

SYEDA ABDA FATIMA

Denton, TX | (940) 268-0039 | syedaabdafatima@gmail.com

Professional Summary

Recent graduate with a Master of Science in Data Analytics with a strong foundation in data analysis, machine learning, and data visualization. Experienced in handling large datasets, developing predictive models, and creating impactful visualizations to drive data-driven decision-making. Adept at leveraging tools such as Python, SQL, Power BI, Tableau, and cloud-based platforms for research and business intelligence applications. Passionate about applying analytical expertise to solve complex problems in healthcare, research, and business domains. Seeking a full-time role post-graduation in data analytics, data visualization, or research.

Education

Master of Science in Health Data Analytics Completed May 2025
University of North Texas Denton, TX
Coursework: Project Harvesting, Store &Retrieving of Data, Large Data Visualization, Marketing Health Services, Adv Data Analytics.

Bachelor of Science in Pharmacy August 2018 – May 2022
Jawaharlal Nehru Technological University Hyderabad, India

Skills

Programming & Data Science: Python, Shell Scripting, R, SQL, Apache Spark, Hadoop, TensorFlow, scikit-learn, Data Wrangling, Neural Networks, LSTM, Linux, Google Cloud Platform, SAS, JavaScript, Artificial Intelligence
Database Management & Data Governance: MS SQL, MySQL, Snowflake, Apache Kafka, Data privacy regulations: GDPR, CCPA compliance
Data Processing & Visualization: Pandas, NumPy, Spark, Power BI, Tableau, Matplotlib, MS Excel, Open Refine
Statistical Analysis: Machine Learning & Business Intelligence Predictive models: Random Forest, Linear Regression, Decision Trees, Neural Networks, A/B Testing, Business Intelligence, Actionable Insights
Project Management & Agile Development: JIRA, Agile & Waterfall Environments, SCRUM Methodology
Other Core Competencies: Communication, Critical Thinking, Collaboration, Learning Agility, Ethical Judgment, Organization, SharePoint

Projects

Data Story Tellers: Healthcare Analysis January2025- May 2025
Role: Data Analyst | University of North Texas, Denton, TX

- Conducted a comprehensive analysis of inpatient hospitalization rates in California using open-source data from Data.gov.
- Cleaned, transformed, and validated large healthcare datasets using Python and Pandas to ensure accuracy and reliability.
- Designed interactive dashboards in Tableau to highlight trends and patterns, supporting healthcare leaders in improving care delivery and resource planning.

Cloud-based Data Engineering: Employment Trend Analysis August 2024-Decemebr 2024
Role: Data Analyst | Google Cloud Platform (GCP)

- Built scalable data pipelines using GCP tools to process and analyze national employment data.
- Utilized Dataproc clusters, BigQuery, and OpenRefine for data cleaning and integration.
- Benchmarked data processing efficiency by comparing Hive and Spark performance.
- Presented findings through clear visualizations and insights to inform future analytics initiatives.

CO Covid-19 Deaths & Non-Pharmaceutical Interventions (NPIs) Research February 2023-March 2023
Role: Data Researcher | University of North Texas, Denton, TX

- Investigated the effectiveness of non-pharmaceutical interventions (NPIs) on COVID-19 death rates using Python, Pandas, and Google Cloud.
- Conducted correlation and regression analysis to quantify policy impact.
- Created visualizations in Tableau to communicate findings to stakeholders; project supported research referenced in a publication by Oxford University.

Experience

Data Analyst August 2022 – June 2023
Shivik Enterprise (Intern) Gujrat, India

- Assisted in cleaning, validating, and analyzing large datasets using SQL and Excel to support business decisions.
- Collaborated on the development of performance dashboards using Power BI to visualize sales, customer behavior, and operational KPIs.
- Improved data entry and reporting processes, contributing to a 20% reduction in manual errors.
- Conducted ad-hoc analyses and presented actionable insights to stakeholders, aiding inventory planning and marketing strategies.
