SUMMARY:

- ServiceNow Developer/Administrator with 4+ years of experience in designing, developing, and administering ServiceNow solutions across **ITSM**, **ITOM**, **ITBM**, and **GRC** modules, with practical experience gained at Novartis, a prominent pharmaceutical company.
- Proficient in JavaScript for client-side and server-side development, with experience building custom scripts, UI Actions, and automation workflows to enhance ServiceNow functionality.
- Certified ServiceNow Administrator (**CSA**) and Certified Application Developer (**CAD**) with a solid understanding of the **ITIL** framework and best practices, driving alignment of ServiceNow processes with business needs.
- Skilled in implementing data-driven integrations (REST API, SOAP, LDAP, SSO) and troubleshooting complex system interactions to ensure seamless operations across tools and applications.
- Adept at Service Portal design, catalog development, and user experience optimization, creating intuitive Catalog Items, Record Producers, and Order Guides for improved self-service.
- Expertise in process automation with Business Rules, UI Policies, Scheduled Jobs, Notifications, and Events, maximizing efficiency and minimizing manual work.
- Demonstrated ability to build, analyze, and maintain Dashboards, Reports, and Analytics for actionable insights, including scheduled reports for proactive monitoring.
- Known for excellent communication and collaboration skills, successfully partnering with cross-functional teams to support platform upgrades, system integrations, and complex ServiceNow implementations.
- Proven experience in troubleshooting, issue resolution, and supporting ServiceNow's development lifecycle, from requirement gathering to deployment and maintenance.
- Proven ability to streamline ServiceNow processes and optimize workflows, resulting in increased productivity and reduced operational costs for the organization.
- Skilled at identifying opportunities for system improvements and implementing best practices in ServiceNow configuration, resulting in enhanced platform stability and user satisfaction.

EDUCATION:

- **Master of Science in Computer Science** | University of Central Missouri | Warrensburg, MO
- **Bachelor of Technology in Computer Science** | Sathyabama University, India

CERTIFICATIONS:

- ServiceNow Certified Application Developer (**CAD**) | ServiceNow Certified System Administrator (**CSA**)

TECHNICAL SKILLS:

- **ServiceNow Modules:** ITSM, ITOM, ITBM, GRC
- **Scripting & Automation:** JavaScript, UI Policies, Business Rules, Client Scripts, Jelly Scripting
- **Integrations:** REST API, SOAP, LDAP, SSO
- **UI & Workflow Configuration:** Forms, Lists, Views, Workflow Designer, Catalog Builder
- **Tools:** SQL, Power BI, XML, HTML, AngularJS

PROFESSIONAL EXPERIENCE:

Cognizant, India

July 2019 – July 2023

ServiceNow Developer

Responsibilities:

- Designed, developed, and implemented custom ServiceNow applications using JavaScript, HTML, and CSS, enhancing platform functionality and improving user experience.
- Demonstrated expertise across multiple ServiceNow modules, including Incident, Problem, Change, and Release Management, as well as scripting, email configurations, integrations, and notifications.
- Experienced in Scrum and Agile methodologies, contributing to efficient project execution and collaborative workflows.
- Created and optimized workflows to automate business processes, boosting operational efficiency.
- Skilled in JavaScript, HTML, CSS, XML, and web services (REST API, SOAP) for effective customization and seamless integration within ServiceNow.
- Provided continuous production support and user assistance, ensuring the smooth operation of ServiceNow applications and prompt issue resolution.
- Developed technical documentation, user guides, and training materials to enhance user adoption and support for ServiceNow solutions.
- Managed and deployed update sets in ServiceNow, implementing system updates and enhancements effectively.
- Conducted extensive testing, debugging, and troubleshooting (UAT) of ServiceNow applications to ensure reliability and quality.
- Configured ServiceNow modules—including Incident, Change, Problem, Service Catalog, Configuration, and Asset Management—to meet diverse business requirements.
- Built functionalities using Business Rules, Client Scripts, UI Policies, UI Scripts, UI Actions, Script Includes, Workflows, Flow Designer, Scheduled Jobs, and Access Control Lists.
- Enhanced the ServiceNow CMDB module to improve data quality and operational efficiency, contributing to reliable configuration management.
- Involved in all phases of the Agile SDLC and project lifecycle, from planning to production deployment.
- Developed service catalog workflows with approvals to streamline request handling and approvals.
- Proficient in customizing ServiceNow Service Portal widgets, themes, and layouts to align with organizational branding and optimize user experience.
- Contributed to the development of CMDB health dashboards and reports, improving data integrity and reporting capabilities.
- Performed root cause analysis and rapid resolution of issues within ServiceNow, minimizing downtime and improving user satisfaction.
- Configured notification and alert systems within ServiceNow, enabling timely updates for users and stakeholders on critical issues and changes.
- Applied expertise in debugging complex workflows, client/server scripts, and business rules, ensuring system stability and efficient issue resolution.
