generation efficiency by 20%.

EDUCATION

University of Alabama at Birmingham

Master of Science in Data Science

GPA: 3.90 / 4.00

May 2025
