W2 Bill Rate	\$48.00 – \$55.00/hr (DOE, location, technical assessment, client approval)
Annualized Equivalent	~\$99,840 – \$114,400/yr at 40 hrs/week, before applicable taxes, benefit deductions, and unpaid time

Overview

EY Digital Engineering builds enterprise web applications, APIs, and modernization solutions for client programs. This role supports an established application team. The selected candidate will implement requirements, maintain existing codebases, integrate APIs, troubleshoot defects, and support controlled production releases.

Key Responsibilities

- Build and maintain responsive UI components (Angular and/or React, JavaScript/TypeScript, HTML5, CSS3)
- Integrate REST APIs (JSON); troubleshoot data-binding and integration issues
- Write and run SQL (and NoSQL/MongoDB where applicable) for support and validation
- Test, debug, and validate cross-browser and responsive behavior
- Use Git/GitHub within CI/CD workflows; support builds, releases, and documentation
- Participate fully in Agile ceremonies (sprint planning, stand-ups, retrospectives, estimation)

Required Qualifications

- Bachelor's (or Master's) degree in Computer Science, Computer Engineering, Information Technology, Software Engineering, or a related field
- Hands-on experience with JavaScript/TypeScript, Angular and/or React, HTML5/CSS3, REST APIs, JSON, Git, SQL, and Agile/Scrum practices
- Working knowledge of VS Code and Node.js, plus one or more of: MySQL, MongoDB, Firebase, cloud deployment, CI/CD

Preferred Qualifications

- Enterprise (non-academic) application support experience
- Proficiency in both Angular and React; multi-API integration experience

- Node.js/backend exposure; cloud platform experience (GCP, Azure, or AWS)
- CMS experience (WordPress or similar); automated testing exposure
- Accessibility, secure development, or analytics/reporting (Power BI) exposure
- Master's degree in Computer Science, Computer Engineering, Information Technology, or a closely related technical discipline

Interview Process

1. Live Coding Assessment
2. Team Fit Discussion
3. Compliance Clearance

Work Authorization

Candidates must meet the regulatory definition of a “United States worker.” Accepted categories (subject to client confirmation) include: U.S. Citizen, Green Card holder, H-4 EAD, and F-1 OPT/STEM OPT. H-1B transfer will be considered only if pre-confirmed in writing by both the staffing supplier and the client.

Onboarding Conditions

This engagement is contingent upon: client selection, background screening, work authorization verification, completion of onboarding documentation, client security/compliance clearance, and confirmed project funding and start date.

The target start date of 09/28/2026 is not guaranteed until all client and staffing conditions above have been completed.
