
SUMMARY

ITSM and Application Support Engineer with experience supporting enterprise service management platforms, automating operational workflows, resolving production incidents, and integrating business-critical applications. Skilled in HP Service Manager (HPSM), JavaScript, SQL, REST APIs, ITIL practices, and cloud technologies. Proven ability to improve system reliability, reduce incident resolution times, support major incident management, and deliver automation solutions that enhance operational efficiency and service delivery.

EXPERIENCE

Jio Platforms Ltd.

Graduate Engineer Trainee - ITSM & Application Support | Navi Mumbai, India

Aug '22 – Aug '23

- Designed and automated Incident, Change, and Problem Management workflows in HP Service Manager (HPSM) using JavaScript, improving MTTR by 35%.
- Provided application and production support for enterprise service management platforms, managing ticket queues, troubleshooting incidents, maintaining SLA compliance, and supporting service desk operations.
- Led 50+ major incident bridges, coordinating technical teams, managing escalations, and driving rapid issue resolution.
- Performed application monitoring, Linux-based operational support, root cause analysis, and environment management, improving system reliability by 20%.
- Executed platform upgrades, change requests, patching, production deployments, and release support activities while minimizing service disruption.
- Developed REST API integrations, SQL-based reports, and workflow automations that streamlined service operations and improved operational visibility.
- Utilized shell scripting and reusable automation solutions to reduce manual effort and improve support efficiency.
- Authored knowledge base articles, operational runbooks, and troubleshooting documentation to support consistent service delivery and faster incident resolution.

PROJECTS

AI-Powered IT Incident Classifier

Personal Project | Toronto, Canada

Jan '26 – Apr '26

- Built an end-to-end machine learning application that automatically classifies IT support tickets by category and priority using Natural Language Processing (NLP).
- Developed a FastAPI service using Scikit-learn (TF-IDF + Logistic Regression) to predict incident categories, priority levels, and confidence scores from natural-language ticket descriptions.
- Stored prediction results in PostgreSQL and built a real-time operational dashboard using Chart.js to visualize ticket trends, operational metrics, and model performance.
- Containerized the solution using Docker to support scalable deployment and demonstrate AI-driven automation for operational efficiency, intelligent ticket triage, and production support workflows.

Service Tracker Portal

Associate Engineer – Service Platform Development | Mumbai, India

Feb '22 – Apr '22

- Developed a service management portal for Incident, Change, Escalation, and SLA tracking using ITIL-aligned workflows.
- Integrated REST APIs with HPSM and built SQL-based reporting dashboards to improve service visibility and operational reporting.
- Implemented automated escalation processes and simulated production deployments using Docker and AWS EC2.

SKILLS

- Programming & Scripting:** Java, JavaScript, SQL, Shell Scripting
- ITSM & Service Operations:** HP Service Manager (HPSM), ITIL, Incident Management, Change Management, Problem Management, Major Incident Management, Service Desk Operations, Escalation Management, SLA Management
- Application & Production Support:** Application Monitoring, Troubleshooting, Root Cause Analysis, Production Support, Release Support, Production Deployments, Change Requests, Knowledge Base Documentation
- Integration & Automation:** REST APIs, SOAP APIs, JSON, XML, Workflow Automation, Web Services Integration
- Cloud & DevOps:** AWS (EC2, Lambda, S3, CloudWatch), Docker, Jenkins, Maven, CI/CD
- Operating Systems & Databases:** Linux, MySQL, PostgreSQL

EDUCATION

HUMBER COLLEGE | Toronto, Canada

Sep '23 – Apr '25*P.G. in Information Technology Solutions*

UNIVERSITY OF MUMBAI | Mumbai, India

Aug '19 – May '22*B. E in Information Technology*

CERTIFICATIONS

- AWS Fundamentals
- SQL and Databases (Coursera)
