

Gabriel Swanson

Cellphone: (619) 306-2428 | gabeswanson@ymail.com* www.linkedin.com/in/gabriel-swanson

PROFESSIONAL SUMMARY: Entry level experience undergraduate seeking a position in the areas of software development, cyber security, or related field.

EDUCATION:

San Diego State University

Bachelors of Science: Computer Science

May 2022

GPA: 3.48

Grossmont College

Associates of Science: Computer Science

May 2020

HackEDU

OWASP Certification

August 2021

Coursera

AI Fundamentals Certification

August 2026

AI for Brainstorming and Planning Certification

August 2026

AI for Research and Insights

August 2026

AI for Writing and Communication

August 2026

RELEVANT SKILLS AND EDUCATION:

- Intermediate knowledge of C and C++ developing school projects
- Programming languages: Python, Java, HTML, JSON, HLA, SQL
- Linux OS: making a Linux server network

- Windows OS: daily use and school projects
- Cyber security fundamentals and Interim Security Clearance: Extracurricular club activities, 6 Month Interim Secret Security Clearance Eligibility granted 9-28-2022.

EXPERIENCE:

Tactical Engineering and Analysis

Software Developer

January 2023 – April 2026

- Process tickets from scrum master assigned via Jira and worked on using Visual Studio Code
- Fix bugs on project by using documentation of message system along with built in debuggers to find errors
- Collaborate with coworkers on tickets as appropriate
- Implement new features as needed for the project
- Maintain confidentiality of government project
- Write up demo pages for completed tickets
- Review tickets completed by others

Biological Dynamics

Database Intern (Summer 2014)

July 2014

- Developed python scripts to test impedance on medical chips
- Time management skills by working with project deadlines
- Experience with chip manufacturing

Nexogen

Lab view intern, (Summer 2017)

July 2017

- Developed a visual state machine
- Worked with hardware simulation by testing traffic light functionality
- Learned how code using a visual coding language
- Learned how to connect condition and for loop boxes

Adaptive Computer Empowerment Services**Volunteer**

August 2018 – March 2019

- Installed operating systems on computers
- Worked with computer assembly and disassembly
- Configured computer antivirus software and media applications
- Scanned donation computers for viruses

AFFILIATIONS AND MEMBERSHIPS:

- SDSU Cyber Security club
- Command line interface instructions
- SQL injection
- Reverse engineering exercises
- Capture the flag exercise
