SUMMARY

- 5 years of experience as an SAP BTP / Fiori Developer and SAP Analyst, delivering scalable, user-centric enterprise solutions across finance, life sciences, and manufacturing domains.
- Proven expertise in SAP UI5/Fiori, SAP BTP, HANA SQL, CAPM, and OData services, with strong skills in both frontend development and backend integration.
- Skilled in SAP ECC to HANA migrations, data modeling, automation, and system performance optimization, achieving measurable efficiency gains and compliance readiness.
- Experienced in Agile delivery, CI/CD, cloud deployments (AWS, Cloud Foundry), and cross-functional collaboration to ensure high-quality, on-time project delivery.

EDUCATION

Master’s in Information Systems & Technology

University of North Texas, Denton, TX

SKILLS & CERTIFICATIONS

Programming Languages: JavaScript, Python, SQL

Frontend Development: SAP UI5/Fiori, React.js, HTML5, CSS3, JavaScript, Responsive UI Design, Fiori Elements, Mobile-First Design

Backend/Full-Stack Technologies: Node.js, Spring Boot, SAP CAPM (Cloud Application Programming Model), RESTful APIs, OData Services

SAP & Enterprise Platforms: SAP Business Technology Platform (BTP), SAP Cloud Platform (SCP), SAP Launchpad, Extension Center, Business Rules Framework, Workflow Management, BTP–ServiceNow Integration, Enterprise Messaging, Cloud Foundry

DevOps & Version Control: AWS (EC2, S3), GitHub, GitLab, CI/CD Pipelines, Visual Studio, DevOps on SAP BTP, SAP BTP Cockpit, Agile Methodologies

Data Analytics & Visualization: Tableau, Matplotlib, MS Excel, Data Structures & Algorithms

Databases & Data Modeling: SAP HANA SQL, SAP HANA Calculation Views

Productivity Tools: Microsoft Office Suite (Excel, Word, PowerPoint), JIRA

Certifications: **SAP:** SAP FIORI Consultant, SAP ABAP, SAP BTP Cloud Application | **Cybersecurity & IT:** Introduction to Cyber Security in SDLC, Operating System Forensics

EXPERIENCE

PNC Financial Services, TX

Sep 2024 – Present

SAP Analyst

- Led SAP ECC to HANA migration by implementing structured data transfer methodologies using IDocs and BAPI, achieving 99.9% data accuracy in master records, minimizing downtime, and ensuring a smooth transition with minimal disruptions.
- Enhanced SAP Fiori UI components, improving user experience for invoicing, reporting, and real-time data tracking, reducing manual entry errors by 25% and increasing process efficiency across multiple business units.
- Developed and optimized complex SAP HANA queries, implementing efficient indexing strategies to reduce data retrieval time by 40%, improving reporting performance and ensuring scalability for large datasets.
- Configured and launched IDoc-driven automated data integration solutions, improving data accuracy and reducing processing delays by 30%, ensuring seamless connectivity across multiple systems.
- Strengthened role-based security controls in SAP ECC, refining authorization models to ensure SOX compliance, reducing unauthorized system access risks, and enhancing audit readiness for regulatory compliance teams.
- Executed comprehensive testing cycles including functional, regression, and UAT testing for SAP ECC and Fiori enhancements, increasing deployment success rates to 98%, minimizing post-go-live defects, and improving system stability.

Infosys Ltd, India

Nov 2021– Aug 2023

Frontend Developer / SAP BTP Developer

- Delivered 6+ SAP Fiori applications on SAP BTP using SAPUI5, OData services, and CAPM, improving task completion speed by 30% for research and publishing teams.
- Developed real-time operational dashboards by integrating SAPUI5 with OData, reducing reconciliation errors by 25% and improving decision-making visibility.
- Designed modular, MVC-based UI components and responsive academic tools using SAPUI5, improving maintainability and cross-device usability while accelerating feature delivery by 40%.
- Automated multi-step publishing workflows with SAP Business Process Automation (BPA), reducing processing time by 40% and eliminating over 300 manual steps annually, boosting productivity and accuracy.
- Led DevOps initiatives on SAP BTP, implementing CI/CD pipelines with Git, Jenkins, and SAP tools to cut deployment cycles by 40% and improve delivery predictability.
- Integrated proactive monitoring and alerting mechanisms into SAP BTP applications, reducing unplanned downtime by 25% and improving system reliability.
- Deployed scalable, cloud-native CAPM applications capable of serving 1000+ concurrent users with seamless real-time backend integration.
- Implemented rigorous unit testing, debugging, and performance tuning practices, maintaining a defect rate below 2% across multiple releases.
- Configured and customized SAP Workflow and Business Process Management (BPM), decreasing approval cycle times by up to 50% and driving process automation.
- Collaborated effectively with QA, DevOps, and Product teams to maintain a 100% sprint completion rate across six Agile release trains.
- Ensured full regulatory compliance and audit readiness by aligning UI/UX designs with internal audit standards, achieving 100% adherence during inspections.

Kpit Technologies, India

Jan 2020 – Oct 2021

SAP Consultant

- Improved SAP HANA and ECC query performance by optimizing indexing strategies and SQL scripts, reducing data retrieval time by 30% and enabling faster analytics.
- Conducted UAT, regression, and integration testing for SAP SD and MM modules, preparing detailed test cases, identifying defects, and achieving 98% defect resolution prior to go-live.
- Automated master data migration using SAP IDocs, LSMW, and BAPIs, improving data accuracy by 35% and ensuring smooth, error-free transfers during system transitions.
- Configured SAP EDI and IDocs for procure-to-pay (P2P) processes, increasing data exchange reliability by 25% and minimizing vendor transaction disputes.
- Supported SAP intercompany and third-party process setups, ensuring compliance with corporate finance policies and global trade regulations.
- Delivered post-go-live SAP support by troubleshooting functional and technical issues, documenting fixes, and enhancing user productivity by 30%.

PROJECT

SAP BRH (Batch Release Hub) – Life Sciences

SAP Batch Release Hub for Life Sciences is a cloud-based cockpit application built on SAP Business Technology Platform (BTP). It consolidates data from multiple systems involved in the batch release process, streamlining operations and enhancing decision-making.

- Developed responsive, mobile-first interfaces using SAPUI5, improving cross-device compatibility by 60% and enabling efficient batch release monitoring through real-time dashboards.
- Customized user interfaces based on regulatory guidelines and domain-specific feedback, achieving 100% compliance with internal audit requirements and elevating stakeholder satisfaction.
- Integrated role-based access control (RBAC) into UI components, enhancing application security and ensuring proper segregation of duties across business roles.
