

SERVICENOW DEVELOPER / ADMINISTRATOR

ITSM | Platform Development | Workflow Automation | Integrations

CLIENT	emids — Healthcare Technology / Digital Engineering
LOCATION	Nashville, TN • Onsite
ENGAGEMENT	W2 Contract through Staffing Partner • 24-Month Initial Term
EXPERIENCE	4–6 Years, ServiceNow Development & Administration
START	Immediate, upon client selection and onboarding
TARGET RATE	\$55.00 - \$63.50/hour (W2)
CERTIFICATION	ServiceNow CSA or CAD required (both strongly preferred)

CLIENT / PROGRAM CONTEXT

Emids is a healthcare technology and digital engineering organization headquartered in the Nashville area, serving payer, provider, life sciences, medtech and health technology clients. In February 2026, Emids announced a strategic ServiceNow partnership focused on modernizing healthcare administrative operations through AI-driven workflows and enterprise automation — spanning claims transformation, provider data management, care management and contact-center operations.

The ServiceNow team builds and administers the platform capability that turns operational requirements into controlled workflows, service-management functionality, integrations and reporting. This role is for a hands-on developer who can operate across the full application lifecycle — requirements, configuration, development, testing, deployment and production support — working directly with business and technical stakeholders.

POSITION RESPONSIBILITIES

Platform Development & ITSM

- Design, configure and develop ServiceNow solutions using JavaScript, Business Rules, Client Scripts, Script Includes, UI Policies, UI Actions and Scheduled Jobs.
- Configure and enhance Incident, Problem, Change, Release, Request and Service Catalog, including Catalog Items, Record Producers and Order Guides.
- Support workflow automation via Workflow Designer and Flow Designer, translating stakeholder requirements into platform configuration.

Integrations & CMDB/ITOM

- Develop and troubleshoot integrations with external systems using REST and SOAP web services, including LDAP/SSO and data-mapping issues.
- Configure and maintain CMDB data structures, support data-quality and ITOM activities, and build dashboards for CMDB health and performance.

Administration, Support & Reporting

- Perform day-to-day administration, access management, production troubleshooting, root-cause analysis and release/update-set deployment.
- Build reports and dashboards, configure scheduled notifications, and support operational reviews and management reporting.

Emids – CN-400812-SVD

- Execute unit/functional testing and UAT support, and participate fully in Agile/Scrum ceremonies and the ServiceNow SDLC.

REQUIRED QUALIFICATIONS

- 4-6 years of hands-on ServiceNow development and administration, delivering enhancements from requirements through production.
- Strong ITSM experience (Incident, Problem, Change, Request, Service Catalog) and scripting (Business Rules, Client Scripts, UI Policies/Actions, Script Includes).
- Experience with Workflow/Flow Designer, update sets and controlled deployments, Service Portal/catalog configuration, and CMDB functionality.
- Strong JavaScript within ServiceNow, working knowledge of HTML/CSS/XML, and ability to debug client- and server-side scripts.
- Hands-on REST/SOAP integration experience, working knowledge of LDAP/SSO, and strong troubleshooting, documentation and stakeholder communication skills.

PREFERRED QUALIFICATIONS

- ITOM, ITBM and GRC/risk-and-compliance workflow exposure; Service Portal widget customization and AngularJS within ServiceNow.
- Performance Analytics and dashboard/reporting experience; exposure to ServiceNow AI/automation capabilities.
- Experience in healthcare, pharma, payer or provider environments, and familiarity with provider operations, claims or care-management workflows.

CLIENT INTERVIEW PROCESS

- Qualification — experience validation, CSA/CAD verification, scripting and integration discussion, work authorization and rate alignment.
- ServiceNow Technical Interview — ITSM modules, scripting, Flow Designer, CMDB, JavaScript, REST/SOAP, ACLs and troubleshooting methodology.
- Hands-On / Scenario Discussion — diagnosis and resolution approach for practical workflow, script, integration and CMDB scenarios.
- W2 / Client Compliance — project ownership, Agile delivery, production support and onsite collaboration, eligibility verification, background screening, and final onsite reporting instructions.

WORK AUTHORIZATION & TERMS

Candidates must be legally authorized to work in the U.S. for the assignment duration (US Citizen, Green Card, F-1 OPT/STEM OPT, H-4 EAD, or other accepted status; H-1B subject to approved employer transfer and client approval). F-1 candidates must independently confirm CPT/OPT eligibility. Authorization is subject to verification and does not guarantee placement.

Assignment: 24-month initial term, onsite in Nashville, TN, W2 through the staffing partner, with possible extension based on funding, performance and business need.

COMPENSATION & W2 EMPLOYMENT

Hourly Comensation

- \$55.00 - \$63.50/hour W2 (depending on technical experience, interview performance and final client-approved rate)

Emids – CN-400812-SVD

W2 Benefits

Eligible employees may have access to the staffing partner's applicable W2 benefit plans, subject to plan terms, eligibility requirements and applicable waiting periods:

- Medical insurance options
- Dental insurance
- Vision insurance
- 401(k) retirement plan, subject to applicable plan terms
- Paid sick leave where required by applicable law
- Workers' compensation coverage
- Unemployment insurance coverage
- Statutory employment benefits
- W2 payroll and year-end Form W-2 reporting

Benefit premiums, employee contributions, employer contributions, eligibility and waiting periods are governed by the staffing partner's current benefit plans and are not determined by the end client.
