(Open to Relocate)

Experienced **Workday Integration Consultant** with over 3+ years of industry experience. Worked with various US clients to provide feasible solutions based on business requirements and was successfully able to deliver the requirements within the given timeframe. Proficient in **Workday Studio, Connectors, Reports, and BIRT**. Skilled in problem-solving and time management. Actively seeking opportunities to lead complex integration projects and deliver quality deliverables to clients by having a positive impact on the firm

AWARDS, RECOGNIZATION, CERTIFICATIONS ([Link](#))

- SQL: Data Reporting and Analysis, Python for Data Engineering,
- UiPath - Orchestrator 2018.2, RPA developer Foundation
- PWC - Received Real-time recognition awards for hard work and Dedication
- PWC - Received Real-time recognition award for Teamwork and Empathy

PROFESSIONAL EXPERIENCE

SABRE US

Workday Consultant

Remote, US

February 2024 - August 2024

Streamlining the HR system to leverage the Workday Platform

- Developed **EIB, Core connector**, and **Workday studio** integrations
- Configured integration system to generate a unique, sequenced file name each time it runs
- Proficient in **analyzing and translating** business requirements to technical requirements and architecture
- Configured and optimized **Workday HCM** and **Financial modules** to meet organizational needs and enhance user experience
- Build various calculated fields for extracting and manipulating required data used in **XSLT**
- Created a supervisory organization, cost center, location and its hierarchies
- Design and development of **Workday Advanced, Matrix custom report**
- Implemented and optimized Workday integrations using **SOAP/REST** APIs, enhancing system interoperability and streamlining data exchange processes
- Monitored the integration runs for success, failure, info, and warning by proactively checking the notifications of integrations
- Proficient in writing and optimizing **SQL** queries to extract, analyze, and manage data within **Workday's reporting and integration frameworks**.
- Resolved priority-based defects related to integration and functional issues raised on the **Service Now portal**
- Created security groups and users for the **integrations and reports**
- Successfully designed and implemented over 30 integrations using **Workday Studio, EIB, and Core Connectors**
- Monitored the document retention policy of the integration to reschedule integrations
- Created security groups, users and **updated the domain security policies**, and transferred the ownership to the reports, Integrations

Streamline the HCM and payroll business processes in the workday application

- Delivered an Outbound **Studio Integration** for extracting an employee's data whenever the Business Process event triggers
- Effectively communicated with the clients, and stakeholders for the enhancement requirements, change management request of the requirement, password setup of security
- Involved in the full cycle of Workday Implementation-from the discovery phase to Project Planning, Designing, Developing, Testing, and Implementing interfaces (**Workday Business/ HCM**) with other internal and external systems
- Performed functional transactions by changing base pay, contact, and address information in lower tenant to perform unit testing
- Worked on creating and testing various complex **XSLTs for studio Integrations** to fetch the desired fields in the output
- Worked on **BIRT** to generate compensation bonus statements for employees by using custom reports
- Manual run of E-Verify integration to verify the employment of new hires into the system
- Creation of the **Design document and performed Unit Testing** for Functional transactions
- Workday release testing for 2021R1, 2020R1, 2020 R2 for 80+ inbound and outbound integrations and provided the impact analysis of the updates to the clients
- Utilized Test Transport task to test, verify, and troubleshoot the connectivity to the external endpoint configured
- Involved in integration requirement **analysis, design, development, user acceptance testing (UAT)**, and implementation
- Enhancement of studio integrations to load the organization and managerial information in the external system
- Worked with studio components like **splitter, aggregator, write, eval, log, copy, transport in, transport out, XMLtoCSV**

Client: PWC Internal Project and Firm Development Activities

Enhancing the existing HR system using the Workday application

- Enhancement of the existing **Studio Integration** for capturing all the future dated Transactions of the worker
- Generated reports for fetching the required data, building complex calculated fields
- Responsible for creating design documents and run book for the new integrations, enhancements
- Migration of reports, and integrations from tenants (Dev, sandbox, and Production)
- Updating the Repository on **GitHub for Workday Integration** projects with similar requirements for future use case
- Automated the Business processes/tasks like creating notifications, adding addresses, creating new hires, and changing address information in **Workday** by writing scripts by saving **25% manual efforts utilizing the Katalon tool**
- Built advanced reports which can be exposed as a Custom **RaaS API** for organizational data
- Configured all Integration Services including Integration Attributes, Maps, Integration Field Overrides, and Report Service
- Create outbound **EIB** using the report as the data source to fetch the new hire information by prompting the start and end date to provide it to the learning and development department in **CSV** format

PROJECTS

NYC Motor Vehicles Collisions DW & Analytics | MySQL ,ER/Studio

- Visual Story and Dashboard for the New York MV Collisions were published using Tableau for the 2012 - 2022 period
- Optimize 15+ ETL data pipeline jobs to ensure one-click load to the entire data warehouse by parallelization
- Migrated over 10 million master datasets from GCP to SQL Server in Staging & Dimensional DW using Talend

Flight Price Prediction| Python | NumPy, Pandas, Matplotlib, sklearn

- Implemented predictive modeling like regression, Decision Tree, & Random Forest & achieved r2 score was 82%
- Performed pre-processing of complex Data sets & reporting data through visualizations & statistical methods
- Selected appropriate Machine learning model for feature importance after performing exploratory data analysis

Student-Based Social Networking System | Oracle Cloud Database

- Conceptualized ER data models & created a centralized database system to help students socialize with others
- Orchestrated 15+ SQL scripts (PL/SQL) and developed Triggers, Functions, and Table level constraints using SQL

SKILLS

- **Workday:** Core Connectors, Workday Studio, APIs, EIB, DT, Custom reports, Security users and groups, Workday Integrations, BIRT, PECO, PICO, Calculated Fields, REST APIs
- **Databases:** Microsoft SQL Server, MySQL, Snowflake
- **Programming Languages:** XML, XSLT, Python (NumPy, Pandas, Matplotlib, Scikit-learn), JavaScript, DAX
- **Tools & Libraries:** Excel, PowerPoint, JIRA, ServiceNow
- **Data Visualization and ETL:** PowerBI, Tableau, Alteryx, Talend
- **Cloud Services:** AWS, GCP

EDUCATION

NORTHEASTERN UNIVERSITY

MS in Information Systems (GPA: 3.55/4)

Boston, MA

January 2022 - December 2023

BMSIT INSTITUTE OF TECHNOLOGY AND MANAGEMENT

B.E (Hons.) Electronics & Communication Eng

Bangalore, India

2014 - 2018
