

T-MOBILE

Analyst, Business Analysis

Business Performance / Sourcing Analytics Program

REQUISITION CONTROL

Client	T-Mobile USA, Inc.
Role	Analyst, Business Analysis
Public Client Reference	119054836
Assignment Type	W2 Contract - staffing-partner submission
Target Start	October 12, 2026 (proposed staffing start; client confirmation required)
Initial Assignment	12 months
Projected End	October, 2027
Extension	Possible based on project funding, business need and performance
Work Mode	Onsite / client-directed hybrid
Primary Location	Bellevue, Washington
Business Area	Field Performance / Analytics, with sourcing, spend and performance reporting responsibilities

PROJECT CONTEXT

The assignment supports a business analytics function responsible for creating the analytical foundation used by business leadership to evaluate performance, spend, supplier/category activity and operational results.

The analyst will work between business stakeholders and enterprise data/reporting environments. The position is not intended to be a software-development role. The primary requirement is the ability to understand a business question, identify the appropriate data source, query and validate the information, and convert the result into a usable business report or analysis.

The team works with multiple enterprise systems and reporting sources. The analyst will contribute to recurring reporting as well as ad-hoc analysis requested by business leadership, finance, sourcing and operational stakeholders.

The public T-Mobile description specifically identifies SQL and enterprise reporting, requirements gathering, spend modeling, performance management, procurement reporting, vendor/category reporting and business-facing insights as core work.

RESPONSIBILITIES

- Gather reporting and analysis requirements from business stakeholders and translate them into defined data requirements.
- Extract, query and organize business data using SQL and enterprise reporting systems.
- Build and maintain reporting datasets supporting performance, spend and operational analysis.
- Analyze vendor/category performance and identify trends, variances and areas requiring business attention.
- Support preparation of RFP/RFI/RFQ-related analytical material, including organizing information received from vendors and preparing comparison material.
- Maintain and validate spend baselines and supporting analytical datasets.
- Assist with total-cost and performance analysis used by sourcing and business teams.

- Develop recurring management reports and analytical views using Tableau, Power BI and Excel, where applicable.
- Perform data validation and reconcile discrepancies between source data and reporting outputs.
- Translate analytical findings into concise business recommendations for non-technical stakeholders.
- Support requirements documentation, reporting definitions and analytical process documentation.
- Work with finance, sourcing, procurement and business teams on data-driven operational decisions.
- Identify opportunities to automate repetitive reporting and improve analytical workflows.
- Support additional business analysis initiatives assigned by management.

REQUIRED QUALIFICATIONS

Non-negotiable

- Bachelor's degree in Business Analytics, Business Administration, Computer Engineering, Information Systems, Finance, Economics or a related quantitative discipline.
- Demonstrated experience with SQL/database querying.
- Demonstrated ability to analyze business datasets and identify meaningful trends, exceptions and performance patterns.
- Experience developing business reports or dashboards.
- Working knowledge of Excel.
- Ability to gather requirements and communicate analytical findings to business stakeholders.
- Ability to validate data and investigate discrepancies before reporting results.
- Strong written and verbal communication skills.
- Ability to work with cross-functional business teams and manage multiple reporting requests.

Preferred

- Tableau or Power BI experience.
- Exposure to CRM, sales, procurement, vendor or operational datasets.
- Experience with business-performance reporting.
- Python/Pandas for data preparation and analysis.
- Experience creating executive-facing reports.
- Exposure to spend, supplier or category analysis.
- Familiarity with enterprise reporting environments.

COMPENSATION

Proposed W2 Bill-to-Candidate Pay Target: \$42.50 - \$48.00 / hour
