

Zankar Thakkar | Business Analyst

+1 (929) 866 8560 | zankar@jobitmail.com | NY, USA

SUMMARY

Experienced Business Analyst with over 3 years of expertise in driving strategic initiatives across financial and technology domains. Adept at leading cross-functional teams to deliver innovative software solutions, improving operational efficiency by up to 25%. Skilled in SQL, Python, Power BI, and process optimization to analyze complex datasets, streamline reporting, and enhance decision-making speed. Proficient in Agile methodologies, user acceptance testing (UAT), and ERP system integration, achieving measurable cost reductions and accuracy improvements. Demonstrated ability to develop effective documentation, dashboards, and process models, ensuring seamless collaboration between stakeholders and technical teams to deliver impactful results.

SKILLS

Languages: Python, SQL

Databases: MySQL, SQL Server, MS Access, Postgres SQL, MongoDB

Data Visualization Tools: Power BI, Tableau, MS Excel (Pivot Tables, VLOOKUP, Data Analysis)

Tools: MS Office Suite (Word, Excel, PowerPoint, Project, Visio), Jira, Confluence, Adobe Acrobat Suite, MS Project, Git, GitHub

Analytic & Technical Skills: Requirements Gathering, Process Modeling, Stakeholder Management Gap Analysis, Data Mining, Data Cleaning, Data Wrangling, Data Analysis, Data Visualization

Methodologies: Agile (Scrum, Kanban, User Stories, Sprint Planning, Retrospective Meetings), Waterfall, UAT, SDLC

Other Skills: Strong Analytical Skills, Communication Skills, Critical Thinking, Presentation Skills, Problem-solving, Dashboard and Metrics Generation, Forecasting, ERP System Familiarity, Time Management

EXPERIENCE

Jackson, NY, USA

Jan 2024 – Current

Business Analyst

- Led cross-functional teams in the financial sector to deliver 8 innovative software solutions, enhancing user experience and operational efficiency throughout the development lifecycle.
- Utilized SQL to analyze complex datasets, transforming findings into actionable insights that accelerated decision-making speed by 20%.
- Created interactive dashboards in Tableau and Power BI to visualize financial metrics, streamlining reporting processes and improving stakeholder engagement.
- Facilitated agile ceremonies, including sprint planning and retrospectives, increasing team delivery speed by 25%.
- Developed documentation protocols within the JIRA and Confluence systems across over 10 projects to enhance clear and effective interaction.
- Executed rigorous User Acceptance Testing (UAT) to validate software functionality, identifying issues early and reducing post-deployment errors by 30%.
- Optimized ERP system integration for financial reporting, achieving a 20% reduction in operational costs and a 15% increase in budget forecasting accuracy.

Intex Technologies, India

Mar 2019 - Jul 2022

Business Analyst

- Directed the delivery of 12+ projects in the computers and electronics manufacturing sector, collaborating with stakeholders to improve production efficiency by 25%.
- Conducted gap analyses on existing systems, leading to critical optimizations that reduced lead times by 30% and enhanced resource allocation.
- Developed process models and flow diagrams using MS Visio, enabling effective communication between technical and non-technical teams, and accelerating project execution by 20%.
- Analyzed manufacturing datasets with Python and SQL, converting complex data into strategic insights that informed key system upgrades.
- Implemented Agile methodologies, resulting in a 30% decrease in project cycle times and an increase in successful project completions.
- Generated performance analytics and reporting dashboards using Power BI, improving project visibility and assisting management in strategic decision-making.
- Led User Acceptance Testing (UAT) for new systems, ensuring system integrity and reducing defects in releases by 40%, thereby enhancing user satisfaction.

ACADAMIC PROJECTS

Sales Performance Dashboard

Feb 2024 – May 2024

Objective: Visualize sales performance across different regions, products, and time periods.

- Created an interactive dashboard to monitor key sales metrics such as total sales, sales growth, and sales by region and product.
- Used filters and parameters to allow users to drill down into specific data points.
- Visualized trends and patterns to identify high-performing regions and products.
- Improved visibility into sales performance, facilitating more informed and timely business decisions.

Skills: Data visualization, dashboard creation, trend analysis

Expense Tracker and Analyzer Objective: Track and analyze personal or business expenses. - Developed an Excel sheet to log expenses and categorize spending for detailed financial tracking. - Implemented dynamic charts and graphs to visualize monthly and yearly expenses, providing insights into spending patterns. - Enhanced financial management by creating actionable reports based on expense data analysis. Skills: Expense tracking, data analysis, visualization.	Sep 2023 – Dec 2023
Employee Attendance and Payroll System Objective: Manage employee attendance and streamline payroll calculations. - Developed an Excel system to track employee attendance, calculate working hours, and automate payroll calculations. - Implemented attendance summaries, leave balances, and payroll reports to facilitate efficient payroll processing. - Utilized Excel formulas and automation techniques to ensure accuracy in payroll calculations and minimize manual effort. - Improved payroll management by providing real-time insights into attendance trends and leave accruals. - Enhanced operational efficiency by integrating attendance tracking and payroll processing into a single streamlined system. Skills: Attendance tracking, payroll management, automation with Excel formulas.	May 2023 - Aug 2023
CERTIFICATION	
IBM Enterprise design thinking	
EDUCATION	
Master of Business Analytics (GPA – 3.9) Saint Peter’s University, NJ, USA	Nov 2024
Bachelor of Commerce in business & accounting Gujarat University, Ahmedabad, Gujarat, India	Jun 2015
