

Vineeth Maroodi

Business Data Analyst

 Denver, CO  720-791-3489  vineeth.m@cvtechmail.com  LinkedIn

SUMMARY

Business Data Analyst with 4+ years of experience transforming complex datasets into strategic insights and actionable recommendations. Adept at developing interactive dashboards, implementing predictive models, and automating key processes to drive measurable business outcomes. Highly proficient in enhancing operational efficiency, improving data accuracy, and delivering critical intelligence that supports executive decision-making. Skilled in data visualization, advanced analytics, and innovative methodologies consistently empowering organizations to achieve informed, strategic growth and competitive advantage.

SKILLS

Methodologies: SDLC, Agile (Scrum, Kanban), Waterfall

Programming Languages: Python, SQL, R

Databases: MySQL, PostgreSQL, SQL Server

Big Data Technologies: Hadoop, Spark

Data Visualization and BI Tools: Tableau, Power BI, Looker, Advanced Excel

Project Management: Jira, Confluence, MS Project, Asana, MS Visio

Analytical Techniques: Statistical analysis, Regression analysis, Hypothesis testing, A/B testing, Cost-benefit analysis, Risk Analysis

Business Analysis & Process Improvement: Requirements Gathering, FRD/BRD Documentation, UAT Testing, User Stories, Process mapping, Stakeholder interviews, Stakeholder Engagement, Use Case Development, Data Storytelling, Change Management

Cloud Platforms: AWS, Azure, Google Cloud Platforms (GCP)

ETL/Data Integration tools: Informatica, Talend, SSIS

Soft Skills: Problem-Solving, Critical Thinking, Effective Communication, Collaboration & Teamwork, Attention to Detail

EDUCATION

Master in Technology Management | Lindsey Wilson College, Columbia KY, USA

August 2023

Bachelor in Information Technology | JB Institute of Engineering & Technology, India

September 2020

PROFESSIONAL EXPERIENCE

Business Data Analyst | BNY, Colorado

January 2023 - Current

- Optimized investment portfolio management by developing regression-based financial models in Python, identifying trends that increased returns by 12%.
- Led data gathering initiatives, collecting and structuring high-volume transactional data from multiple sources to improve data accuracy and integrity
- Built an interactive Financial Risk Dashboard in Tableau, consolidating market and credit risk indicators from multiple SQL databases, reducing risk assessment time by 35%.
- Automated ETL workflows with Informatica and AWS Redshift, streamlining data integration across legacy systems and cutting report generation time by 40%.
- Spearheaded the analysis of large-scale financial datasets to identify trends, anomalies, and opportunities, resulting in a 15% improvement in operational efficiency and data-driven decision-making for key stakeholders.
- Designed executive reports in Power BI, employing data storytelling techniques to present complex financial trends to senior leadership, driving faster decision-making.
- Strengthened data governance policies, collaborating with stakeholders to implement compliance-driven validation procedures, ensuring regulatory adherence.
- Performed deep-dive data mining and anomaly detection, identifying inconsistencies in investment portfolios that helped mitigate potential financial risks
- Developed and maintained interactive dashboards and reports using tools like Tableau and Power BI, enabling senior management to monitor KPIs and make strategic business decisions in real-time.

Business Data Analyst | Vivma Software, India

August 2019 - August 2021

- Performed data mining and statistical analysis using SQL and Python to uncover key business trends, supporting data-driven decision-making.
- Developed predictive analytics models to forecast business performance, improving operational efficiency and reducing costs by 20%.

- Collaborated with cross-functional teams to gather and analyze business requirements, translating them into actionable insights that improved process workflows and reduced reporting time by 20%.
- Executed complex data modeling techniques to design optimized database structures, ensuring efficient data storage and retrieval.
- Utilized advanced analytics and visualization tools to build interactive dashboards, enabling real-time monitoring of business KPIs.
- Streamlined data preparation processes, automating ETL workflows with Talend and SQL, reducing data processing time by 35%.
- Conducted A/B testing and statistical regression analysis, helping improve marketing campaign effectiveness and customer engagement.
- Optimized reporting frameworks by automating data extraction and transformation, reducing manual reporting time by 50%.
- Utilized SQL and Python to clean, transform, and analyze complex datasets, delivering data-driven recommendations that supported the company's growth strategies and client satisfaction initiatives.

PROJECTS

House Rental System: Developed a web-based House Rental System to streamline property rentals. Enabled landlords to list properties and manage bookings while allowing tenants to search, filter, and book by location, price, and amenities. Integrated secure payment gateways and data analytics for rental trends and occupancy tracking using SQL, Tableau, and API integrations.

Retail Sales Analytics Platform: Developed a Retail Sales Analytics Platform integrating POS, inventory, and financial data to monitor sales trends and forecast demand. Automated data collection and report generation using SQL and ETL tools, and designed interactive dashboards with Tableau. Enabled data-driven inventory optimization, sales performance tracking, and strategic decision-making for retail operations.

CERTIFICATES

Google Cloud Certified
