Work Authorization	USC GC GC-EAD H1B H4-EAD STEM-OPT OPT		
Compensation Rate	\$38 - \$52 / hour on W2		

POSITION OVERVIEW

Kaiser Permanente is seeking an early-career Health Care Research / Quality Data Analyst to support healthcare research, quality measurement, data review, and evidence-based reporting within an integrated healthcare environment.

This position will work with healthcare, research, quality, and administrative stakeholders to organize and review healthcare data, identify inconsistencies and trends, support research and quality-improvement activities, and translate analytical findings into concise reports and business-ready summaries.

The role is particularly suited for an analyst with a background in public health, epidemiology, clinical research, healthcare administration, pharmacy, or a related life-sciences discipline who can work carefully with healthcare datasets and documentation while developing stronger analytical capabilities. The analyst will be expected to work with structured and secondary datasets, perform data-quality checks, document methodology, maintain research records, and communicate findings clearly to both technical and non-technical stakeholders.

KEY RESPONSIBILITIES

Healthcare Research & Data Analysis

- Collect, organize, and analyze healthcare, clinical, population-health, and quality-related data supporting research and operational initiatives.
- Conduct secondary-data analysis using established research questions, data definitions, and analytical plans.
- Examine healthcare datasets for trends, patterns, outliers, missing information, inconsistencies, and potential data-quality issues.
- Perform descriptive and epidemiological analyses to support healthcare research, quality measurement, and population-health activities.
- Prepare structured datasets and analytical summaries for research teams, quality teams, and business stakeholders.
- Compare data across reporting periods, patient populations, geographic groups, or other defined cohorts to identify meaningful changes.

- Assist with development and maintenance of analytical datasets, data dictionaries, metric definitions, and supporting documentation.

Data Quality & Validation

- Review source data for completeness, consistency, accuracy, and adherence to established data definitions.
- Perform spreadsheet-based reconciliation and quality checks before information is incorporated into reports or research deliverables.
- Investigate discrepancies between source records, extracted datasets, and reported results.
- Document identified data issues, assumptions, corrections, and methodology in a manner suitable for internal review and auditability.
- Escalate material data-quality concerns to appropriate research, clinical, quality, or analytics stakeholders.

Healthcare Quality & Research Support

- Support quality-improvement and healthcare research projects through data collection, evidence review, analysis, and reporting.
- Assist with tracking quality measures, research variables, patient/population characteristics, and project-specific indicators.
- Review clinical and healthcare documentation to identify relevant variables and ensure consistent categorization.
- Support research teams with literature reviews, evidence synthesis, data interpretation, and preparation of research materials.
- Maintain appropriate confidentiality when working with patient-related, clinical, or research information.

Reporting & Communication

- Develop clear Excel-based summaries, tables, trend analyses, and research reports for project stakeholders.
- Translate quantitative findings into concise written explanations that can be understood by healthcare and non-technical audiences.
- Prepare presentations and supporting documentation for project discussions, research reviews, and quality-improvement meetings.
- Communicate analytical assumptions, limitations, data-quality findings, and interpretation clearly.
- Collaborate with clinical, public-health, research, quality, and analytics professionals to clarify requirements and resolve data questions.

Project Execution

- Manage assigned analytical and research tasks according to established timelines and project priorities.
- Maintain organized research files, analytical documentation, source references, and project deliverables.
- Follow established healthcare data governance, privacy, research, and documentation procedures.
- Participate in recurring project meetings and provide status updates on assigned analytical work.
- Adapt analytical approaches when project requirements, data sources, or research questions change.

QUALIFICATIONS & SKILL REQUIREMENTS

REQUIRED QUALIFICATIONS

- ✓ 1–3 years of experience in healthcare analytics, clinical research, public-health research, quality analytics,

PREFERRED QUALIFICATIONS

- + Master's degree in Public Health, Epidemiology, Biostatistics, Pharmacy, or related healthcare discipline.

epidemiology, healthcare operations, or related field. ✓ Bachelor's or Master's degree in Public Health, Epidemiology, Biostatistics, Health Sciences, Pharmacy, Life Sciences, Healthcare Administration, Statistics, etc. ✓ Demonstrated experience working with healthcare, clinical, public-health, research, or other structured datasets. ✓ Strong working knowledge of Microsoft Excel (organization, filtering, sorting, formulas, reconciliation, analytical summaries). ✓ Experience identifying data inconsistencies, trends, missing information, or quality issues. ✓ Ability to interpret quantitative findings and communicate them through concise written reports and presentations. ✓ Understanding of basic epidemiological and statistical concepts. ✓ Strong attention to detail when working with healthcare data & documentation. ✓ Ability to handle confidential and sensitive healthcare information appropriately. ✓ Strong written and verbal communication skills & stakeholder collaboration.	+ Experience with R, SAS, SQL, or another analytical programming/query language. + Exposure to healthcare quality measurement, population health, clinical research, or quality-improvement programs. + Experience working with secondary datasets from healthcare, government, public-health, or research sources. + Familiarity with research methodology, human-subjects research, IRB processes, or clinical research documentation. + Experience conducting literature reviews and synthesizing peer-reviewed evidence. + Familiarity with healthcare terminology, clinical workflows, or patient-level healthcare data. + Exposure to healthcare data standards, data dictionaries, metric definitions, or analytical documentation.
--	--

CORE TECHNICAL SKILLS & COMPETENCIES

Analytics	Data Collection • Data Organization • Data Validation • Data Quality Review • Secondary Data Analysis • Descriptive Analysis • Trend Analysis • Epidemiological Analysis • Research Data Management
Tools & Software	Microsoft Excel • R • Statistical/Analytical Tools • PowerPoint • Microsoft Office
Healthcare & Research	Healthcare Data • Clinical Data • Public Health • Quality Improvement • Research Methodology • Human Subjects Research • Literature Review • Patient/Population Data • Healthcare Documentation
Reporting & Comms	Research Reports • Data Summaries • Analytical Documentation • Data Definitions • Presentation Materials • Stakeholder Communication

PROJECT ENVIRONMENT & MARKET CONTEXT

The analyst will operate within an integrated healthcare environment where analytical work may support clinical research, healthcare quality, population health, patient outcomes, operational reporting, or related Kaiser Permanente initiatives.

The position requires careful handling of healthcare information, disciplined documentation, repeatable data-quality practices, and the ability to move from raw or secondary data to a defensible analytical summary.

Kaiser Permanente's current Oakland analytics postings similarly emphasize gathering targeted data systematically, validating data sources, preparing analytical datasets, investigating data inaccuracies, documenting processes, researching healthcare metrics, and presenting findings to stakeholders.

SUCCESS MILESTONES IN FIRST 90 DAYS

✓ Milestone 1	Understand assigned healthcare research or quality-measurement workflows and applicable data definitions.
✓ Milestone 2	Independently perform routine Excel-based data review and quality checks.
✓ Milestone 3	Identify and document data discrepancies before reporting.
✓ Milestone 4	Produce accurate research tables, summaries, and trend analyses.
✓ Milestone 5	Maintain organized analytical documentation and project records.
✓ Milestone 6	Communicate findings and data-quality questions clearly to project stakeholders.
✓ Milestone 7	Contribute to recurring research, quality, and analytical deliverables with limited day-to-day direction.

COMPENSATION BENCHMARKING & CONTEXT

Target W2 Contract Rate: \$38 – \$52 / hour The proposed rate reflects an early-career healthcare research/data-analytics profile in the Oakland market, with the upper end appropriate for candidates bringing a graduate degree plus direct healthcare research, epidemiology, clinical-data, and analytical-tool experience. <i>Market Context Note: For context, Kaiser Permanente's currently posted Oakland employee data-analytics positions are substantially more senior: a current Data Reporting Analyst III posting lists \$101,200–\$130,900 annually, while a Data Analyst IV posting lists \$130,200–\$168,410 annually. Those roles require significantly greater enterprise analytics experience and technical depth, so their compensation should not be treated as a direct 1–3 year contract benchmark.</i>

ENGAGEMENT TERMS & LEGAL NOTICES

CONTRACT & WORK ARRANGEMENT • W2 Contract engagement (18-Month initial term) • Extension based on project & business needs • 40 Hours/week (Hybrid: 3 days onsite Oakland / 2 days remote) • Collaboration with clinical, research, quality & admin teams	WORK AUTHORIZATION • Must be legally authorized to work in the U.S. for the full duration of engagement. • • Final eligibility subject to client & employment requirements.
EQUAL EMPLOYMENT OPPORTUNITY STATEMENT Kaiser Permanente is committed to providing equal employment opportunities and maintaining a workplace free from unlawful discrimination. Employment decisions are made in accordance with applicable federal, state, and local laws.
