PROFESSIONAL SUMMARY

Data Analyst with **4+ years of industry experience** translating complex datasets into actionable business insights across EdTech and retail analytics (Vedantu, Astikya). MS in Statistical Data Science, SFSU (GPA 3.85). Expert in **SQL, Python, Tableau, and Power BI**; designed A/B testing frameworks on 32M+ events, delivered KPI dashboards driving executive decisions, and built forecasting models reducing WAPE from 33.6% to 6.3%.

EXPERIENCE

Vedantu — India's largest online tutoring platform, 35M+ registered students

12/2021 – 07/2023 | Bangalore

Data Analyst

- Queried and analyzed 2M+ YouTube and in-app events (SQL, Python); built cohort-based onboarding dashboards **driving 12% improvement in week-1 retention**.
- Developed student churn scorecards and at-risk segmentation; partnered with marketing on re-engagement campaigns **reducing churn by 18%**.
- Designed and analyzed A/B tests on thumbnails and push notifications **driving +8% CTR and +10% course enrollments**; applied CUPED (~28% variance reduction) and power analysis to ensure statistical rigor.
- Built ETL pipelines (Python, PostgreSQL) consolidating YouTube API, app logs, and CRM data; delivered Power BI dashboards tracking DAU/MAU, LTV, and engagement KPIs for weekly executive reviews.
- Analyzed NEET/JEE content performance data (2M+ annual test-takers); produced quality scorecards and A/B test readouts informing curriculum and content decisions.

Astikya — B2B retail analytics firm, 200+ distributors across Karnataka

07/2019 – 11/2021 | Belgaum

Data Analyst

- Developed demand forecasting models (RF + lag features + festival flags) **reducing forecast error by 25%**; delivered inventory dashboards cutting out-of-stock incidents across key product categories.
- Automated ETL pipelines (Python, SQL) across 15+ data sources processing 500K+ transactions; **cut reporting time from 3 days to 4 hours**, enabling same-day business reviews.
- Analyzed multi-touch marketing attribution data **improving campaign ROI by 15%**; A/B tested promotional strategies driving **+8% conversion**; identified delivery inefficiencies **reducing logistics costs by 10%**.
- Built interactive Power BI dashboards for daily executive review; tracked sales performance, customer segmentation, and inventory KPIs across 200+ distributor accounts.

Tutoring & Academic Support Center, SFSU

08/2024 – 12/2025 | San Francisco, CA

Project Lead — Instructional Student Assistant

- Tutored 100+ students in Statistics, Data Analysis, and Python; improved exam scores by 20–30%; led 5+ faculty workshops on data interpretation and mentored junior tutors.

EDUCATION

M.S in Statistical Data Science, San Francisco State University

08/2023 – 12/2025 | San Francisco, CA | GPA 3.85

M.S in Physics, Bengaluru University

08/2015 – 07/2017 | Bangalore, KA, India | GPA 3.6

SKILLS

Core Technical: SQL, Python, R, Pandas, NumPy, PySpark, Excel, scikit-learn, MATLAB

Analytics & Statistics: A/B Testing, Hypothesis Testing, Cohort Analysis, Funnel Analysis, Regression, Forecasting, Causal Inference, Survey-weighted Regression, Segmentation

Visualization & BI: Tableau, Power BI, matplotlib, seaborn, ggplot2, Dashboard Design, Data Storytelling, KPI Reporting, Executive Presentations

Tools & Cloud: Jupyter, Git/GitHub, Google Colab, OpenAI API, Prompt Engineering, Marketing Analytics, Health Analytics, Operations Research

PROJECTS

PayGuard — Fraud Analytics Dashboard *IEEE-CIS Dataset (590K transactions)* | Python, XGBoost, SHAP, Streamlit, SQL

- Analyzed 590K transactions to surface fraud patterns; built detection pipeline achieving **ROC-AUC 0.97**; deployed interactive Streamlit dashboard with SHAP explainability for business stakeholders.

Marketplace Demand Forecasting & Capacity Analysis *NYC TLC Yellow Taxi* | Python, Random Forest, PyArrow, NumPy

- Reduced WAPE **33.6% → 6.3%** using RF with time-lag features; capacity simulation insights showed scaling 5,000 → 6,000 orders/hr **cut cancellations 9.7% → 2.5%**; derived break-even penalty ~\$7.45/cancellation.

Netflix A/B Testing & Experimentation Analysis *MovieLens 32M* | Python, CUPED, mSPRT, Bayesian Inference

- Designed and analyzed A/B framework on 32M events: CUPED (~28% variance reduction), mSPRT sequential testing, SRM validation, novelty effect detection, and Bayesian lift estimation.

BRFSS Public Health Data Analysis *BRFSS 2013–2023 SMART (n=2,762)* | R, Survey-weighted Regression, ggplot2, gtsummary

- Conducted survey-weighted logistic regression with race-stratified models; engineered derived variables, built Cramér's V and forest plots in R; findings in preparation for publication.

More projects (USDA SQL Analysis, SearchXP A/B Test, Stock Market Prediction, Asteroid Classification) on [GitHub](#).

Certificates: SQL for Data Science (Coursera) • Associate Data Scientist in Python (DataCamp) • PLFP — SFSU
