

Data Scientist / Analytics Engineer

Kaiser Permanente | Oakland, California

EMPLOYMENT	W2 Only (No C2C)
PROJECT TENURE	1.5 years; extension up to 24 months based on project funding and performance
WORK MODE	Onsite — no remote option
TENTATIVE START	October 1, 2026

W2 RATE	WORK AUTHORIZATION
\$54.00 – \$62.70 / HR	USC • GC • H4-EAD • L2S • OPT • OPT-EXT • Day-1 CPT • H1B Transfer

Role Overview

This role combines data science and analytics engineering across large-scale healthcare and operational datasets. The position emphasizes production-grade SQL/dbt ETL, predictive modeling, time-series forecasting, anomaly detection, model monitoring, and executive-ready BI reporting.

Core Responsibilities

- Develop and maintain SQL/dbt-based ETL pipelines on AWS S3, processing 1M+ patient and operational records per batch.
- Build predictive models using Regression and Random Forest to forecast patient demand, appointment adherence, and resource utilization.
- Apply Time-Series Forecasting for patient scheduling and operational trend analysis.
- Conduct Model Evaluation and Monitoring to ensure accuracy, reliability, and SLA compliance.
- Implement Anomaly Detection to identify irregularities in patient throughput and operational KPIs.
- Deliver Power BI/Tableau dashboards for near real-time monitoring of patient and financial KPIs.
- Execute data validation and reconciliation checks, ensuring audit-ready analytics delivery.
- Collaborate with clinical operations and IT security teams to align analytics outputs with compliance and business needs.

Technology Stack

Category	Required / Preferred Technologies
Core	SQL (Advanced), dbt, Python, AWS
Machine Learning & AI	Regression Models, Random Forest, Time-Series Forecasting, Anomaly Detection, Model Evaluation / Monitoring
Visualization & BI	Power BI, Tableau
Data Engineering	ETL pipelines, Data Validation, Audit-ready workflows
Preferred	Docker, CI/CD pipelines, Great Expectations

Qualification Matrix

Priority	Requirement
MANDATORY	2 years of professional experience in Data Science or Analytics Engineering.
MANDATORY	Strong expertise in SQL, Python, AWS, dbt, and ETL pipeline development.
MANDATORY	Hands-on experience with predictive modeling (Regression, Random Forest) and time-series forecasting.

Priority	Requirement
MANDATORY	Proven ability to process and analyze large datasets (1M+ records) with SLA-driven delivery.
MANDATORY	Experience with Power BI/Tableau for KPI reporting and dashboard development.
MANDATORY	Knowledge of data validation, reconciliation, and audit-ready reporting in enterprise environments.
PREFERRED	Exposure to MLOps frameworks (CI/CD, Docker, SageMaker).
PREFERRED	Experience with Great Expectations or similar data quality frameworks.
PREFERRED	Prior healthcare analytics exposure (clinical or operational).
PREFERRED	AWS Certified Cloud Practitioner or equivalent cloud certification.

Education

Bachelor’s degree in Computer Science, Data Science, Information Systems, or related discipline.

Interview Process

ROUND 1	Kaiser technical panel
ROUND 2	Client manager interview
ROUND 3 • IF REQUIRED	HR compliance and work authorization verification
