

RAMESH TEJU

Senior Full Stack Developer

rameshteju@gmail.com | 209-242-1925 | LinkedIn

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with **7+ years of professional experience** in software analysis, application design, development, integration, testing, deployment, modernization, and production support. Strong full-stack experience with **.NET, Java, Spring Boot, React.js, Angular, TypeScript, JavaScript, REST APIs, GraphQL, microservices, and SQL/NoSQL databases**. Experienced building scalable enterprise and distributed applications using AWS, Docker, Kubernetes, Kafka, CI/CD, and automated testing. Proven ability to translate business requirements into technical designs, troubleshoot complex production issues, participate in architecture and code reviews, and collaborate with cross-functional engineering teams in Agile environments.

TECHNICAL SKILLS

Backend / .NET: .NET, Java 21/17/11/8, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JPA, JDBC, REST APIs, GraphQL, Microservices, JSP, Servlets, SOA, MVC, Design Patterns

Frontend: React.js, Redux, React Query, Angular 12/11/10/9/8/6, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, jQuery, AJAX

Databases: SQL Server, Oracle, PostgreSQL, MySQL, IBM DB2, MongoDB, Cassandra, DynamoDB, Elasticsearch, Redis, PL/SQL, SQL Query Optimization, ORM, Transactions, Indexing

Cloud: AWS EKS, ECS, EC2, Lambda, S3, RDS, API Gateway, IAM, SQS, SNS, EventBridge, Kinesis, CloudWatch, DynamoDB, CloudFormation

Messaging: Apache Kafka, RabbitMQ, JMS, AWS EventBridge, Kinesis, SQS, SNS

DevOps: Docker, Kubernetes, Amazon EKS, Helm, Terraform, Jenkins, GitHub Actions, Maven, CI/CD, Blue-Green Deployments

Testing: JUnit 4/5, Mockito, Pact, WireMock, React Testing Library, Jasmine, Karma, Postman, SoapUI, Unit Testing, Integration Testing, API Testing, Regression Testing

Engineering: Git, GitHub, Bitbucket, Agile/Scrum, Code Reviews, Technical Design, Production Troubleshooting, Root-Cause Analysis, Performance Optimization, Technical Documentation

PROFESSIONAL EXPERIENCE

LA COUNTY PROBATION DEPARTMENT

Full Stack Java Developer | Dec 2025 – Present

- Design and develop scalable enterprise applications using **Java 21/17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and Microservices** supporting complex distributed business workflows.
- Develop and integrate **RESTful APIs and microservices** for frontend applications, downstream enterprise systems, and asynchronous integrations.
- Develop responsive **React.js and Angular applications using TypeScript, JavaScript, HTML5, and CSS3**, integrating frontend components with Spring Boot REST APIs.
- Implement Apache Kafka producers, consumers, topics, partitions, consumer groups, and asynchronous messaging to support event-driven architecture and distributed services.
- Develop complex SQL queries and work with **Oracle, PostgreSQL, and MySQL** for relational data processing, transactions, validation, and application integration.
- Perform SQL and database performance tuning, including query optimization, indexing, JPA/Hibernate optimization, and efficient database-access patterns.
- Develop and deploy cloud-native applications using **AWS, Docker, Kubernetes, Jenkins, GitHub Actions, and Maven**.

- Participate in technical design discussions, code reviews, production troubleshooting, root-cause analysis, defect resolution, and performance optimization within Agile/Scrum teams.

DELOITTE – MADISON, WI

Full Stack .NET / Java Developer | Jun 2023 – Nov 2025

- Designed and developed scalable enterprise applications using **.NET, Java, Spring Boot, Microservices, React, and TypeScript**, supporting distributed business workflows and cloud-native application environments.
- Built responsive full-stack applications using **React 19, TypeScript, JavaScript, and Redux**, integrating frontend components with enterprise backend REST services.
- Developed and integrated **REST APIs and GraphQL services** for secure integration between enterprise platforms, internal applications, and downstream services.
- Developed event-driven architectures using **Apache Kafka**, implementing producers, consumers, topics, partitions, consumer groups, asynchronous processing, and distributed messaging patterns.
- Worked with **SQL Server, PostgreSQL, Oracle, MongoDB, and Redis** for relational, NoSQL, caching, transaction, and application integration requirements.
- Containerized enterprise applications using **Docker** and deployed cloud-native workloads using **Kubernetes and Amazon EKS**, supporting scalable production environments.
- Implemented CI/CD pipelines using **GitHub Actions, Jenkins, Docker, Kubernetes, and Maven**, integrating automated testing, builds, containerization, and deployment workflows.
- Performed automated unit, integration, API, functional, and end-to-end testing using **JUnit, Mockito, WireMock, Pact, Postman, and frontend testing frameworks**.
- Troubleshoot complex production issues across **.NET, Java, React, APIs, Kafka, Kubernetes, AWS, databases, and distributed services**, performing debugging, performance analysis, log investigation, and root-cause analysis.
- Participated in requirements analysis, technical design, architecture discussions, code reviews, testing, deployment, monitoring, and production support across the complete SDLC.

DELTA AIR LINES – EAGAN, MN

Full Stack Developer | Nov 2021 – May 2023

- Developed backend services using **Java 17/11, Spring Boot, Spring Cloud, Spring Batch, Spring Data, and REST Microservices**.
- Developed responsive frontend applications using **Angular 10/11, TypeScript, JavaScript, HTML5, CSS3, JSP, and Bootstrap**, including reusable UI components and application services.
- Developed REST APIs for configuration, business workflows, and application integration using JSON and HTTP.
- Implemented secure REST services using **AWS API Gateway and OAuth 2.0** and deployed containerized Spring Boot microservices using Docker and AWS ECS.
- Supported Kubernetes-based CI/CD environments and implemented asynchronous processing using **Apache Kafka and AWS messaging services**.
- Developed Jenkins-based CI/CD pipelines for automated builds, testing, Docker image creation, and deployment.
- Developed unit and frontend tests using **JUnit, Jasmine, and Karma** and used SonarQube for code-quality analysis.
- Supported application troubleshooting, defect resolution, performance analysis, production enhancements, and Agile/Scrum delivery.

MERCY HOSPITAL – CINCINNATI, OH

Java/J2EE Programmer | Jan 2021 – Aug 2021

- Developed enterprise applications using **Java 11, Spring Boot, Spring Framework, Spring Batch, and Microservices**.
- Developed responsive frontend applications using **Angular 8/9, TypeScript, JavaScript, HTML5, CSS3, and Bootstrap**.
- Developed and integrated REST APIs, MQ listeners, and asynchronous application processes.
- Migrated legacy SOAP services to Spring REST APIs and Spring Boot Microservices.
- Worked with **Kafka, RabbitMQ, Redis, AWS, Docker, Kubernetes, Jenkins, Elasticsearch, JPA, and Hibernate** for enterprise application development and deployment.
- Participated in requirements gathering, design walkthroughs, testing, deployment, troubleshooting, and application support.

SAVISRA SOFTWARE SOLUTIONS PVT. LTD. – HYDERABAD, INDIA

Java Developer | Jul 2019 – Nov 2020

- Developed enterprise web applications using **Java 8, Spring Framework, Spring MVC, Spring Boot, Hibernate, JPA, and JSF**.
- Developed responsive enterprise interfaces using **JSF, PrimeFaces, HTML5, CSS3, JavaScript, Angular, React.js, Bootstrap, and jQuery**.
- Integrated frontend components with Java/Spring backend services and **RESTful APIs** for enterprise business workflows.
- Developed RESTful web services using **JSON and XML** and implemented Oracle SQL/PLSQL database integration, transactional processing, and stored procedures.
- Worked with **Kafka, RabbitMQ, and JMS** for asynchronous application communication and enterprise system integration.
- Developed and deployed applications on **Tomcat and WebLogic** and created Jenkins CI/CD pipelines using Maven.
- Developed unit and integration tests using **JUnit and Mockito** and participated in Agile/Scrum ceremonies, code reviews, and production support.

EDUCATION

California State University, East Bay

Master of Science, Computer Science | Aug 2023 – May 2025 | GPA: 3.8
