

JAVA / SPRING BOOT

BACKEND DEVELOPER

Production application services for an AI-native transportation management platform.

CLIENT YOLDA LLC	LOCATION Naperville, IL	MODEL Hybrid	ENGAGEMENT W2 CONTRACT
TERM 24 MONTHS	START OCTOBER 01-15, 2026	RATE \$42-\$50/HR W2	EXPERIENCE 1+ YEAR

01

ROLE & PRODUCT CONTEXT THE ASSIGNMENT

Yolda's platform connects the operating flow of trucking companies across loads, dispatch, drivers, documents, accounting and related workflows. This engineer will work on the backend services and integrations that make those workflows reliable in production.

BUSINESS FLOWS

- Load creation, status changes and dispatch
- Driver records, eligibility and assigned loads
- Documents / POD and operational records
- Settlement, invoicing and accounting handoffs

ENGINEERING SURFACE

- Java / Spring Boot application services
- REST APIs and internal integrations
- Relational persistence and SQL
- Testing, troubleshooting and production fixes

02

WHAT YOU'LL DELIVER CORE RESPONSIBILITIES

- Develop and maintain Java/Spring Boot services supporting load, driver, document, dispatch and accounting workflows.
- Build and extend REST APIs consumed by operational and driver-facing applications; preserve established contracts and business rules.
- Implement service and persistence logic and write SQL for feature delivery, validation and production investigation.
- Integrate internal and third-party systems where operational data must move reliably between modules.
- Trace defects through logs, API responses and database records; isolate root cause and deliver controlled fixes.
- Add unit/integration coverage, participate in code reviews and support release or production issues when required.

03

REQUIRED TECHNICAL PROFILE MUST HAVE

JAVA Professional Java development; sound OOP fundamentals and practical collections/concurrency knowledge.	SPRING BOOT Hands-on Spring Boot development with clear request → service → persistence flow.	REST APIs Experience building or consuming REST APIs in production applications.
SQL Ability to write and troubleshoot SQL against a relational database.	ENGINEERING Git-based team workflow, code review, testing and independent backend troubleshooting.	EDUCATION Bachelor's in a related technical discipline or equivalent practical experience.

THE ENGINEERING PROFILE

A focused backend assignment across transportation operations, integrations and transaction-heavy workflows.

04

PREFERRED EXPERIENCE DAY-ONE VALUE

DATA / PLATFORM

- Spring Data JPA / Hibernate
- PostgreSQL or comparable relational platform
- Docker / containerized services
- AWS exposure

INTEGRATION / DELIVERY

- Kafka or event-driven messaging
- CI/CD and automated testing
- Third-party API integration
- Logistics, transportation, fintech or other transaction-heavy systems

05

DAY-TO-DAY ENGINEERING EXPECTED WORK STYLE

- ▶ Turn defined product requirements into small, testable backend changes without over-engineering the solution.
- ▶ Work across application code, persistence and integrations when a workflow crosses system boundaries.
- ▶ Use logs, SQL, API payloads and reproducible tests to diagnose defects and distinguish root cause from symptoms.
- ▶ Coordinate with product, QA and engineering teammates through refinement, implementation, review and release.
- ▶ Contribute to application reliability, maintainability and performance as the platform evolves.

06

TECHNICAL SCREEN PRACTICAL, PROJECT-BASED**JAVA**

OOP • collections • exceptions • concurrency

SPRINGBoot structure • DI •
service/repository • REST**DATA**SQL • relational modeling •
validation • reasoning**DEBUGGING**Logs • defects • testing •
project experience

Technical screen → Yolda engineering interview → final selection. A short coding/live technical exercise may be used.

07

ASSIGNMENT TERMS FINAL PARAMETERS**TERM****24 months**

Extension may be considered based on roadmap, business need, funding and performance.

PAY**\$42-\$50/hr W2**

Final rate reflects experience and staffing/client approval.

LOCATION**Naperville, IL**

Hybrid; client-site collaboration as required.

08

WORK AUTHORIZATION W2 ELIGIBILITY

U.S. work authorization is required for the duration of the assignment. Final eligibility is subject to staffing-partner and client onboarding/compliance review.
