

AFRIN BEGUM, PharmD, MPH

Junior Healthcare Data Analyst

Jersey City, NJ | 201-918-9150 | afrinbegum198@gmail.com | linkedin.com/in/dr-afrin-begum-a134a1293

PROFESSIONAL SUMMARY

PharmD and MPH professional pursuing a Junior Healthcare Data Analyst role, with direct experience in data collection, organization, and validation, secondary data analysis, and identifying trends and inconsistencies across two independent research studies. Skilled in using Microsoft Excel to organize and interpret quantitative healthcare-related data, with experience translating analytical findings into clear written reports for academic and public health audiences. Strong analytical and critical-thinking skills, attention to detail, and comfort collaborating with both technical and non-technical stakeholders in a remote environment.

CORE SKILLS

Data Analysis & Quality: Data Collection, Organization & Validation | Secondary Data Analysis | Epidemiological Analysis | Identifying Trends & Data-Quality Issues

Tools & Reporting: Microsoft Excel | R (developing proficiency) | Structured Reporting & Data Summaries | Documenting Data Definitions & Processes

Communication & Collaboration: Translating Findings into Clear Written Summaries | Stakeholder Communication | Multidisciplinary Collaboration | Remote Work & Priority Management

Research Foundation: Human Subjects Research | Literature Review | Research Thesis Preparation & Presentation | Quality Improvement Support

RESEARCH EXPERIENCE

MPH Capstone Researcher

Sep 2025 – Dec 2025

Long Island University — Brooklyn, NY

Climate Change, Intervention Scale-Up & Malaria Burden in Eastern Africa — Multi-Country Ecological Study

- Designed and conducted a multi-country public health research study using secondary health and environmental datasets to examine relationships between climate variables and malaria disease burden.
- Collected, organized, and synthesized data from multiple sources, including WHO secondary datasets, identifying trends and inconsistencies across country-level data.
- Applied epidemiological and analytical approaches using Microsoft Excel to examine relationships between environmental variables and malaria outcomes.
- Conducted literature reviews of peer-reviewed global health research and synthesized findings into a structured, evidence-based report.

PharmD Thesis Researcher

Sep 2021 – Aug 2022

Balaji Institute of Pharmaceutical Sciences — Warangal, India

Patient Experiences with Chronic Kidney Disease (CKD) and Nephrotic Syndrome — Qualitative Human-Subjects Study

- Recruited and conducted semi-structured interviews with clinical ward patients over a six-month period, obtaining informed consent and maintaining confidentiality under IRB supervision.
- Designed and conducted a six-month qualitative human-subjects research study examining treatment adherence, medication-related experiences, and barriers to medication compliance.
- Applied systematic thematic analysis, including coding, organizing, and synthesizing interview data, to identify patterns related to treatment adherence, medication compliance, patient experiences, and barriers to care.
- Developed structured interview guides and maintained participant information, interview records, and research documentation with attention to accuracy, consistency, and confidentiality.
- Managed the research project alongside clinical ward rotations, demonstrating organization, time management, and independent work.

PROFESSIONAL EXPERIENCE

Public Health Intern

Feb 2026 – May 2026

Maimonides Medical Center — Brooklyn, NY

- Maintained, organized, and quality-checked healthcare-related records and data using Microsoft Excel.

- Maintained and reviewed clinical supply inventory information, including batch numbers and expiration dates, to support accurate records and organized operations.
- Supported patient communication workflows, including appointment reminder calls and follow-up activities in an outpatient setting.
- Supported healthcare documentation, administrative records, and daily outpatient clinical operations.
- Collaborated with healthcare professionals and administrative staff to support patient flow, documentation, and daily outpatient operations.

Clinical Pharmacy Trainee / Intern

Sep 2022 – Aug 2023

Guardian Multispecialty Hospital (Balaji Institute of Pharmaceutical Sciences) — Warangal, India

- Completed a 12-month full-time hospital internship (Pharmacy Council of India Reg. 16) with rotations in Internal Medicine, Surgery, Orthopaedics, and Gynaecology.
- Conducted patient interviews and collected medical and medication histories; provided patient counselling on treatment adherence, medication safety, and appropriate medication use.
- Monitored and documented adverse drug events and medication-related concerns; participated in clinical case discussions with physicians, pharmacists, and nursing staff.
- Reviewed medication profiles and identified drug-related problems, contraindications, and medication safety concerns; maintained patient medication records and clinical documentation.
- Collaborated with multidisciplinary clinical teams to support evidence-based medication management and patient care.

Clinical Training

Sep 2018 – Aug 2021

Balaji Institute of Pharmaceutical Sciences (Affiliated Hospitals) — Warangal, India

- Completed progressive clinical training (Years 2–4) as part of the six-year PharmD program, including hospital ward rotations across multiple specialties such as Pediatrics, preceding the Guardian Multispecialty Hospital internship and PharmD thesis.

EDUCATION

Master of Public Health (MPH)

Sep 2024 – May 2026

Long Island University — Brooklyn, NY | GPA: 3.9/4.0

Relevant Coursework: Epidemiology | Biostatistics | Global Health | Environmental Health | Health Policy & Management

Doctor of Pharmacy (PharmD)

Sep 2017 – Aug 2023

Balaji Institute of Pharmaceutical Sciences — Warangal, India

Six-year professional pharmacy program encompassing pharmaceutical sciences, clinical pharmacology, pharmacovigilance, clinical training, and research methodology.

CERTIFICATIONS & PROFESSIONAL TRAINING

- CITI Program — Human Subjects Research: Social, Behavioral & Educational Research
- WHO Antimicrobial Stewardship Training — OpenWHO
- Pharmacovigilance Training — Vigiflow ADR Reporting System, Government of India

COMMUNITY HEALTH EXPERIENCE

Community Health Volunteer

2019

Grace Cancer Foundation — India

- Conducted community health education and cancer awareness outreach.
- Delivered prevention and early-detection messaging and developed health education materials promoting preventive health behaviors.
