

Narahari Kommi

Tempe, AZ | +1 (480) 875-6178 | narahari.kommi@gmail.com | LinkedIn | GitHub

EDUCATION

Arizona State University

M.S. in Data Science, Analytics and Engineering

CGPA: 3.61/4.00 | Relevant Coursework: Data Processing at Scale, Information Assurance & Security, Knowledge Representation and Reasoning

Tempe, AZ

Expected May 2027

Lovely Professional University

B.Tech in Computer Science and Engineering

Phagwara, India

May 2024

TECHNICAL SKILLS

Programming: Java, Python, C++, SQL, JavaScript, HTML/CSS

Software Engineering: Object-Oriented Programming, Data Structures, Algorithms, Debugging, Testing, REST APIs, SDLC

Backend & Data: FastAPI, PostgreSQL, MySQL, Neo4j, Relational Databases, Data Processing

Tools & Platforms: Git, GitHub, Jira, Linux, Docker, Kubernetes, Kafka, Helm

EXPERIENCE

Arizona State University, EdPlus

Working Learner

Tempe, AZ

Aug 2026 – Present

- Support project managers with requirements analysis, query escalation, project documentation, and operational workflows.
- Analyze and document project needs while collaborating with team members on feature and process improvements.

Spice Money

Software Engineer

Mohali, India

Sep 2024 – Apr 2025

- Engineered, tested, and maintained backend functionality supporting financial technology and transaction workflows.
- Integrated UPI payment functionality into an existing Cash Management System, improving payment convenience by 30%.
- Debugged application issues, identified root causes, validated fixes, documented outcomes, and managed development tasks through Jira.

Spice Money

Technology and Research Intern

Mohali, India

Mar 2024 – Aug 2024

- Supported backend development, database operations, debugging, testing, and technical research.
- Investigated system issues, documented findings, and collaborated with engineers on software improvements.

SELECTED SOFTWARE ENGINEERING PROJECTS

BuyerTwin AI – Full-Stack Decision Platform

Python, FastAPI, PostgreSQL, React.js, JavaScript, XGBoost

Apr 2026

- Helped build an end-to-end application connecting React interfaces, REST APIs, backend services, PostgreSQL, and data-driven recommendation workflows.
- Integrated backend APIs and model outputs with user-facing functionality for buyer prioritization and property recommendations.

NYC Taxi Data Pipeline – Distributed Data System

Python, Kafka, Neo4j, Docker, Kubernetes, Helm

May 2026

- Built a modular pipeline for loading, validating, streaming, and processing structured trip data using Kafka and Neo4j.
- Debugged networking, service configuration, and integration issues across containerized components and passed automated integration checks.

Notary AI – Identity Document Comparison System

Python, FastAPI, REST API, OpenCV, Tesseract OCR

2026

- Built a backend workflow that processes uploaded identity documents and extracts selected structured fields.
- Implemented field-level comparison of information such as name and date of birth across notary and identification documents.

ReasonKG – Knowledge Graph-Grounded Financial QA

Python, Neo4j, FAISS, REST APIs, SEC EDGAR XBRL

May 2026

- Built a modular financial QA workflow combining structured data processing, graph retrieval, semantic search, and validation.
- Designed claim-level verification against structured source evidence, reducing hallucinations by about 90% versus baseline RAG.

RELEVANT STRENGTHS

Development: Object-oriented programming, modular design, API development, relational databases, debugging, testing, code maintenance

Collaboration: Requirements analysis, Jira workflows, technical documentation, cross-functional communication, problem solving
