

Vamshi Krishna Timmapuram

QA Engineer

Denton, TX | (940) 999-7125 | vamshi.timmapuram@hotmail.com | [LinkedIn](#)

SUMMARY

QA Engineer with 5+ years of experience delivering manual and automation testing for financial and transaction-driven applications, specializing in Selenium WebDriver, Playwright, Java, Python, JavaScript, REST Assured, Postman, and SQL. Experienced in validating payment processing, financial transactions, account workflows, APIs, database integrity, and reconciliation processes through functional, regression, integration, system, and end-to-end testing. Skilled in developing scalable automation frameworks using Page Object Model, TestNG, JUnit, Cucumber, and BDD and integrating automated testing into Jenkins and CI/CD pipelines within Agile/Scrum environments. Applied Generative AI and AI-assisted testing techniques to accelerate test case creation, automation development, and test analysis.

TECHNICAL SKILLS

Test Automation: Selenium WebDriver, Playwright, Cypress, TestNG, JUnit, Cucumber, BDD, Page Object Model (POM), Data-Driven Testing, Cross-Browser Testing

Programming: Java, Python, JavaScript, SQL, OOP

API Testing: REST API, REST Assured, Postman, SOAP, SoapUI, JSON, XML, API Automation

AI & Intelligent Testing: Generative AI, AI-Assisted Test Automation, AI-Based Test Case Generation, AI-Assisted Test Script Development, Prompt Engineering, AI-Enhanced Test Analysis

Manual & Functional Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, End-to-End Testing, UAT, Exploratory Testing, Test Case Design, Test Execution

Financial Domain Testing: Payment Processing, Financial Transactions, Transaction Validation, Data Integrity, Reconciliation, Account Validation, Banking Workflows, Financial Data Validation

Database Testing: SQL, MySQL, PostgreSQL, Oracle, Database Validation, Backend Testing, Data Validation

QA & Defect Management: Test Planning, Test Scenarios, Test Cases, Requirements Validation, STLC, SDLC, Defect Lifecycle, Root Cause Analysis, Test Coverage, QA Metrics, Jira, Zephyr, Xray, TestRail

CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, CI/CD Pipeline Integration, Git, GitHub

Methodologies: Agile, Scrum, Shift-Left Testing, Continuous Testing

Performance Testing: JMeter, Load Testing, Performance Testing

EXPERIENCE

QA Engineer | PNC Financial Services

Mar 2026 – Present

- Designed and maintained Selenium WebDriver and Playwright automation frameworks using Java, TestNG, and Page Object Model (POM), increasing automated regression coverage by 35%.
- Validated financial transactions, payment processing, account workflows, and end-to-end business scenarios through functional, integration, regression, and UAT testing.
- Developed REST API automation using REST Assured and Postman to validate transaction workflows, HTTP status codes, JSON payloads, business rules, and service integrations.
- Executed complex SQL queries for backend validation, transaction reconciliation, financial data integrity, and verification of application records.
- Integrated automated test suites with Jenkins CI/CD pipelines, reducing manual regression effort by 40% and accelerating release validation.
- Created test plans, test scenarios, test cases, test data, and traceability coverage based on business requirements and acceptance criteria.
- Analyzed automation failures and production defects in Jira, performed root-cause analysis, and collaborated with developers, business analysts, and product teams.
- Participated in Agile/Scrum ceremonies, sprint planning, backlog refinement, daily stand-ups, reviews, and retrospectives to support quality throughout the SDLC.

Quality Analyst | Broadridge

Nov 2022 – Jul 2024

- Developed reusable Java Selenium WebDriver automation using TestNG, Cucumber, BDD, and POM, reducing regression execution time by 35%.
- Executed functional, regression, smoke, sanity, integration, and end-to-end testing for financial applications, improving test coverage by 30%.
- Performed REST API testing with Postman and REST Assured, validating JSON/XML payloads, HTTP responses, authentication, error handling, and business workflows.

- Reconciled financial application results with backend records using SQL and database testing to identify transaction and data inconsistencies.
- Designed test scenarios, test cases, and traceability matrices from functional and business requirements, achieving 95%+ requirements coverage.
- Executed automated suites through Jenkins CI/CD, reviewed test results, analyzed failures, and supported continuous testing across application releases.
- Managed the defect lifecycle using Jira and Zephyr, documented reproducible issues, coordinated retesting, and collaborated with development teams on resolution.
- Supported Agile/Scrum delivery by providing QA estimates, identifying release risks, participating in sprint ceremonies, and communicating testing status to stakeholders.

QA Analyst | Avenir Technologies

Feb 2020 – Oct 2022

- Executed manual and automation testing for web applications using Selenium WebDriver, Java, and TestNG, reducing regression testing effort by 30%.
- Designed functional, integration, regression, smoke, sanity, and exploratory test cases, improving defect detection during pre-release validation by 25%.
- Built reusable automation scripts using Selenium WebDriver, Java, TestNG, and Page Object Model to support repeatable regression validation.
- Performed API testing with Postman to validate REST services, JSON responses, HTTP status codes, request parameters, and application integrations.
- Conducted SQL-based database validation across MySQL and Oracle to verify data consistency, backend processing, and transaction results.
- Prepared test documentation including test scenarios, test data, execution results, and defect reports based on functional requirements and acceptance criteria.
- Tracked defects through Jira, performed root-cause analysis, participated in defect triage, and coordinated retesting with development teams.
- Collaborated with developers, business analysts, and QA teams throughout Agile/Scrum delivery, supporting SDLC/STLC activities and timely production releases.

EDUCATION

Master of Science in Computer and Information Science | *University of North Texas, Denton, TX*

CERTIFICATIONS

-
- ISTQB Certified Tester – Foundation Level (CTFL) — ISTQB
 - Postman API Testing Certification — Postman
 - Playwright Test Automation Certification — Playwright
