SUMMARY

Results-driven **Data Analyst** with **4+ years** of experience deploying **machine learning, cloud analytics, and automated reporting** to drive business decisions. Specialized in **financial analytics (Citigroup)** and **large-scale data optimization (Intel)**. Proven ability to **increase forecasting accuracy by 98%, reduce processing costs by 35%, and deliver AI-powered insights** using Python, SQL, and modern data stacks (Snowflake, dbt, Power BI).

SKILLS

Programming: Python (Pandas, NumPy, Scikit-Learn), SQL (Advanced), PySpark, R
Machine Learning: XGBoost, TensorFlow, Prophet, LLM Integration (OpenAI, Lang Chain)
Cloud Platforms: AWS (Redshift, Glue), GCP (Big Query), Snowflake, Databricks
BI Tools: Tableau (Certified), Power BI (DAX), Looker, Plotly
Data Engineering: dbt, Airflow, Kafka, ETL/ELT Pipelines, PostgreSQL Optimization
Methodologies: Agile, A/B Testing, Statistical Modeling, Data Governance

EXPERIENCE

Citigroup	Jun 2024 - Present
Data Analyst	
Led the development of an enterprise-wide financial reporting automation system using Python and advanced scripting techniques, eliminating 85% of manual reporting work while ensuring 99.9% data accuracy across all quarterly financial statements Designed and deployed a comprehensive machine learning framework utilizing XGBoost and TensorFlow that processed over 3 million daily transactions, enabling real-time sales trend predictions that informed \$50M+ in strategic business decisions Orchestrated the migration of legacy data infrastructure to Snowflake cloud platform, implementing optimized dbt transformation layers that reduced query times by 75% while cutting cloud storage costs by 40% annually Pioneered the creation of executive-level interactive dashboards in Power BI featuring advanced DAX measures and real-time data connections, transforming monthly reporting from a 5-day manual process to instantaneous insights for C-level stakeholders Established rigorous data validation protocols and automated quality checks that reduced reporting discrepancies by 60% while improving cross-departmental trust in analytics deliverables Mentored and developed a team of 3 junior analysts through hands-on coaching in Python optimization and PySpark best practices, resulting in a 30% improvement in team productivity	
Intel Corporation	Aug 2019 - Jul 2022
Data Analyst	
Engineered a scalable PySpark-based data processing system that handled 75+ million daily IoT data points from global manufacturing facilities, enabling predictive maintenance that reduced equipment downtime by 25% Modernized 15+ legacy ETL workflows through Python automation and Airflow orchestration, compressing data processing timelines from 96 hours to just 6 hours for critical production metrics Redesigned the core PostgreSQL data warehouse architecture through strategic indexing and query optimization, accelerating monthly financial reporting cycles by 3 full business days Conducted deep-dive customer analytics using advanced clustering techniques that identified 5 new high-value market segments, directly contributing to a 35% increase in marketing campaign effectiveness Developed and implemented comprehensive data governance standards that were adopted as organizational best practices, reducing data-related errors by 45% across all business units Collaborated closely with engineering leadership to design a robust data quality monitoring framework that automatically detected and corrected anomalies in real-time production data streams Championed the adoption of Tableau across the analytics organization by designing and delivering training programs that enabled 25+ analysts to create their own advanced visualizations	

EDUCATION

MS in Industrial Engineering	USA
University of Texas at Arlington	May 2024
BE in Mechanical Engineering	INDIA
Savitribai Phule Pune University	Jun 2022
