SUMMARY

Data Analyst with 4+ years of experience in data analytics, reporting, and data modeling across banking, financial services, and enterprise environments. Proficient in **SQL, Python, Power BI, Tableau, and Excel** (advanced formulas, Pivot Tables, dashboards), with expertise in data validation, ETL processes, and data visualization. Delivered actionable insights by supporting **30+ enterprise reporting initiatives**, optimizing analytical workflows, and building scalable reporting solutions for business stakeholders. Experienced in collaborating with **20+ cross-functional stakeholders** to translate business requirements into reliable, data-driven solutions while improving reporting accuracy and operational decision-making.

SKILLS

- **Programming Languages & Databases:** Python, SQL, Shell Scripting, JavaScript, C, PL/SQL, Teradata, Snowflake, Amazon Redshift, SQL Server, Oracle, PostgreSQL, MySQL, Pandas, NumPy
- **Data Analytics & Visualization:** Power BI, Tableau, Excel (Pivot Tables, Power Query, VLOOKUP), Alteryx, DAX, Data Visualization, Dashboard Development, KPI Development, Reporting Automation, Data Storytelling
- **Data Engineering & ETL:** Apache Spark, Apache Airflow, AWS Glue, dbt, Apache Kafka, Apache NiFi, AWS Lambda, Sqoop, ETL/ELT, Data Pipelines, Data Profiling, Data Validation, Source-to-Target Mapping, Data Reconciliation
- **Cloud Platforms:** AWS (S3, Glue, Redshift, Lambda, EC2, Kinesis), Azure, Azure Data Factory, Azure Databricks, Google Cloud Platform (GCP), Google BigQuery
- **Machine Learning & AI:** scikit-learn, TensorFlow, PyTorch, XGBoost, MLflow, AWS SageMaker, Predictive Analytics, Feature Engineering, Model Evaluation, Exploratory Data Analysis (EDA), Statistical Analysis
- **Generative AI & Productivity Tools:** Microsoft Copilot, Claude (Anthropic), Large Language Models (LLMs), Natural Language Processing (NLP), Prompt Engineering, AI-Assisted Analytics
- **DevOps & CI/CD:** Jenkins, GitHub Actions, GitLab, Terraform, Docker, Kubernetes, Azure DevOps, Git
- **APIs & Integration:** REST APIs, JSON, OAuth 2.0, API Integration
- **Agile & Collaboration Tools:** Jira, Confluence, TargetProcess, Smartsheet, Scrum
- **Data Governance, Risk & Compliance:** SOC 2, GDPR, HIPAA, Basel III, AML, KYC, BSA, OFAC, Regulatory Reporting, Compliance Analytics, Compliance KRIs, Board Reporting, Risk Metrics, Risk Governance, Financial Crime Analytics, Data Lineage, Metadata Management, Data Catalog, Data Stewardship, Audit Controls
- **Banking & Compliance Platforms:** NICE Actimize, RSA Archer, ServiceNow GRC, Collibra, Fiserv, WatchDOG, Hummingbird, Velocity, Sigma Computing, Transaction Monitoring, Fraud Analytics, Sanctions Screening

PROFESSIONAL EXPERIENCE

JPMC **Jul 2026 - Present**
USA

Data Analyst

- Improved data reliability across **12+** customer and transaction tables by establishing **SQL** profiling checks across **3** banking sources, identifying data quality gaps and supporting accurate analytics using **Snowflake** and **Python**.
- Standardized operational reporting by constructing **Tableau** dashboards with **10+** KPIs for payment activity and customer onboarding trends, enabling consistent metric tracking across business teams.
- Streamlined **analytics preparation** by validating **15+** source-to-target mappings with Product, Risk, and Data Engineering teams using **SQL**, **dbt**, and **Claude (Anthropic)** for documentation and data quality validation.

Community Federal Savings Bank (CFSB) **Feb 2026 - Jul 2026**
Texas, USA

Data Governance & Compliance Analyst

- Improved the accuracy of **40+ Compliance KRIs** for **Board reporting and risk governance** by implementing automated SQL validation and reconciliation processes, reducing reporting discrepancies by **35%**.
- Analyzed **15M+** financial and transactional records (**ACH, wire transfers, KYC, AML** alerts, CTR/SAR, sanctions screening) to identify compliance risks, anomalies, and reporting gaps.
- Developed **Python ETL pipelines** (Pandas, NumPy, SQLAlchemy, PyODBC) to extract, transform, validate, and load structured compliance data into **Snowflake**, reducing manual effort by **65%**.
- Engineered SQL reconciliation workflows across **core banking, AML, and compliance systems** to identify duplicate records, missing values, invalid customer IDs, and transaction mismatches.
- Established **data governance** best practices, including **BSA** compliance controls, **metadata management**, business rule validation, exception reporting, and data lineage documentation to improve audit readiness.
- Partnered with Compliance, Risk, Internal Audit, IT, and Data Engineering teams to implement **Anti-Financial Crime (AFC)** strategies across **AML monitoring**, fraud detection, and regulatory reporting, improving issue resolution by **25%**.

Bank of New York Mellon **Aug 2024 - Feb 2026**
Texas, USA

Data Analyst

- Extracted, cleansed, and reconciled **150M+** portfolio, trading, and cash flow records from **8+** banking and market data sources, ensuring accuracy across enterprise reporting and governance processes.
- Designed and deployed interactive **Power BI** and **Tableau** dashboards tracking **25+ portfolio, liquidity, and operational**

KPIs for Finance, Treasury, Risk, and executive reporting teams.

- Conducted exploratory data analysis using **Python**, **SQL**, and **Microsoft Copilot** on **50+ financial datasets** to identify risk exposures, validate data patterns, and support portfolio performance analysis.
- Collaborated with Finance, Treasury, Risk, and Compliance teams to define requirements across **6+ business functions**, improving data consistency across multi-source financial reporting workflows.
- Built and automated **Python-based ETL pipelines** and workflow processes integrating trading, cash flow, and market datasets from **10+ source systems**, reducing manual reporting dependencies.
- Maintained compliance readiness for Basel III, SOX, and **OFAC** sanctions requirements by documenting 100+ data lineage mappings, validating financial datasets, and supporting regulatory reporting initiatives.

Dell Technologies

Jul 2022 - Aug 2023

Data Analyst

India

- Delivered interactive dashboards using **Power BI**, **Tableau**, and **Excel** to visualize sales metrics and SLA performance, improving decision-making by 30%.
- Conducted data profiling and validation using **Python** and **SQL** across **18+ business datasets**, improving data accuracy for business-critical dashboards and providing reliable insights for senior stakeholders.
- Orchestrated data validation workflows using **Python**, **SQL**, and **Excel** formulas across **10+ recurring reporting workflows**, reducing manual errors and improving pipeline efficiency.
- Documented **25+ data models, reporting workflows, and ETL processes** in **Confluence**, improving team collaboration and knowledge sharing.
- Optimized **SQL** queries and data structures for faster report generation, improving data retrieval times by **30%..**

KPMG

Dec 2021 - Jul 2022

ML-Data Analyst

India

- Developed predictive models using **TensorFlow** and **scikit-learn**, supporting **predictive analytics** use cases and improving **model accuracy** by **20%**.
- Led **data transformation** efforts using **Pandas**, improving data quality by **30%** and ensuring consistency across reporting systems.
- Created and deployed **Tableau dashboards** to visualize **model performance** and **business outcomes**, supporting **data-driven decision- making** across business units.
- Collaborated in agile sprints with **data scientists** and **business stakeholders**, iterating on models to improve product features and deliver insights for operations.

ADANI

May 2020 - Dec 2021

Data Analyst Intern

India

- Implemented **SQL-based ingestion pipelines** for data integration from **2 enterprise databases (SQL Server and Oracle)** into data platforms, streamlining data flow and ensuring consistency.
- Designed **Power BI** and **Tableau** dashboards to monitor **12+ audit and compliance metrics**, identify financial anomalies, and support compliance tracking.
- Conducted financial trend analysis and ratio calculations using **Python** across **24 months of financial data**, feeding insights into compliance dashboards for reporting.
- Modelled data structures in **Snowflake** for **8+ reporting tables**, improving data query efficiency and ensuring consistent reporting metrics.
- Performed root cause analysis on **150+ audit exceptions** and generated reports to support regulatory compliance reviews.

PROJECTS

Missing Child Identification System – Python, OpenCV, TensorFlow, ResNet50

- Built a CNN-based model achieving **90%+** accuracy in detecting missing children using 5,000+ processed images.
- Enabled real-time image ingestion from CCTV and external uploads with law enforcement integration.

Allstate Business Insurance Expert Chatbot (ABIE) – NLP, Dialogflow, JSON

- Transformed **10,000+** DITA XML topics into optimized JSON for real-time chatbot use.
- Implemented tracking dashboards and metadata enrichment workflows for performance enhancement.

EDUCATION

University of North Texas, TX | Master of Science in Computer Science and Engineering

MVSR Engineering College, India | Bachelor of Engineering in Information Technology

CERTIFICATIONS

- **AWS Cloud Practitioner**
- **Microsoft Technical Associate – Python**

Jan 2025

May 2021
