CAREER SUMMARY

Statistical SAS programmer with extensive experience supporting clinical development programs across multiple phases of clinical trials, with strong expertise in **SAS programming, CDISC standards, SDTM, Tables, Listings, and Figures (TFLs)**. Proven ability to lead statistical programming activities, develop and review programming specifications, perform independent validation and quality control, and oversee CRO programming deliverables.

Experienced in collaborating with biostatisticians, clinical teams, data management, and other cross-functional stakeholders to deliver high-quality clinical trial outputs within established timelines. Strong knowledge of **ICH-GCP, FDA and EMA regulatory requirements**, clinical trial standards, and regulatory submission deliverables.

SKILLS

- Programming Languages: SAS, R, Python, SQL, MATLAB
- Software: IBM® SPSS®, Exsys Corvid®, SAS 9.4, R 4.1.2, MySQL 5.7, MATLAB R2021b, Python 3.7
- Applications: Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Jupyter Notebook
- CDISC, SDTM Implementation Guide, ICH GCP Guidelines, PROC Means, FREQ, ANOVA, GLM, Feature selection, Image processing, Color mapping

EXPERIENCE

International Drug Development Institute Inc,
SAS Programming Specialist

Dec 2022- current

- Lead statistical programming activities across clinical development programs, providing programming expertise from study start-up through database lock, final analysis, and regulatory submission.
- Provide programming leadership for **Phase I, Phase II, and late-phase clinical trials**, supporting safety, efficacy, pharmacokinetic, and other clinical analyses.
- Oversee CRO programming activities related to **CDISC implementation, SDTM and ADaM dataset development, and TFL production**.
- Perform **independent validation and quality checks** of SDTM deliverables generated by CROs.
- Provide technical guidance to CRO programmers and coordinate resolution of programming issues, data discrepancies, and validation findings.
- Ensure implementation of **CDISC standards** across clinical studies, including appropriate application of SDTM standards.
- Collaborate with biostatisticians, data management, clinical operations, medical writing, pharmacovigilance, regulatory, and other cross-functional teams to ensure timely delivery of clinical study outputs.
- Apply knowledge of **FDA, EMA, ICH, and GCP requirements** when reviewing statistical programming deliverables and study documentation.

Carefully Crafted LLC, New Jersey
Data Analyst

Mar 2018- Nov 2022

- Involved in designing an ER diagram using MySQL, to set the logical and physical relationships of the database using PRIMARY AND FOREIGN KEY Concepts
- Loaded the data into database tables using Load command from the text and excel files.
- Created queries by joining tables and conditional statements to extract data
- Performed data extraction and data manipulation in SAS using PROC SQL, PROC SORT, and PROC REPORT and extensively used regression techniques ANOVA, Chi Square test, T test, Correlation, PROC FREQ and PROC Means to analyze the data

GVK Biosciences Pvt Ltd., Telangana, India
Pharmacovigilance Associate

Mar 2017-Jan-2018

- Data entry of Individual Case Safety Reports (ICSRs) into the Argus Safety database Processing of all incoming cases in order to meet timelines
- Writing a detailed medically oriented description of the events in the form of safety narrative.
- Coding of adverse events with the help of MedDRA and labeling the events and Coding of suspect and concomitant drugs using company and WHO-DRUG dictionary

EDUCATION

Rutgers University, School of Health Professions, Piscataway, NJ

Master of Science in Biomedical Informatics, January 2020- 21

GPA: 3.78

KEY TRAININGS

- 2024 ICH-GCP E6 (R2) Refresher + Complementary ICH-GCP Refresher for Biometrics Staff, ECCRT (online training)
- 2023 CDISC US Interchange, SDTM Theory and Application (SDTM v1.7 & SDTMIGv3.3)
- 2023 Critical Data Handling including blinding
- 2022 Vault eTMF – Internal Users
