

TINA MARCUS

SRE / DEVOPS ENGINEER

Texas, USA | tinamarc53@gmail.com | +1 (404) 259 7091

Linkedin: <https://www.linkedin.com/in/tina-marcus-benagha-075031140/>

DevOps & Site Reliability Engineer with over 9 years of progressive IT experience spanning network security, systems administration, cloud engineering, and SRE across AWS, Azure, and GCP. Proven expertise in cloud engineering, infrastructure automation, observability, and security compliance. Skilled with Kubernetes, Terraform, CI/CD pipelines, observability, and security automation. Adept at building reliable, scalable, and secure platforms while reducing downtime and improving deployment velocity. Strong foundation in network/security engineering evolved into cloud-native DevOps and SRE practices, with expertise in Platform Engineering, DevSecOps, and Resilience Engineering.

CERTIFICATIONS

- AWS Certified Security – Specialty
 - AWS Certified Solutions Architect – Associate
 - AWS Certified DevOps Engineer – Professional
 - Microsoft Certified: Azure Security Engineer Associate (AZ-500)
 - Certified Kubernetes Security Specialist (CKS)
 - CompTIA Security+
 - CKA – Certified Kubernetes Administrator
 - HashiCorp Terraform Associate
 - AWS Certified SysOps Administrator – Associate
-

CORE COMPETENCIES

- **Cloud Platforms & Architecture:** AWS (EC2, RDS, EKS, S3), Azure (AKS, App Services, Azure Monitor, Microsoft Entra ID), GCP (GKE, Cloud Functions)
- **DevOps Tools:** Terraform, Ansible, Jenkins, GitLab CI, Azure DevOps, CircleCI, Helm
- **CI/CD Pipelines:** Jenkins, GitLab CI/CD, Azure DevOps, GitHub Actions, Cloud Build
- **Containerization & Orchestration:** Docker, Kubernetes (EKS, AKS, GKE), Helm
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack, Datadog, Azure Monitor
- **Automation & IaC:** Terraform, CloudFormation, Ansible, Cloud Deployment Manager

- **Identity & Security:** Microsoft Entra ID, Okta, IAM, CloudTrail, RBAC, MFA,
 - **Scripting & Programming:** Python, Bash, PowerShell, Ruby, Go, SQL
 - **Compliance & Security:** SOC2, ISO 27001, FedRAMP, Zero Trust, secure access control
 - **Migration & Integration:** On-premises to Cloud Migrations, VPN & VNet Design, Lift & Shift
 - **Incident Management:** Incident response, MTTR reduction, SRE best practices
 - **Security & Compliance**
-

PROFESSIONAL EXPERIENCE

Site Reliability Engineer

Manulife | April 2021 – Sept 2025

- Designed and operated multi-cloud environments across AWS, Azure, and GCP using Terraform (IaC) and GitLab pipelines.
- Defined and implemented SLIs/SLOs, reducing outages by 30%.
- Built and maintained ArgoCD GitOps pipelines for Kubernetes deployments across EKS, AKS, and GKE clusters.
- Designed and deployed a Rancher-managed Kubernetes cluster with offline GitLab CE CI/CD pipelines, enabling compliant application delivery in a regulated, air-gapped environment.
- Implemented Harbor and Nexus artifact repositories to mirror container images, Helm charts, Terraform modules, and language dependencies (PyPI, npm, Go).
- Built controlled artifact import pipelines with image signing and vulnerability scanning (Trivy) and deployed Prometheus, Grafana, and ELK for internal monitoring, reducing deployment errors and achieving audit readiness.
- Automated incident detection and remediation with AWS Lambda, Azure Functions, and GCP Cloud Functions, cutting MTTR by 40%.
- Partnered with developers to optimize CI/CD pipelines in Jenkins, Azure DevOps, and GitHub Actions for faster releases.
- Used Terraform with Helm providers to provision Kubernetes clusters and deploy workloads, improving scalability and reliability.
- Conducted post-incident reviews (PIRs) and created automation playbooks, reducing repeat incidents by 25%.

Cloud Infrastructure & Security Engineer

Genpact | Dec 2017 – March 2021

- Migrated enterprise workloads to AWS and Azure with multi-region DR/BCP strategies.
- Automated compliance using AWS Config Rules, Azure Policy, and GCP Org Policies.
- Deployed enterprise-wide threat detection via GuardDuty, Azure Security Center, and GCP SCC.

- Designed multi-cloud infrastructure with reusable Terraform modules to ensure consistency across environments.
- Implemented Terraform remote state management using S3 and Azure Blob with DynamoDB for locking.
- Migrated legacy CloudFormation/ARM templates into Terraform, standardizing IaC across teams.
- Delivered HIPAA-compliant data pipelines with MinIO, Prometheus, Grafana, and EFK logging.

DevOps Intern Engineer (Infrastructure Focus)

Labcorp | Jan 2016 – Dec 2017

- Automated provisioning of big data platforms on AWS (EMR, Redshift) and GCP (BigQuery, DataProc) via IaC.
- Containerized legacy apps with Docker and deployed to Kubernetes using Helm.
- Created CI/CD pipelines with Jenkins and GitLab.
- Automated networking (VPC, subnets, route tables, firewalls, load balancers) with Terraform, reducing setup time by 80%.
- Configured monitoring dashboards with CloudWatch, Azure Monitor, and Stackdriver to improve SLA adherence.

EDUCATION

Constanta Maritime University

B.Sc. in Marine Mechanical Engineering

CAREER HIGHLIGHTS

- Multi-Cloud IaC Automation: Cut environment setup time from 8 hrs to < 30 mins using Terraform + Ansible.
 - Kubernetes Reliability: Achieved 99.99% uptime across EKS/AKS/GKE clusters.
 - ArgoCD GitOps Deployment: Delivered continuous delivery for Kubernetes workloads.
 - Incident Response Automation: Reduced MTTR by 45% via Lambda and cloud functions.
 - Enterprise Cloud Migration: Migrated 60+ workloads with 20% cost savings.
 - Cloud Security Hardening: Passed SOC2/ISO 27001 audits with auto-remediation of 90% misconfigs.
-

RECENT PROJECTS EXECUTED

1. Multi-Cloud Infrastructure Automation (AWS, Azure, GCP)

- Built reusable Terraform modules and Ansible playbooks for networking, compute, and storage.
- Automated post-provisioning tasks for consistency and compliance.
- **Impact:** Cut setup time to < 30 mins and achieved audit readiness.

2. Kubernetes Reliability & Observability

- Deployed EKS, AKS, and GKE clusters with autoscaling and rolling upgrades.
- Integrated Prometheus, Grafana, ELK, Datadog, and Stackdriver.
- **Impact:** 99.99% uptime and 45% MTTR reduction.

3. Enterprise Cloud Migration & Security Hardening

- Migrated 60+ workloads with Landing Zones and automated account provisioning.
- Integrated GuardDuty, Azure Security Center, and GCP SCC for compliance.
- **Impact:** 20% cost reduction and audit pass on SOC2/ISO 27001/FedRAMP.

4. Air-Gapped Kubernetes & CI/CD Deployment

- Deployed Rancher-managed Kubernetes clusters and GitLab CE pipelines in air-gapped environments.
 - Mirrored dependencies to Harbor/Nexus and built secure import pipelines with signing.
 - Implemented Prometheus, Grafana, and ELK for internal monitoring and compliance.
-
