

Ayaz Shaikh | Senior Data Analyst

McKinney, TX | 972-704-9983 | ayazhayder@hotmail.com

SUMMARY

Ayaz Shaikh is a Senior Data Analyst with 5+ years of experience delivering business intelligence, analytics, and reporting solutions. A fast learner who quickly adapts to new technologies and business domains, he specializes in turning complex data into actionable insights and delivering results at speed. His expertise includes Power BI, Looker, Snowflake, SQL, Google Cloud Platform, and Microsoft technologies, helping organizations build KPI-driven reporting and data solutions across financial services, logistics, manufacturing, retail, and technology industries.

SKILLS & EXPERTISE

- Advanced SQL and data modeling
- Python for data pipeline development and automation
- ETL/ELT pipeline design and orchestration
- Cloud platforms: GCP, Redshift
- Data visualization: Power BI, Tableau
- Agile/Scrum project delivery
- Data governance and quality frameworks
- Jira, Microsoft Office Suite
- Production environment support and issue resolution

PROFESSIONAL EXPERIENCE

evolv Consulting

Nov 2025 – Current

PayPal

BI Consultant

- Rapidly onboarded to PayPal's Business Lending domain and successfully turned around a critical reporting initiative within 6 weeks.
- Designed and developed executive and operational dashboards in Looker to support business lending and loan portfolio operations.
- Partnered with business stakeholders to define KPIs, reporting requirements, and performance metrics for monitoring loan origination, portfolio health, funding activity, and operational efficiency.
- Developed scalable data models and reporting solutions leveraging data sourced from Google Cloud Platform (GCP).
- Created interactive visualizations that enabled users to analyze lending trends, customer behavior, loan performance, and operational metrics.
- Delivered self-service analytics capabilities that improved reporting visibility, accelerated decision-making, and increased adoption across business teams.

Vertiv

Power BI Consultant

- Designed and delivered Power BI dashboards supporting logistics, transportation, and supply chain operations.
- Integrated enterprise data from Snowflake and leveraged Cortex-powered capabilities to support advanced analytics and reporting requirements.
- Built semantic models, KPI scorecards, and operational reporting solutions for executive and business users.
- Developed dashboards tracking shipment performance, transportation efficiency, inventory movement, logistics costs, and service-level metrics.
- Worked with business and technical stakeholders to translate operational requirements into scalable reporting solutions.

Toyota

Technical Business Analyst

- Served as a Technical Business Analyst supporting inventory optimization and forecasting initiatives.
- Facilitated workshops with business and technical teams to document requirements, define solution scope, and prioritize business needs.
- Built semantic models, KPI scorecards, and operational reporting solutions for executive and business users.
- Supported development of inventory management solutions designed to improve visibility into inventory utilization and warehouse operations.
- Developed Power BI dashboards that identified excess and overflow inventory while providing forecasting capabilities for future inventory levels.
- Collaborated with supply chain stakeholders to establish reporting standards, KPIs, and actionable analytics supporting inventory decisions.

Principal Financial*Project Management Analyst | Digital Transformation*

- Led business process assessments and future-state transformation initiatives.
- Developed project performance dashboards and KPI reporting to support executive decision-making.
- Facilitated stakeholder workshops, gathered requirements, and documented workflows.
- Managed cross-functional transformation projects, ensuring timely delivery and alignment with business objectives.

OneMain Financial*Data Analyst | IT Service Management*

- Developed Power BI dashboards and reports supporting IT Service Management operations.
- Built and optimized ETL processes and data pipelines for centralized reporting.
- Performed trend analysis and KPI monitoring to improve operational performance.
