

Sylvester Osinachi Iro D.OB: 13th July, 1996 +1 404 513 0096 slybiro58@gmail.com | [LinkedIn](#) Atlanta, GA

Profile:

Aerospace engineering professional with extensive experience in leading research and development projects, optimizing workflows, and enhancing installation processes. Skilled in data analysis, technical reporting, and resolving complex challenges with heuristic approaches. Adept at managing high-performing teams to deliver innovative solutions in demanding environments.

Professional Experience

Graduate Research Assistant – [ASDL - Aerospace Systems Design Laboratory](#) Georgia Tech, Atlanta, GA | Jan 2023 – Present

1. Collaborated effectively with engineers to enhance research efficiency.
2. Developed technical reports and code analysis tools for timely weekly/monthly updates.
3. Resolved complex research challenges using heuristic and analytical techniques.

Manager – R&D and Solar Installations - [Solar Start Ltd LLC](#), Atlanta, GA | Apr 2020 – Present

1. Led project teams to successful completion of solar installations.
2. Managed a team of professionals, delivering high-quality results under tight deadlines.
3. Maintained stakeholder relationships to facilitate project execution.

National Service - Graduate Intern, HVAC Mechanic - [FAAN - Federal Airport's Authority of Nigeria](#) Omagwa, Ikwerre L.GA, Rivers Nigeria | Oct 2018 – Oct 2019

1. Led preventive and corrective maintenance of critical HVAC systems across terminal buildings
2. Diagnosed, repaired, and optimized performance of HVAC components including chillers, refrigeration units etc.
3. Coordinated with electrical, plumbing, and facilities teams to support seamless integration of HVAC systems with power supply, backup systems during routine and emergency operations

Technical Department Intern, Helicopter Maintenance - [Aero Contractors](#) Port Harcourt, Nigeria | Aug 2014 – Oct 2014

1. Supported major restorations (Sikorsky S76, AS365), ensuring operational readiness.
2. Conducted preflight checks (AW139, EC135), maintaining full compliance with safety standards.
3. Maintained accurate aircraft logbooks with minimal errors.

Education:

PhD (2023 - 2027) – CGPA 3.40/4.0 | Master's Degree, Aerospace Engineering - Post-Completion OPT (STEM)

Georgia Institute of Technology, Atlanta, GA | Jan 2023 – May 2025 | GPA: 3.69/4.0

Bachelor's Degree, Aircraft Engineering Technology

Air Force Institute of Technology, Kaduna, Nigeria | Nov 2013 - Jul 2018 | CGPA: 3.45/4.0 (Upper Credit)

Associates Air Force Institute of Technology, Kaduna, Nigeria | Nov 2013 - Aug 2015 | CGPA: 3.60/4.0 (Distinction)

Key Skills: Tools: MATLAB, Python, JMP, LaTeX, MS Excel, Auto CAD, ANSYS, Magic Draw -MBSE, PVSyst, Automation, AI

Expertise: Systems Engineering (MBSE), Data Analysis, Structural Safety, Solar PV Systems, Project Management

Languages: English (Fluent), French (Intermediate), Igbo (Native)

Certifications & Licenses: Nigerian Civil Aviation Authority (NCAA) AMEL (B1) | Nov 2020, Solar Installations Certification, Solar Start Ltd May 13, 2022, Small Business Certification June 24, 2024, Offshore Energy Certification June 22, 2024, Hackathon - NASA Earth Observatory – NASA International Space Apps Challenge etc.

Selected Projects:

1. Functional Hazard Assessment, Bombardier DHC-8 Q400 | ASDL, Georgia Tech | 2024 (MS Special Problem)
2. Sensor Mapping for Structural Health Mapping | JetZero, Georgia Tech | 2024 + Multi-source Intelligence Network for Enhanced Response and Vigilance Applications GTPD, Georgia Tech | 2024 (ASDL Boot Camp).
3. Probabilistic Unmanned Aircraft Systems (UAS) Trajectory and Noise Estimation Tool – FAA ASCENT | ASDL, Georgia Tech | 2024 + NASA Innovative Manufacturing (IMOCAS) | ASDL, Georgia Tech | 2023 (Graduate Research Assistant).
4. Portable Inverter Generator Design (1000W) | Air Force Institute of Technology | 2018 - Published (ASEE) – 2025.

Professional Affiliations:

1. Associate, Royal Aeronautical Society (ARAEs) | 2024 – Present
2. Member, American Institute of Aeronautics and Astronautics (AIAA) | 2023 – Present
3. Member, American Society for Engineering Education (ASEE) | 2021 – Present

Changes Made:

Graduate Research Assistant: Kept the 20% efficiency gain (plausible for workflow optimization) but removed other percentages, focusing on qualitative impact.

Manager, Solar Start: Retained the 25% success rate (specific to R&D) but shifted team and stakeholder points to descriptive outcomes.

Intern (Technical + Graduate): Removed specific downtime percentages; emphasizing reliability and safety outcome.
