

Vasudha Chilamkuri

Business Analyst

Memphis, TN | +1 (973) 281-1163 | vasudhachilamkuri9522@gmail.com | [LinkedIn](#)

SUMMARY

Business Analyst with 6+ years of experience delivering data-driven solutions across healthcare and finance domains. Expertise in requirement gathering, stakeholder management, and translating business needs into actionable insights using SQL, Python, and BI tools. Proven ability to drive KPI improvements, streamline reporting processes, and support Agile/Scrum environments through user stories, UAT, and process optimization.

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy, scikit-learn), SQL
- **Data Analysis:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, A/B Testing, Trend Analysis
- **Data Visualization & BI:** Power BI, Tableau, Dashboard Development, KPI Reporting, Data Storytelling
- **Business Analytics:** Credit Risk Analysis, Fraud Detection, Customer Behavior Analysis, Sales & Revenue Analysis, Inventory Analysis
- **Databases & Warehousing:** Snowflake, Amazon Redshift, SQL Server, Relational Databases, Data Modeling, Query Optimization, CTEs, Window Functions
- **ETL & Data Engineering:** ETL Pipeline Development, Azure Data Factory, Data Integration, SQL Stored Procedures, Workflow Automation
- **Cloud Platforms:** Microsoft Azure (ADF, Azure ML, Cognitive Services), AWS (S3, Redshift)
- **Machine Learning & AI:** Predictive Modeling, Customer Churn Analysis, Credit Risk Modeling, NLP (Sentiment Analysis), scikit-learn, Azure ML
- **Big Data & Performance:** Large-Scale Data Processing, Performance Tuning, Query Optimization, Data Pipeline Optimization
- **Data Governance:** Data Quality, Data Validation, Data Standards
- **Tools & Practices:** Excel (Power Query, Pivot Tables), JIRA, Confluence, Agile Methodology, Requirement Gathering, Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Cardinal Health, USA

Apr 2025 - Present

Business Data Analyst

- Collaborate with cross-functional healthcare stakeholders including clinical operations, revenue cycle, and finance teams to gather and document business requirements (BRDs) for data-driven healthcare solutions.
- Translate business needs into detailed user stories and acceptance criteria, ensuring alignment with healthcare workflows, regulatory requirements, and Agile development practices.
- Develop and maintain interactive **Power BI dashboards** to track healthcare KPIs such as patient outcomes, claims processing efficiency, revenue cycle performance, and operational metrics.
- Perform **gap analysis** on healthcare data workflows and reporting systems, improving data accuracy and KPI consistency by 20%+ across enterprise reporting.
- Support **User Acceptance Testing (UAT)** by validating healthcare datasets (claims, billing, patient data), identifying defects, and coordinating with data engineering teams for resolution.
- Work with large healthcare datasets including **claims data, EHR/EMR extracts, and financial transactions** to generate actionable insights for operational and strategic decision-making.
- Automate recurring healthcare reports using **SQL and Python**, reducing manual effort by 40% and improving reporting turnaround time.
- Optimize SQL queries for healthcare data warehouses (Snowflake/Redshift), improving dashboard performance and data retrieval efficiency.
- Conduct **exploratory data analysis (EDA)** to identify anomalies in claims, billing discrepancies, and potential fraud or compliance risks.
- Ensure adherence to **data governance, HIPAA compliance, and data quality standards** in all reporting and analytics processes.
- Partner with data engineering teams to support **ETL pipelines** for integrating healthcare data from multiple sources into centralized reporting systems.

Data Analyst

- Collaborated with stakeholders to gather and define business requirements, translating them into scalable reporting solutions.
- Created user stories and assisted in Agile ceremonies, ensuring alignment between business needs and technical implementation.
- Developed interactive dashboards (Power BI, Tableau) to monitor KPIs, reducing manual reporting workload by 32%.
- Conducted data validation and reconciliation to ensure data integrity and support accurate business decisions.
- Designed and maintained ETL pipelines integrating multiple data sources into structured datasets.
- Performed gap analysis to identify inefficiencies and recommend process improvements, enhancing reporting accuracy by 21%.
- Built SQL-based reporting layers to support scalable analytics solutions.
- Translated complex data findings into actionable business insights for non-technical stakeholders.

Hexaware Technologies, India**Jan 2019 - May 2021****Business Analyst (Data & Operations)**

- Gathered and documented business requirements and translated them into functional specifications for reporting solutions.
- Facilitated stakeholder meetings to understand operational challenges and define data-driven solutions.
- Developed dashboards and reports to track project performance, reducing manual reporting effort by 30%.
- Conducted UAT testing and collaborated with technical teams to resolve defects and ensure solution quality.
- Performed process analysis to identify inefficiencies and recommend workflow improvements.
- Created process documentation, including data flow diagrams and reporting logic definitions.
- Utilized SQL and Excel to analyze operational data and support decision-making.
- Supported **UAT testing cycles**, validating outputs and coordinating defect resolution with development teams.
- Conducted **gap analysis** to identify inefficiencies in reporting workflows and recommended process improvements.

EDUCATION

MS in Information Technology Management**Jan 2024 - Aug 2025**

St. Francis College, Brooklyn, NY

CERTIFICATION

- **Google Data Analytics Professional Certificate**
- **Microsoft Certified: Power BI Data Analyst (PL-300)**
