

SALESFORCE BUSINESS SYSTEMS ANALYST

CRM PLATFORM & CUSTOMER OPERATIONS

CLIENT	PayPal
ROLE	Salesforce Business Systems Analyst
ORGANIZATION	Business Technology / CRM Operations
ENGAGEMENT	W2 Contract
TERM	18 Months
START DATE	September 28, 2026
PROJECTED END DATE	March 31, 2028
EXTENSION	Possible, based on program funding and business requirements
LOCATION	San Jose, CA
WORK MODEL	Hybrid
SCHEDULE	40 hours / week
TARGET W2 RATE	\$65.00 – \$72.40 / hour
REQUISITION ID	Client requisition number not publicly disclosed

ROLE PURPOSE

The Salesforce Business Systems Analyst will support CRM capabilities used by business and operational teams, acting as the working connection between business stakeholders and Salesforce administrators / engineering teams.

The position requires enough Salesforce administration knowledge to understand how the platform should be configured, while also requiring the analyst to understand why the business process needs to change.

The consultant will participate across the requirement-to-release lifecycle: discovery, documentation, Salesforce configuration analysis, data validation, UAT, release coordination and post-production support.

PRIMARY RESPONSIBILITIES

Business Analysis

- Conduct requirement sessions with business stakeholders and document current-state and future-state processes.
- Translate business requirements into Salesforce-specific user stories and acceptance criteria.
- Identify process gaps and recommend configuration-based solutions where appropriate.
- Create functional requirements, process flows, workflow documentation and business rules.
- Clarify requirements between business users, Salesforce administrators, developers and QA teams.
- Maintain traceability between requirements, test cases and delivered functionality.

Salesforce Platform

- Work directly with Salesforce administrators to define configuration requirements.
- Evaluate requirements involving Objects, Fields, Record Types, Page Layouts, Lightning Record Pages, Flows, Validation Rules, Approval Processes, Permission Sets, Profiles and Sharing Rules.
- Analyze the impact of configuration changes on existing Salesforce processes.
- Support Sales Cloud and Service Cloud-related workflows.
- Review proposed Salesforce changes for usability, data quality and business-process impact.

Data & Reporting

- Analyze Salesforce records and business data using SOQL, Excel and Salesforce reporting.
- Support data-quality assessments and cleansing initiatives.
- Identify duplicates, missing values, inconsistent records and business-rule exceptions.
- Assist with Data Loader activities and data migration / validation efforts.
- Define reporting requirements and support development of dashboards and operational reports.
- Validate KPI calculations and ensure reports reflect agreed business definitions.

Testing & Release

- Create UAT scenarios based on approved requirements.
- Coordinate business-user testing and document test results.
- Validate configuration changes against acceptance criteria.
- Investigate defects and determine whether issues originate from configuration, data or requirements.
- Support sandbox testing and release preparation.
- Coordinate with Salesforce administrators during Change Set / Copado deployments.
- Perform post-release validation and support production issue investigation.

Governance & Support

- Support Salesforce access reviews and data-governance activities.
- Maintain functional documentation and SOPs.
- Assist with user training and adoption activities.
- Provide structured analysis for production issues and enhancement requests.
- Participate in Agile ceremonies, sprint planning, backlog refinement and retrospectives.

REQUIRED QUALIFICATIONS

Non-Negotiable

- Bachelor's degree in Computer Science, Information Systems, Business, Analytics or related discipline.
- 4-6 years of Salesforce administration / business analysis experience.
- Strong understanding of Salesforce Sales Cloud and/or Service Cloud.
- Demonstrated experience translating business requirements into Salesforce functionality.
- Hands-on knowledge of Salesforce configuration and declarative automation.
- Experience with Salesforce Flow.
- Strong understanding of Salesforce security and access controls.
- Experience with Salesforce data management and Data Loader.
- Working knowledge of SOQL.

- Strong UAT and acceptance-criteria experience.
- Experience creating functional documentation, process flows and user stories.
- Strong Excel and data-analysis capability.
- Experience working in Agile / Scrum delivery teams.
- Experience with Jira or equivalent backlog-management tools.

PREFERRED QUALIFICATIONS

- Salesforce Certified Administrator.
- Salesforce Advanced Administrator.
- Salesforce Platform Developer I.
- Service Cloud experience.
- Health Cloud exposure.
- Experience with Salesforce data governance.
- Snowflake or enterprise data-platform exposure.
- Copado experience.
- API / integration concepts.
- Experience in financial services, fintech, payments or other regulated environments.

INTERVIEW EXPECTATIONS

1. Salesforce Business Systems Interview

2. Business Process Case

Business Problem → Requirements → Salesforce Solution → User Story → Acceptance Criteria → UAT

3. Cross-Functional Stakeholder Interview

4. Hiring Manager / Final Discussion

WORK AUTHORIZATION

Potential Categories for Submission

- USC
- GC
