SENIOR SOFTWARE DEVELOPMENT ENGINEER IN TEST (SDET)

Optimize Testing Efficiency Through CI/CD Integration, Advanced Test Management Tools, and Data-Driven Insights

Senior QA software tester with 7+ years of quality assurance experience, specializing in manual and automation testing across web and API applications. Apply SDLC and STLC expertise (test planning, execution, defect management, test estimation) while collaborating within Agile, Waterfall, and V-Model environments to support refinement and continuous delivery.

Manage user stories, sprint cycles, and product backlogs; design test plans, test cases, and traceability matrices; and execute functional, system, integration, regression, UAT, and end-to-end testing. Leverage analytical, problem-solving, and communication skills to deliver high-quality results in demanding environments. Core competencies include:

- Test Strategy and Execution
- Defect Identification, Triage, and Resolution
- White Box\ Black box Testing and Database Validation (SQL, Oracle, DB2)
- Test Management and Defect Tracking (JIRA, ALM, QTest)
- Smoke Testing, Sanity Testing
- Workflow Optimization
- Test Automation (Python)
- CI/CD Pipelines and Integration
- AI-Assisted Testing Tools
- Performance, Load Testing

TECHNICAL SKILLS

API Testing Tool:	Postman, SOAP UI, Python
Operating Systems:	UNIX, Windows, Linux
Web Technologies:	Java, XML, JSP, RESTful Web Services, JDBC, J2EE and C#, VB (Basics), Programming C
Tools:	JIRA, ALM, HPQC, SharePoint, MS Excel, Microsoft Test Manager (MTM), Microsoft TFS Qtest, Tosca, DPOS, Deepio, ATLAS, CSM, Tableau, Tosca, Clearwater Tool, Python, Playwright, Test Grid
Databases:	Oracle, MS Access, SQL Server
AI Tool:	JIRA Ask Rovo, ChatGPT, Copilot
Methodologies:	Waterfall, V Model, Agile, Validation and Verification
Mobile Testing:	Sauce Lab, Test Grid

PROFESSIONAL EXPERIENCE

T-MOBILE, Overland Park, KS

Senior Software Development Engineer in Test (SDET)

05/2024 – 06/2026

Lead end-to-end testing for web and T-Life platforms to ensure high-quality releases across Agile projects. Collaborate with stakeholders to analyze requirements and develop test strategies. Manage test lifecycle and defect tracking and execute functional, regression, E2E, and API testing. Drive quality and release efficiency through automation, CI/CD pipeline management, and clear stakeholder reporting.

Environments: Jira, QTest, Python-Pytest, Postman, Tableau, SQL, Firefox, Edge, Safari, SharePoint, Confluence

Sauce lab, Test Grid.

Key projects completed include:

- **Subscription Marketplace Platform (Test Lead, 8 Months):** Delivered data-driven digital platform that enabled customers to discover, subscribe, and manage partner subscription services based on eligibility.
- **Usage Overview and Usage Details (Test Lead, 4 Months):** Enhanced customer experience by upgrading usage dashboard to provide detailed insights into billed and unbilled data usage, including domestic, international, hotspot, and third-party services.
- **International Roaming (Test Lead, 2 Months):** Developed feature that allowed customers to verify device compatibility across countries and view coverage maps for international roaming services.
- **Family Control (Tester, 2 Months):** Enabled account-level parental controls, including managing child lines, monitoring usage, and viewing family coverage and communication activity.
- **TFB (T-Mobile for Business) Micro (Test Lead, 5 Months):** Supported business customers in managing accounts, including adding lines, upgrading devices, and modifying rate plans.
- **Billing Address Enhancement (Test Lead, 2 Months):** Improved billing address management functionality, enabling seamless updates to primary user information (PUI).

WIPRO, Overland Park, KS

Test Engineer (Client: T-Mobile)

10/2021 - 04/2024

Performed end-to-end testing (ALM, QTest, Jira), including functional, regression, and system integration testing. Managed test data and environments with TDM Portal and internal tools, and validated backend data using SQL. Conducted mobile testing for iOS and Android platforms. Collaborated with cross-functional teams in Agile / Scrum environments, led team activities, provided knowledge transfer to new resources, and addressed offshore queries.

Environment: ALM/Quality Center, QTest, Jira, Tableau, SQL, Firefox, Edge, Safari, SharePoint, Confluence.

- Developed dashboards and reports in Tableau that tracked test progress, identified issues, and supported timely project delivery.

Achievement.

- Implemented the new T-Mobile application on test devices across all environments, ensuring availability for the entire testing team.
- Identified and reported critical defect in code to ensure the timely resolution.
- Automated regression test suits, reducing manual testing effort.

AMERICAN INFO SYSTEMS INC., Overland Park, KS

Test Engineer

10/2020 - 09/2021

Collaborated with business and development teams to gather requirements and design functional, integration, and regression test cases. Managed test cycles and defects using ALM, tested ERP integrations across manufacturing and logistics systems. Performed API testing with Postman and SoapUI. Validated data using SQL, assisted business users to support UAT, and generated test reports to communicate progress to stakeholders.

Environment: ALM, Jira, Azure DevOps, Infor M3, MuleSoft, Oracle, AWS, SQL Server, SoapUI, Postman.

Achievement

- Tested a large-scale digital modernization project integrating 20+ third-party applications, ensuring seamless system integration and high-quality releases.
- Improved defect detection and reduced production issues through comprehensive functional, integration, API, and data validation testing (SQL, Postman, SoapUI).

- Accelerated UAT sign-off and release readiness by effectively managing test cycles, defects, and stakeholder reporting using ALM, Jira, and Azure DevOps.

AMERICAN INFO SYSTEMS INC., Kansas City, KS

Test Engineer

10/2019 - 09/2020

Developed and executed test plans, test cases, and automation scripts to support functional, integration, system, and usability testing. Performed API testing (functional, load, and security) using Postman and SoapUI, and automated regression tests with Selenium. Validated authentication and authorization mechanisms and queried databases to ensure backend data accuracy. Collaborated in Agile ceremonies (sprint planning, retrospectives). Reported test progress, defects, and risks to stakeholders.

Environment: Selenium, Jira, SQL Server, MuleSoft, SoapUI, Postman, HTML, XML, JSON, SharePoint.

- **Achievement**

- Supported development and testing of Watson Virtual Chat interface for telecom client, enabling 24/7 automated customer support with reduced reliance on live agents.
- Contributed to mission-critical customer engagement platform, designing to improve customer satisfaction and service ratings through AI-driven virtual assistance.
- Validated chatbot functionality across end-to-end customer journeys, including billing, plan changes, and account management, enabling intelligent escalation to live agents based on sentiment detection.

EDUCATION

Master of Science (MS), Information Technology, Birla Institute of Technology, Mesra, India

Bachelor of Science (BS), Computer Science, TMB University, Bagalpur, India

EDUCATION AND CERTIFICATION

ISTQB Certified Tester Foundation Level (CTFL)

TOSCA Automation Specialist 1 Level Certified

TOSCA Automation Specialist 2 Level Certified

AWARD / ACHIEVEMENT

SQAR Appreciations - Above and Beyond Achievers

Wipro Winner's Circle Award
