Education

Pennsylvania State University

Aug 2026 – May 2028 (Expected)

M.S. in Software Engineering

Pennsylvania State University

Aug 2023 – Aug 2026 (Early Grad)

B.S. in Computer Science, Minor in Mathematics; GPA: 3.7/4.0; Dean's List

Leadership: National Society of Black Engineers (NSBE), Peer Programming Mentor, Computer Science TA

Achievements: PSU Hackathon Finalist (2x), PSU Student Expo Winner

Technical Skills

Languages: Java, Python, JavaScript/TypeScript, SQL, HTML/CSS

Frameworks: Spring Boot, React, React Native, FastAPI

Backend: REST APIs, GraphQL, JUnit/Mockito

Cloud & Databases: AWS (Lambda, SNS, SQS, S3, ECS EventBridge), PostgreSQL, Redis, Neo4j, Supabase

DevOps & Tools: Docker, Linux, Git, CI/CD

Experience

ZobeLab

Mar 2026 – Aug 2026

Full Stack Developer Intern

Remote

- Optimized existing **FastAPI** backend, reducing latency by **40%** and supporting **500+** daily active users.
- Built reusable **React** components with **TypeScript**, reducing code duplication by **60%** and accelerating code delivery.
- Improved **Python** data pipelines with validation and monitoring, preventing failures across **6** release cycles.

Outamation

Jun 2025 – Aug 2025

AI/ML Intern

Remote

- Developed **LLM**-powered document classification pipeline improving accuracy from **78% to 92%** and eliminating manual QA bottlenecks.
- Built **REST API** to handle file uploads, supporting **10k+ daily requests** across **50+ integrations**.
- Benchmarked **LLM models** across **500+ documents**, enabling confident model selection and saving **\$2k/month**.

Projects

Pulse | ([Code](#)) | *Spring Boot, AWS, Redis, Docker, GitHub Actions*

Mar 2026 – Present

- Built a **real-time** notification platform with **AWS SNS** and **Spring Boot**, processing **1,000+** notifications/min.
- Developed an **AWS Lambda** consumer in **Python** with **Redis** caching, reducing duplicate notifications by **95%**.
- Provisioned **AWS** deployment with **GitHub Actions** for automated, zero-downtime deployments.

Njeli | ([Website](#)) | ([Demo](#)) | *Java, Spring Boot, React, Neo4j, GraphQL, Docker, AWS*

Dec 2025 – Present

- Deployed genealogy platform on **AWS ECS** with **Spring Boot**, supporting **3000+** node family trees.
- Built a **GraphQL API** enabling efficient relationship queries across multi-generational family trees.
- Engineered an audio pipeline with **Whisper** and **Claude API** to preserve oral family stories and extract relationships.

RimRun ([Demo](#)) | ([App Store](#)) | *Expo, React Native, TypeScript, Supabase, PostgreSQL*

Sep 2025 – Present

- Built a **React Native** app enabling users to discover **60k+** basketball courts with direct, court, and group chatting.
- Reduced court search latency from **~950ms** to **~375ms** through optimized location searches.
- Implemented **role-based access control and rate-limiting**, preventing unauthorized access and spam across chats.

Campus Spaces ([Website](#)) | *React, TypeScript, AWS, Supabase, PostgreSQL*

Jan 2026 – Mar 2026

- Built a **React** lab management platform using **PostgreSQL** to prevent double-bookings.
- Led architecture and technical decisions for **5-person** team, defining schema design and **API** contracts across services.
- Automated cleanup of expired reservations using **AWS EventBridge** and **Lambda**, reducing data bloat and latency.
