Dallas, Texas, USA | (945) 241- 5256 | zanwarradhika99@gmail.com | www.linkedin.com/in/radhika-zanwar

SUMMARY

Business-focused Data Analyst with 3+ years of experience supporting client projects and customer success through AI-powered, data-driven insights that improve retention, optimize operations, and drive revenue. Strong collaborator with a proven track record of turning complex data into clear, actionable recommendations for stakeholders.

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Capillary Technologies | Dallas, USA

June 2025 - Present

- Partnered with business leaders to identify and analyze data needs, preparing interactive Power BI dashboards to identify customer trends and service metrics, contributing to product strategies and data-driven decisions
- Delivered analytics support across multiple client engagements, owning data preparation, validation, and insight generation with ad-hoc analysis to help teams move from raw data to business-ready outputs
- Built a customer churn model using 50+ behavioral metrics with SQL and standardized quality control to cut defects by 21% while delivering a 72% precision decision framework that strengthened retention strategy
- Trained Regression model and developed reports to automate weekly customer scoring, highlighting key churn drivers and high-value at-risk customers, driving a 12% increase in reactivation through targeted marketing

Business Data Analyst | Schneider Electric | Bangalore, India

August 2021 - July 2023

- Performed root cause analysis on operational data to identify critical KPIs and performance drivers, providing leadership with actionable insights through recurring performance reporting
- Collaborated with cross-functional teams to streamline ETL processes on large datasets and integrate insights from diverse data sources, reducing issue resolution time by 17% and improving data reliability
- Produced clear analytics documentation and process workflows in Excel and Confluence, reducing defects by 20% and strengthening product performance through standardized data practices
- Automated repetitive data processing tasks using Python, reducing manual effort and processing time, thereby enhancing team productivity while supporting product analytics within a 13-member team

ACADEMIC PROJECTS

SENSAI – GenAI Clinical Document Intelligence Chatbot with AI Guardrails

September 2025 - December 2025

- Built an AI-powered chatbot for clinical trial documents, cutting manual research time from 25–30 minutes to under 2 minutes while enabling accurate, evidence-based response for healthcare workflows.
- Integrated a RAG-based solution using Llama-3.3-70B and AWS S3 with AI guardrails (PHI/PII redaction, prompt validation, output filtering) to improve response reliability and support scalability, compliance-ready deployment

Cloud-Based Weather Data Pipeline & Analytics (AWS, Snowflake, SQL, Tableau)

February 2025 - May 2025

- Built an end-to-end cloud data pipeline using AWS (S3, Lambda) to ingest and process 30,000+ daily weather records, with SQL-based transformations that improved data quality and reduced query execution time by 30%.
- Built interactive Tableau dashboards powered by optimized Snowflake models, delivering real-time weather insights and enabling data-driven forecasting improvements of up to 15%.

SKILLS

Certifications: Microsoft Fabric Analytics Engineer, Tableau Desktop Specialist

Technical Skills: SQL, Databricks, AI, ML, Python (Pandas, NumPy, Matplotlib), R, AWS, Snowflake,

Tools: Power BI, Jira, Advanced MS-Excel (Macros, Pivot Table, VLOOKUP), GitHub, Tableau, SSIS

Management Skills: Agile Methodologies, Stakeholder Reporting, Customer Behavior Analysis, Go-to market strategy, Cross-functional collaboration, Statistical Analysis, Technical Documentation (BRDs)

EDUCATION

Master of Science in Information Technology and Management - UT Dallas (**GPA 3.8**)

August 2024 - May 2026

Bachelor of Technology in Mechanical Engineering - CCOEW (**GPA 3.7**)

August 2017 - June 2021
