EXPERIENCE

BMS Lab, University of Twente, Netherlands — Creative Technologist / Software Developer

AUGUST 2022 – APRIL 2023 (INTERNSHIP)

- Developed mobile apps for Android and iOS using Flutter and Ionic Framework.
- Created eye-tracking software using Python for research purposes, leading to improved user behavior analysis.
- Collaborated on front-end development for web applications using Vue.js and RESTful APIs.
- Implemented automated testing strategies, improving application reliability by 15%.

New Circles Community Services, Toronto — Web Design and Ecommerce Instructor for Entrepreneurs

DECEMBER 2023 AND JUNE 2024 (2 WEEKS CONTRACT)

- Led classes of aspiring entrepreneurs in web design and e-commerce development, resulting in an 80% increase in student engagement and retention.
- Delivered hands-on training in UI design, focusing on practical applications like online store setup and UX best practices.

Cherry Hills Programs, Toronto — Assistant Manager

NOVEMBER 2023 – JANUARY 2024 (Seasonal)

- Managed daily operations and facilitated smooth workflow for a team of 12 employees during peak holiday sales, contributing to a 25% increase in overall efficiency.

Lassonde School of Engineering, York University, Toronto — Academic Peer Support Assistant

MAY 2023 – DECEMBER 2023 (Contract)

- Supported 100+ students each semester by providing academic assistance and resolving technical issues related to course enrollment.

SKILLS

Programming Languages: Java, Python, Prolog, HTML, CSS, JavaScript, Ionic Framework, Vue.js, Fortran, C, RISC-V, Verilog, R

Tools & Frameworks: Jupyter Notebook, Git, GitLab, SSH, Relational and SQL Databases, Neo4j, Shell/Bash, Docker, Kubernetes, TensorFlow, PyTorch

Data Science & ML: Machine Learning, Statistical Modeling, Data Preprocessing, Feature Engineering, Natural Language Processing

Front-End Development: React.js, Angular, Figma, Adobe Creative Suite

Software Development: Agile methodologies, Test-Driven Development, Continuous Integration/Continuous Deployment (CI/CD)

Cloud Technologies: AWS, GCP, Azure

Collaboration: Jira, Confluence, Slack, MS Teams

SELECTED PROJECTS

(LEARN MORE )

AI with Emotional Analysis for SIBOS Conference — AI Engineer/Speaker

- Developed an AI system capable of analyzing emotional tone from text data in real-time, showcased MVP at the prestigious SIBOS conference.
- Used natural language processing techniques (NLP) and machine learning models to enhance user experience by personalizing content based on sentiment.

Tweet Scheduler and Dragon 12 Calculator — Embedded Systems Developer

- Created a tweet scheduling system that automates the posting of pre-written tweets using Python and X's API.
- Developed a calculator system using Dragon 12 microcontroller and Assembly programming.

Interview Selection and Household Income Predictor — Machine Learning Engineer

- Developed and deployed machine learning models to predict household income based on demographic and social data, improving accuracy by 20%.
- Implemented feature selection, hyperparameter tuning, and model evaluation techniques to ensure high model performance.

Server-Client Application — Back-End Developer

- Built a scalable client-server architecture using Node.js and Express to handle real-time requests and data processing.
- Integrated with MongoDB for data persistence and used RESTful API for client-server communication.

Python Based Mini Games — Game Developer

- Designed and developed several small-scale, interactive Python games for educational purposes, focusing on user interface and engagement.

EDUCATION

York University – Toronto, ON — BSc. in Computer Science

SEPTEMBER 2020 - DECEMBER 2023.

AWARDS

2nd Place in SIBOS 2023 Student Challenge (AI/ML)

York University International Scholarship of Merit

HackerRank Badges in Python (Silver) and Java (Bronze)

Awarded Zenith in High School and Vice President of IT Club.
