

SUMMARY

- A fast-learning data professional with 8+ years of work experience and a master's degree in business analytics.
- Expertise in ETL, data manipulation, data visualization, data analysis, machine learning, and data migration.

TECHNICAL SKILLS

- SQL | Python | Tableau | Power BI | Big Query | MySQL | PostgreSQL | T-SQL | PySpark | R
- Databricks | Dbt Cloud | GitHub | SQL Server | SSMS | SSIS | SSAS | SSRS | GCP | Fivetran | Salesforce | HubSpot | Postman | Google Analytics | Clari | Microsoft Office Suite | Visual Studio | Azure Data Studio | Jira | Confluence | Agile | AWS | Git | CI/CD | ETL | DAX | AI | LLM | Langchain | ServiceNow

WORK EXPERIENCE**ServiceNow, Quality Engineer (LLM, AI, Excel, Sharepoint)****Jan. 2026 – Present**

- Collaborated with ML engineers to define quality benchmarks, acceptance criteria, and measurable evaluation metrics.
- Implemented logging and trace analysis to debug multi-agent orchestration failures and improve workflow reliability.
- Performed regression and E2E testing on AI workflows and tool-calling, using structural flows to ensure correct logic.

Forcepoint**Sep. 2021 – Jan. 2025****Data Engineer (ETL, SQL, Python, Spark, Tableau, Databricks, CI/CD, GitHub, Agile, SSIS, SSAS, AWS) Jun. 2023 – Jan. 2025**

- Engineered and deployed SSIS packages for ETL processes to populate a SQL Server Data Warehouse.
- Configured an OLAP cube using SSAS for multidimensional analysis.
- Built a layered Medallion architecture (Bronze, Silver, Gold) in Databricks to structure data processing workflows.
- Developed and maintained robust ETL pipelines in Databricks using Delta Live Tables, PySpark, and Fivetran.
- Architected and managed scalable data pipelines with Databricks Workflows and dbt Cloud, optimizing processing efficiency by 60% and enhancing stability, while implementing CI/CD and leveraging GitHub for version control.
- Executed a seamless data migration project from SQL Server to Databricks by uploading data to AWS S3, followed by data validation, and Unity Catalog configuration for centralized data governance.
- Designed and deployed interactive Tableau dashboards for Salesforce Subscriptions and Quotes objects.
- Built Python-based notebooks in Apache Spark within the Databricks ecosystem for scalable data processing.
- Applied Agile/Scrum methodologies and employed Jira for task tracking and team collaboration.

Revenue Operations Analyst (ETL, SQL, Python, Tableau, SSMS, SSIS, SFDC, API, Clari, GCP)**Jun. 2022 – Jun. 2023**

- Employed SSMS for SQL-based data extraction and executed ETL processes via SSIS across multiple databases.
- Extracted and parsed data from APIs and web sources using Python (requests, json, BeautifulSoup, Selenium).
- Automated revenue report generation with Jupyter notebooks, pandas, and openpyxl, reducing processing time by 90%.
- Applied exploratory data analysis (EDA) techniques to identify KPI trends, patterns, and anomalous observations.
- Leveraged Tableau to develop sales pipeline dashboards, improving visibility and increasing sales performance by 18%.
- Utilized Google BigQuery to extract, transform, and load large datasets for analysis and reporting purposes.

Data Management Analyst (SQL, Tableau, SSMS, SFDC)**Sep. 2021 – Jun. 2022**

- Created complex SQL queries and views using SSMS to extract data from multiple databases.
- Acquired, validated, and analyzed Salesforce data for reporting and ad hoc needs, resolved data quality issues through cross-functional collaboration, and performed statistical analysis on large transactional datasets.
- Collaborated with the CS Operations team to analyze case data, create Tableau dashboards, and deliver insights.

Quwu Coal Washery Inc, Data Analyst (SQL, Power BI, Power Query, Excel, DAX)**Dec. 2013 – Feb. 2017**

- Designed and maintained relational databases to record transactions of the company.
- Wrote SQL queries to extract data, designed ETL processes with Power Query, created DAX-based measures, and constructed Excel and Power BI dashboards to track key metrics like MAU, retention, and revenue.
- Built linear optimization models and applied them to coal cleaning processes, which improved the revenue by 13%.

WuhanTextile University, Lecturer and Researcher (Excel)**Jul. 2004 – Jul. 2007**

- Used Excel VLOOKUP, SUMIFS and COUNTIFS functions to analyze the scores of 2000 students.

PROJECTS**Performed the bank marketing analysis using Tableau and Python programming**

- Prepared data through Python (pandas, seaborn) preprocessing and Tableau visualization.
- Applied Naïve Bayes and Random Forest algorithms for loan repayment forecasting.

EDUCATION

- **M.S. in Business Analytics**, California State University - East Bay, GPA 3.92/4 **Sep. 2017 – Jun. 2020**
- **M.S. in Condensed Matter Physics**, Huazhong University of Science and Technology, China **2004**
- **B.S. in Physics Education**, Shanxi Datong University, China **2001**
