PROFESSIONAL SUMMARY

Healthcare Data Analyst / Data Engineer with 7+ years of experience transforming clinical, operational, financial, and population health data into actionable reporting and insights. Advanced expertise in SQL Server, ETL/ELT workflows, data validation, HEDIS, Medicare Stars, and automated BI reporting. Skilled in building SQL-based data pipelines, complex queries, stored procedures, and scalable Power BI data feeds. Currently completing an M.S. in Data Science with hands-on experience in advanced analytics, including Python, PySpark, Microsoft Fabric, Databricks, and machine learning.

TECHNICAL SKILLS

Data Analysis & Programming: SQL (MS SQL Server), Python, PySpark, Pandas, NumPy, Scikit-learn, R

Data Engineering: ETL/ELT, SQL Data Pipelines, Data Extraction, Transformation, Validation, Data Wrangling, High-Volume Processing

BI & Visualization: Power BI, Tableau, Microsoft Excel, PivotTables, Advanced Formulas

Healthcare Analytics: HEDIS, Medicare Stars, Population Health, Care Gap Analysis, Clinical & Encounter Data, EDI Reporting

Systems & Platforms: eClinicalWorks (eCW), AllScripts, Oracle Budgeting Database, SmartView, Databricks, Snowflake, AWS

Certifications: Microsoft Certified: Fabric Data Engineer Associate (DP-700) (2026); Databricks Accredited Databricks Fundamentals (2025); Snowflake Associate Platform Certification (2025)

PROFESSIONAL EXPERIENCE

Wyckoff Heights Medical Center

New York City, NY

Data Analyst, Population Health

February 2019 – February 2026

- Managed analytics and reporting supporting Medicare Stars and HEDIS initiatives, providing data-driven recommendations to improve measure performance, compliance, care-gap closure, and quality ratings.
- Managed monthly HEDIS data submissions for affiliated insurance providers, using SQL Server to extract, process, validate, and prepare healthcare data for reporting.
- Extracted and analyzed clinical data from AllScripts and eClinicalWorks (eCW), performing ETL/ELT processes and GIC analysis in support of care-gap identification and closure.
- Designed, developed, and maintained SQL-based pipelines to extract, transform, validate, and deliver clinical and encounter data for population health reporting.
- Developed complex SQL queries, views, and stored procedures to automate data extraction and provide reliable data feeds for Power BI dashboards.
- Lead NCQA audit data workstreams, manage data submission workflows, and ensure compliance with regulatory standards.

Brookdale Hospital Medical Center

New York City, NY

Data Analyst, Reimbursement & Budgeting

March 2015 – January 2019

- Analyzed and consolidated hospital cost-center data supporting the New York State Institutional Cost Report (ICR), helping ensure reporting accuracy and Department of Health compliance.
- Developed recurring SQL Server and Excel reports analyzing Full-Time Equivalent (FTE), salary, hourly workforce, and other financial and operational metrics.
- Produced monthly inpatient and outpatient statistical reports by extracting and analyzing operational data from SQL Server.
- Created ad hoc and real-time financial reports for the Vice President of Reimbursement & Budgeting using Oracle Budgeting Database and SmartView to support budgeting and management decision-making.
- Used advanced Excel formulas, PivotTables, and large datasets to streamline financial analysis, reconciliation, and recurring reporting processes.

EDUCATION

Eastern University | M.S. in Data Science | Expected December 2026 | St. Davids, PA

Bernard Baruch College, City University of New York | B.B.A. in Finance | 2012 | New York, NY
