

Data Scientist / Analytics Engineer

Kaiser Permanente - Oakland, CA

JOB SNAPSHOT

Role Title	Data Scientist / Analytics Engineer
Client	Kaiser Permanente – Oakland, CA
Employment Type	W2 Only (No C2C)
Project Duration / Tenure	1.5 Years (extension up to 24 months based on project funding and performance)
Tentative Start Date	10/01/2026
Work Mode	Onsite (No Remote Option)
Work Authorization	USC, GC, H4-EAD, L2S, OPT, OPT-EXT, Day-1 CPT, H1B Transfer
Compensation (Hourly)	\$54.00 – \$62.70/hr on W2
ID	2026-DS-HLA-7155

RESPONSIBILITIES

- Develop and maintain SQL/dbt-based ETL pipelines on AWS S3, processing 1M+ patient and operational records per batch.
- Build predictive models using Regression and Random Forest to forecast patient demand, appointment adherence, and resource utilization.
- Apply Time-Series Forecasting for patient scheduling and operational trend analysis.
- Conduct Model Evaluation and Monitoring to ensure accuracy, reliability, and SLA compliance.
- Implement Anomaly Detection to identify irregularities in patient throughput and operational KPIs.
- Deliver Power BI/Tableau dashboards for near real-time monitoring of patient and financial KPIs.
- Execute data validation and reconciliation checks, ensuring audit-ready analytics delivery.
- Collaborate with clinical operations and IT security teams to align analytics outputs with compliance and business needs.

REQUIRED TECHNOLOGIES

- **Core:** SQL (Advanced), dbt, Python, AWS
- **Machine Learning & AI (Role-Specific):** Regression Models, Random Forest, Time-Series Forecasting, Anomaly Detection, Model Evaluation/Monitoring
- **Visualization & BI:** Power BI, Tableau
- **Data Engineering:** ETL pipelines, Data Validation, Audit-ready workflows
- **Preferred:** Docker, CI/CD pipelines, Great Expectations (data quality framework)

QUALIFICATIONS

Mandatory (Non-Negotiable):

- 2 years of professional experience in Data Science or Analytics Engineering.
- Strong expertise in SQL, Python, AWS, dbt, and ETL pipeline development.

- Hands-on experience with predictive modeling (Regression, Random Forest) and time-series forecasting.
- Proven ability to process and analyze large datasets (1M+ records) with SLA-driven delivery.
- Experience with Power BI/Tableau for KPI reporting and dashboard development.
- Knowledge of data validation, reconciliation, and audit-ready reporting in enterprise environments.

Preferred:

- Exposure to MLOps frameworks (CI/CD, Docker, SageMaker).
- Experience with Great Expectations or similar data quality frameworks.
- Prior healthcare analytics exposure (clinical or operational).
- AWS Certified Cloud Practitioner or equivalent cloud certification preferred.

EDUCATION

- Bachelor's degree in Computer Science, Data Science, Information Systems, or related discipline.

INTERVIEW PROCESS

- Round 1: Kaiser technical panel
- Round 2: Client manager interview
- Round 3 (if required): HR compliance and work authorization verification
