SUMMARY

Data Analyst and **Business Analyst** with 4+ years of experience translating enterprise operational data into strategic decisions across healthcare and technology. Reduced **reporting cycle times** from 2 days to 3 hours, scaled **Power BI** dashboard adoption to 80 active users, and prevented \$180,000 in financial exposure through a **claims data** correction initiative. Delivers **predictive analytics**, **self-service BI**, **data governance** frameworks, and **LLM**-integrated workflows across **SQL**, **Python**, **Tableau**, **Azure Synapse Analytics**, and **scikit-learn** environments to drive decisions at the executive and cross-functional level.

CORE COMPETENCIES

Data Analytics | Business Intelligence | Power BI | SQL | DAX | Python | Data Modeling | ETL/ELT | Azure | Azure Synapse | Azure Data Factory | Databricks | Data Warehousing | Requirements Gathering | BRD/FRD | User Stories | Stakeholder Management | Data Governance | Data Quality | Healthcare Analytics | Claims Analytics | Predictive Analytics | Machine Learning | LLM/GenAI | Agile/Scrum

EXPERIENCE

Trinity Technolabs

Jan 2023 – Jun 2024

Data Analyst / Business Analyst

United Kingdom

- Designed and deployed 4 interactive **Power BI** dashboards covering sales, operations, and finance **KPIs**, growing active **business user adoption** from 20 to **80 stakeholders** within 3 months of launch.
- Engineered 10 parameterized **SQL** stored procedures in **Azure Synapse Analytics** to consolidate **reporting logic** previously spread across 5 disconnected **Excel** files, cutting **report generation time** from 2 days to 4hr.
- Migrated 3 years of legacy transactional records from on-premises **SQL Server** to **Azure Data Lake Storage** via **Azure Data Factory (ADF)**, enabling **cross-domain analytics** for 3 business units that previously operated from siloed data sources.
- Built an **anomaly detection** pipeline in **Python** using **scikit-learn Isolation Forest** on **Azure Machine Learning** to flag **data quality** issues across 3 operational datasets, reducing manual **QA review** by 6 hrs per sprint.
- Integrated a **GPT-3.5 API text classification** module into an internal reporting workflow to **auto-categorize** 2,500 monthly customer support tickets, cutting manual tagging effort from 2 days to 3 hours per cycle.
- Gathered and documented **functional requirements** across 6 structured **stakeholder** interviews, translating findings into 18 **user stories** and **acceptance criteria** for a **CDP** delivered in 16 weeks.
- Conducted a **gap analysis** on a regulatory reporting process, surfacing 8 control deficiencies and partnering with compliance and IT to reduce **data reconciliation** errors from 2–3 incidents per quarter to 0.
- Established a **self-service analytics** foundation by defining **data governance** standards and a centralized **data catalog** covering 30 reporting assets, reducing **ad hoc analytics** requests from business teams by 8 per month.

Centene Corporation

Jun 2018 – Jul 2021

Data Analyst / Business Analyst

India

- Constructed a member enrollment **analytics dashboard** in **Tableau** connected to a **SQL Server** data warehouse, enabling case managers to track 20,000 beneficiary records and surface eligibility gaps up to 2 weeks earlier than prior manual processes.
- Authored 20+ optimized **T-SQL** queries and stored procedures to **extract, transform, and load (ETL) claims data** from 3 source systems into a centralized **data warehouse**, trimming overnight **ETL** run time from 3 hrs to 60 min.
- Performed **root cause analysis** on a claims adjudication defect affecting 8,000 member records, coordinating with 2 cross-functional teams to implement a **data correction** that prevented an estimated \$180,000 in potential overpayments.
- Delivered monthly and quarterly **regulatory reporting** for 3 state **Medicaid** programs using **SQL Server Reporting Services (SSRS)**, meeting all **CMS** submission deadlines across a continuous 24-month reporting cycle.
- Defined 15 **business requirements** for a provider network **data quality** initiative, aligning network management, IT, and compliance **stakeholders** and reducing project rework by 1 full delivery iteration.
- Developed a **Python (pandas)** reconciliation script that automated **pharmacy benefit data** comparison between 2 vendor feeds, recovering 6 analyst hours per month and eliminating a recurring 2-day delay in month-end close.

- Analyzed member utilization patterns across a 500,000-row **SAS** dataset to support **actuarial modeling**, identifying 3 service categories where average cost per episode exceeded internal benchmarks by \$90 and prompting a targeted clinical review.
- Upheld **HIPAA compliance** standards across reporting pipelines processing **protected health information (PHI)** for plan members, applying **data masking** protocols and contributing to an annual compliance audit with zero findings.

TECHNICAL SKILLS

Languages & Querying: SQL (T-SQL, PL/SQL), Python, R, DAX, MDX

Data Visualization & BI: Power BI, Tableau, Looker, Microsoft Excel, Matplotlib, Seaborn, self-service analytics

Databases & Data Warehousing: SQL Server, Oracle Database, Snowflake, Azure Synapse Analytics, Google Big-Query, PostgreSQL, Amazon Redshift

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP), Azure Data Lake Storage (ADLS)

ETL & Data Engineering: Azure Data Factory (ADF), dbt (data build tool), Apache Spark, Apache Airflow, Databricks, Apache Hadoop, Apache Hive, Alteryx, Talend

Machine Learning & AI: scikit-learn, pandas, NumPy, SAS, Azure Machine Learning, predictive modeling, regression analysis, clustering, Natural Language Processing (NLP), Large Language Model (LLM) API integration, Random Forest, forecasting

Business Analysis: requirements gathering, business requirements document (BRD), functional requirements, stakeholder management, process mapping, gap analysis, user story development, use case documentation, cost-benefit analysis, JIRA, Confluence, Agile/Scrum

Data Governance & Compliance: data governance, data catalog, data lineage, data quality management, Master Data Management (MDM), HIPAA compliance, protected health information (PHI), data stewardship, metadata management

Analytics & Methodology: predictive analytics, A/B testing, root cause analysis, KPI design, ad hoc analysis, variance analysis, statistical analysis, executive reporting, SQL Server Reporting Services (SSRS), Microsoft Office 365

PROJECTS

Retail Sales Forecasting & Demand Intelligence Dashboard

- Architected a **demand forecasting** pipeline using a **Random Forest regression** model trained on 3 years of point-of-sale transactional data, generating weekly **SKU-level forecasts** across 500 product lines with a mean absolute error under 8 units.
- Visualized forecast outputs in a **Power BI executive dashboard** consumed by 3 supply chain planners, enabling inventory reorder decisions 2 weeks earlier than prior processes and preventing an estimated \$60,000 in overstock.
- Extracted and cleansed 2.4 million rows of raw sales records using **Python (pandas)** and **SQL**, compressing **data preparation** time from 6 hours to 45 minutes per reporting cycle.

Insurance Claims Portal Modernization – Business Requirements & Process Redesign

- Spearheaded **end-to-end business analysis** for a claims portal modernization initiative, producing 18 **use cases**, 35 **functional requirements**, and 4 **process workflow diagrams** serving as the development team’s sole source of truth across a 6-month delivery cycle.
- Mapped **AS-IS** and **TO-BE** claims submission workflows across 6 process areas, identifying 9 redundant manual steps and recommending **process automation** that reduced projected **claim processing time** from 14 days to 5 days.
- Coordinated 12 **Agile/Scrum** sprint ceremonies across 4 **stakeholder** groups in **JIRA** and **Confluence**, sustaining 0 sprint carryover defects from kickoff through production release.

EDUCATION

Union Commonwealth University	Kentucky, USA
<i>MSc in Information System Management</i>	<i>Dec 2024 – Aug 2026</i>
University of Essex	United Kingdom
<i>Master of Science in Data Science</i>	<i>Dec 2021- Jan 2023</i>
Jawaharlal Nehru Technological University (JNTU)	India
<i>Bachelor of Technology in Computer Science & Engineering</i>	<i>Aug 2015- July 2019</i>
