

ASHIS KUMAR RATH

DATA ANALYST

+1 (970) 825-8210 | Ashisrath98@gmail.com | USA | [LinkedIn](#)

Summary

Data Analyst with 4 years of experience specializing in financial data analysis, reporting, and process optimization. Skilled in SQL, Python (Pandas, NumPy), and Excel for analyzing large datasets, generating insights, and supporting data-driven decision-making in areas such as risk management, forecasting, and portfolio analysis. Experienced in building dashboards using Power BI and Tableau to track KPIs, revenue trends, and client performance. Adept at working with cross-functional teams to ensure data accuracy, regulatory compliance (SOX, GDPR, CCPA), and delivering actionable insights that enhance financial planning and business outcomes.

Skills

Data Analysis & Visualization: SQL, Excel, Power BI, Tableau, Google Data Studio, Looker, DAX, Power Query

Statistical Analysis & Modeling: Descriptive & Inferential Statistics, Regression Analysis, Hypothesis Testing, Forecasting, A/B Testing, Time Series Analysis

Programming Languages & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R (ggplot2), Jupyter Notebook

Databases & Data Warehousing: MySQL, PostgreSQL, SQL Server, MongoDB, Snowflake, BigQuery, Azure SQL

ETL & Data Pipeline Tools: SSIS, Talend, Apache Airflow, Azure Data Factory, Informatica, Alteryx

Cloud Platforms: Microsoft Azure, AWS (S3, Redshift, Lambda), GCP (BigQuery)

Reporting & Documentation: JIRA, Confluence, Notion, Microsoft PowerPoint

Professional Experience

Data Analyst, Freddie Mac, USA

Jul 2025 – Present

- Built enterprise-grade star-schema financial reporting models (fact tables exceeding 100M+ rows) in Snowflake and designed Power BI semantic layers using DAX, DirectQuery, and incremental refresh to support 5+ executive-level financial KPIs.
- Optimized SQL-based ELT transformations processing 80M+ daily records using Snowflake and AWS S3, reducing dashboard refresh latency from 18 minutes to under 5 minutes and improving executive reporting responsiveness.
- Implemented enterprise-grade data validation and reconciliation frameworks aligned with SOX and internal audit standards, reducing reporting discrepancies and strengthening regulatory compliance controls across financial datasets.
- Partnered with finance, risk, and operations teams to deliver self-service BI solutions, reducing manual reporting effort by 35%.

Data Analyst, HDFC Asset Management Company Limited, INDIA

May 2022 – Jul 2024

- Performed statistical and cohort-level analysis on portfolio datasets exceeding 5 M+ transaction records using SQL and Python to identify performance trends, risk concentrations, and fund-level exposure patterns supporting investment strategy decisions.
- Designed and supported enterprise ETL workflows using Informatica and SSIS to build star-schema data marts (fact and dimension tables) for fund performance and investor reporting, improving batch processing efficiency and reporting accuracy.
- Validated predictive models using regression, classification, and time-series techniques to forecast business outcomes and improve planning accuracy.
- Automated recurring reporting workflows using SAS Visual Analytics and SQL-based transformations, reducing reporting turnaround time by 40% and improving data availability for portfolio review meetings.
- Employed cloud infrastructure management on AWS, optimizing services like S3, EC2, and RDS to reduce costs, deploying data warehousing solutions on Snowflake, enhancing query performance, and enabling real-time analytics.
- Developed interactive Tableau dashboards and visualizations, transforming complex datasets into actionable insights that supported data-driven decision-making for stakeholders.

Data Analyst, Mphasis, INDIA

Apr 2021 – Apr 2022

- Created & maintained SQL-driven reports & dashboards supporting credit risk & operational monitoring for enterprise clients.
- Supported development of analytics-ready datasets by cleaning, validating, & reconciling source data across multiple systems.
- Worked with operational and financial data sourced from enterprise systems, leveraging Power BI to deliver insights that supported business decisions.
- Developed KPIs and performance metrics, created visualizations, and delivered reports and presentations to senior stakeholders on financial wellbeing, customer segmentation, and campaign effectiveness.

Education

Master of Computer Information Systems (STEM), Colorado State University, CO

Aug 2024 – Dec 2025

Master of Business Administration (Business Intelligence), NMIMS University, Mumbai

Sep 2020 – Apr 2022

Bachelor of Technology, Mechanical Engineering, NMIMS University, Mumbai

Jun 2016 – Aug 2020

Certifications

PL 300 | Snowpro Core
